VOL. XXXIV.] QUARTER ENDING SATURDAY, 1ST JANUARY, 1898.

[No. 52A.]

GENERAL REGISTER OFFICE,
Charlemont House, Dublin, 20th January, 1898.

DUBLIN REGISTRATION DISTRICT.—Births.—In the Dublin Registration District, which consists of the city of Dublin, the districts of Rathmines, Donnybrook, Blackrock, Kingstown, Clontarf and Howth, No. 1, and Coolock and Drumecondra, No. 1, and portions of the districts of Finglas and Glasnevin, and Palmerston, the total area thereof being 24,693 statute acres, and the population according to the Census of 1891, 349,594, there were registered during the thirteen weeks ended on Saturday, 1st January, 1898, 2,357 births—1,187 boys and 1,170 girls—being equal to an annual ratio of 1 in 37·1, or 27·0 in every 1,000 of the population.

The number of births registered in the city was 1,874, equivalent to an annual rate of 30·6 in every 1,000 of the population; and in the suburban districts named above, 483, equal to a rate of 18·5 in every 1,000 of the population.

There were registered in London during the same period 32,841 births—being equal to an annual birth-rate of 29·4 in every 1,000 of the estimated population; in Glasgow there were registered 5,676, being equal to 31·8 per 1,000; and in Edinburgh, 1,921—a number affording an annual birth-rate of 26·3 in every 1,000 of the estimated population.

Deaths.—The number of deaths registered in the Dublin Registration District during the quarter was 2,143—1,091 males and 1,052 females—affording an annual ratio of 1 in 40·8, or 24·5 in every 1,000 of the population according to the Census of 1891; omitting the deaths (70) of persons admitted into Public Institutions from localities outside the district, the rate was 23·7 per 1,000. The average number of deaths registered in the fourth quarter of the ten years 1887–96 was 2,299, equivalent to an annual mortality of 26·3 per 1,000 persons; thus the rate (24·5) for last quarter was 1·8 under the average.

The number of deaths of inhabitants* of that portion of the City of Dublin north of the Liffey registered last quarter was 773, representing an annual mortality of 26·4 in every 1,000 of the population; and the number in that portion south of the river

* The death-rates referring to the several Dublin Districts have been calculated on the mortality for the respective districts as corrected by the distribution of deaths in Public Institutions according to the localities from which the deceased persons were admitted.

was 856, equivalent to a rate of 26·7 per 1000. In the suburban districts the number of deaths registered was 444, being equal to an annual death-rate of 17·0 in every 1,000.

The number of deaths registered in London during the quarter was 21,618—a number equal to an annual mortality of 19·4 in every 1,000 of the inhabitants; in Glasgow the number was 3,676, equal to 20·6 in every 1,000; and in Edinburgh 1,412, affording an annual death-rate of 19·3 in every 1,000 of the estimated population.

Diseases.—The number of deaths from *zymotic diseases* registered in the Dublin Registration District during last quarter is 263, being 149 under the number for the preceding quarter; 57, or 18 per cent., below the average for the fourth quarter of the ten years, 1887-96; and 83 under the number for the fourth quarter of 1896. The annual rate per 1,000 of the population, represented by the deaths from these diseases during last quarter, is 3·0, being 1·7 under the rate for the quarter ended the 2nd October last, and 0·7 below the average rate for the fourth quarter of the ten years 1887-96, and also 0·7 under the rate for the fourth quarter of 1896.

The zymotic disease which proved most fatal last quarter is *enteric fever*, which caused 99 deaths—equal to an annual rate of 1·1 per 1,000 of the population—being 34 or 52 per cent., in excess of the average for the corresponding quarter of the ten years 1887-96; 54 over the number for the last thirteen weeks of 1896, and 59 over that for the third quarter of last year. The hospital statistics show that 360 cases of this disease were admitted during the quarter, being 174 in excess of the admissions for the corresponding period in 1896, and 138 above the number for the third quarter of last year; 298 enteric fever patients were discharged during the quarter; 40 died; and 135 remained under treatment on Saturday, the 1st instant, being 22 over the number in hospital at the close of the September quarter.

No deaths from *typhus* were registered during the quarter, and there were only 4 deaths under the head of *simple continued and ill-defined fever*.

Scarlet fever (scarlatina) caused 35 deaths against 27 for the preceding quarter, and an average of 28 for the fourth quarter of the ten years 1887-96. The number of cases of scarlet fever admitted to hospital is 405, being 118 over the admissions for the preceding quarter, but showing a decline of 160 when compared with the admissions for the last thirteen weeks of 1896; 326 patients were discharged during the quarter; 19 died; and 179* remained under treatment on Saturday, the 1st instant, being 60 over the number in hospital at the close of the third quarter.

There were 16 deaths from *diphtheria* against an average of 6 for the fourth quarter of the ten years 1887-96. The deaths from this disease registered during the last three quarters amount to 66, or 52 in excess of the average for the corresponding period in the ten years 1887-96.

The number of deaths tabulated under the head of *diarrhoea, dysentery* is 39, showing a decline of 21 as compared with average for the fourth quarter of the preceding ten years.

Among the remaining deaths from zymotic diseases last quarter are 2 from *measles*, 17 from *influenza* and its complications, 5 from *simple cholera* and *choleraic diarrhoea*, 4 from *erysipelas*, &c.

The number of deaths from *diseases of the respiratory system* (exclusive of phthisis or pulmonary consumption) registered is 434, being 55 below the average for the corresponding quarter of the ten years 1887-96, and 103 or 19 per cent. under the number for the last thirteen weeks of 1896; the 434 deaths comprise 269 from *bronchitis*, 123 from *pneumonia or inflammation of the lungs* (being 4 over the average number of deaths from that disease in the fourth quarter of the ten years 1887-96), 13 from *croup*, 2 from *pleurisy*, &c.

* See note (*) on next page.

TABLE I.—The NUMBER of CASES of the undermentioned DISEASES treated in Dublin Hospitals during the **Quarter** (13 weeks) **ended Saturday, 1st January, 1898.**

DISEASES.	No. of Cases in Hospital at close of previous quarter.	No. admitted during quarter.	Discharged.	Died.	No. under treatment on above date.
Small Pox, . . .	6	6	10	.	2
Measles, . . .	119	405	326	19	179*
Scarlet Fever,	8	5	1	2
Typhus " . . .	113	360	298	40	135
Enteric " . . .	12	81	51	13	29
Pneumonia, . . .					

The number of deaths of children ascribed to convulsions is 97, being 19 under that for the preceding quarter, and showing a decrease of 60 as compared with the average for the fourth quarter of the ten years 1887-96.

Forty-one deaths were caused by apoplexy, 8 by epilepsy, 86 by other diseases of the brain and nervous system (exclusive of convulsions), and 187 by diseases of the circulatory system.

Phthisis or pulmonary consumption caused 242 deaths,—being 31 under the average or the corresponding quarter of the ten years 1887-96—mesenteric disease 48, tubercular meningitis 44, and cancer 85.

Sixty accidental deaths and 2 cases of suicide were registered.

In 151 instances the cause of death was uncertified, there having been no medical attendant during the last illness. Of the 151 cases, 87, or 58 per cent., were deaths of children under 5 years of age: these 87 deaths form 15 per cent. of the total number of deaths of children of that age. Of the deaths of 134 infants under 1 month old registered, there were 52 (or 39 per cent.) regarding which the cause was uncertified.

From Table II., on page 860, it will be seen that, excluding 70 deaths of persons admitted into Public Institutions from localities outside the Dublin Registration District, the number of deaths registered during the quarter was 2,073, equal to an annual rate of 23·7 per 1,000 of the population according to the Census of 1891, and that 196 of these deaths, representing an annual rate of 2·2 per 1,000 persons, were caused by the principal zymotic diseases.† The death-rate for the city (from all causes) was 26·6 per 1,000, and for the suburbs 17·0 per 1,000, the district rates ranging from 14·2 for Rathmines to 30·6 for No. 2 South City (Castle-street) district. The death-rate represented by the mortality from the principal zymotic diseases in the city is 2·4, and in the suburbs 2·0, the rates for the several districts varying from 1·5 in Kingstown to 4·8 in Clontarf and Howth No. 1 District, the 25 deaths from all causes in the latter district comprising 2 from scarlatina, 1 from enteric fever, and 2 from diarrhœa.

Occupations.—Table III., on page 861, shows the occupations or social position of the persons whose deaths were registered during the quarter, the various callings being grouped in classes and orders, so as to show the respective rates of mortality in the several social grades of the population. From this Table it will be observed that the deaths in families of the "Professional and Independent Class" were equal to an annual rate of 17·5 per 1,000 of the persons in that class according to the Census of 1891; in the "Middle Class" the death-rate was 18·1 per 1,000; among the "Artisan Class and Petty Shopkeepers" it was 21·6; and in the "General Service Class" and the "Inmates of Workhouses," combined, it was 30·6.

* Exclusive of 26 patients in "Bentavlin," the Convalescent Home of Cork-street Fever Hospital.

† See note (*) on page 862

Ages.—Of the 2,143 persons whose deaths were registered in the Dublin district during the quarter, 586 were under 5 years of age, this number being equal to an annual mortality of 63·3 in every 1,000 children at that age (according to the Census of 1891); 181 were between the ages of 5 and 20, representing an annual death-rate of 7·1 per 1,000 persons of that age-period: the total number under 20 years being equal to an annual mortality of 22·1 per 1,000 of the population at that age (according to the Census of 1891);—378, or 12·6 per 1,000 persons, were between 20 and 40;—465, or 28·5 per 1,000, between 40 and 60;—440, or 74·1 per 1,000, between 60 and 80; and 93, or 204·4 per 1,000, were aged 80 and upwards, including 17 persons (2 males and 15 females) stated to have been nonagenarians, and one (a woman) returned as 101 years old.

Public Institutions.—Of the 2,143 deaths in the Dublin District during the quarter, 771, or 36 per cent., occurred in public institutions, viz., 454 in the various hospitals, prisons, and lunatic asylums; 146 in the North Dublin Union Workhouse; 163 in the South Dublin Union Workhouse; and 8 (those of persons admitted from the Dublin Registration District) in the Rathdown Union Workhouse.

Weather.—The mean temperature for the quarter, deduced from the mean weekly temperature, as returned from the Ordnance Survey Office, Phoenix Park, was 47·0°. At Greenwich the mean temperature was 45·9°; at Glasgow, 44·5°; and at Edinburgh, 44·7°.

The rainfall at Dublin during the thirteen weeks measured 7·740 inches; at Greenwich, 3·69 inches; at Glasgow, 10·30 inches; and at Edinburgh, 5·83 inches.

TABLE II.—Showing, for the **Quarter (13 weeks) ended 1st January, 1898**, the number of **Deaths** of the Residents of the several **Registrars' Districts** in the **DUBLIN REGISTRATION DISTRICT**, the **Annual Rate** per 1,000 of the **Population** of the respective **Districts** represented thereby, and by the **Deaths** from the principal **Zymotic Diseases**; with the **Mortality** from each of the principal causes, the **Deaths in Public Institutions** being assigned to the **Districts** from which the deceased were admitted.

Twenty-three Principal Town Districts of Ireland.—The average annual death rate represented by the deaths from all causes registered during last quarter in the Dublin Registration District and twenty-two of the principal Urban Sanitary Districts of Ireland (the aggregate population of the 23 districts being for the purpose of these Returns estimated at 984,720) was 21·9 per 1,000 persons, the respective rates for the several districts being as follow, ranging in order from the lowest to the highest :—

Carriekfergus, . . .	13·0	Waterford, . . .	18·6
Queenstown, . . .	14·1	Armagh, . . .	19·4
Lisburn, . . .	14·7	Cork, . . .	21·1
Lurgan, . . .	15·1	Galway, . . .	22·3
Tralee, . . .	15·5	Belfast, . . .	22·4
Dundalk, . . .	15·7	Portadown, . . .	22·8
Clonmel, . . .	16·8	Londonderry, . . .	23·1
Kilkenny, . . .	17·0	Drogheda, . . .	23·6
Ballymena, . . .	17·7	Dublin, . . .	23·7
Newry, . . .	17·9	Newtownards, . . .	25·2
Limerick, . . .	18·1	Sligo, . . .	28·8
Wexford, . . .	18·4		

The average annual rate represented by the deaths from the principal zymotic diseases* in the 23 districts is 2·1 per 1,000 of the population, the rates varying from 0·3 in Wexford to 3·5 per 1,000 in Drogheda and Newtownards.

The following is a synopsis of the mortality from the principal zymotic diseases* in the *twenty-two provincial town districts* already named, and Tables IV. and V. give in detail the results of the registration for the quarter.

Small-pox.—No deaths from small-pox were registered in any of the 22 districts during the quarter.

Measles.—The only deaths from measles registered throughout the 22 districts were 5 in Belfast, 3 in Cork, 1 in Newry, and 5—equal to an annual rate of 2·2 per 1,000 of the population, according to the Census of 1891—in Newtownards.

Scarlatina.—The total number of deaths from scarlatina for the 22 districts is 16 only, comprised of 5 in Belfast, 5—equal to an annual rate of 1·5 per 1,000 of the population—in Drogheda, and 1 in each of 6 of the other districts.

Typhus.—Three deaths from this disease were registered, viz.;—One in Londonderry, 1 in Waterford, and 1 in Galway.

Whooping-cough.—During the first quarter of the year whooping-cough caused 70 deaths in Belfast, the number for the second quarter was 49; for the third, 42; and the returns for last quarter show a further decline, the number of deaths being 26. The deaths from whooping-cough in the other districts last quarter consist of 3 in Cork, 7 in Londonderry, 5 in Waterford, 5—equal to an annual rate of 1·5 per 1,000—in Drogheda, 2 in Newry, 1 in Ballymena, and 1 in Queenstown.

Diphtheria caused 14 deaths in Belfast, but the only deaths from this disease in any of the other districts were 1 in Cork, 1 in Limerick, and 1 in Armagh.

Simple continued and ill-defined fever.—The only deaths returned under this heading are 7 in Belfast, 1 in Galway, and 1 in Dundalk.

Enteric fever.—Deaths from enteric fever in Belfast, which had fallen from 107 for the second quarter of the year to 92 for the third quarter, rose last quarter to 97 (a number equal to an annual rate of 1·4 per 1,000 of the estimated population), being 67 in excess of the number for the last quarter of 1896. In 12 of the other districts no deaths from enteric fever were registered during last quarter, and the total number for the remaining 9 districts is 15, of which 3 occurred in Cork, 3 in Limerick, 2 in Clonmel, 2 in Carriekfergus, and 1 in Londonderry, Waterford, Lurgan, Newtownards, and Portadown respectively.

Diarrhoea, Dysentery.—Ninety deaths, including 29 in Belfast and 19 in Cork, were returned under this heading.

* Small-pox, measles, scarlet fever, typhus, whooping-cough, diphtheria, simple continued and ill-defined fever, enteric fever, diarrhoea, and dysentery

TABLE IV.—*Births and Deaths Registered during the Quarter (13 weeks) ending Saturday, 1st January, 1898, in the Dublin Registration District, and in each of the undermentioned Twenty-two Urban Sanitary Districts (exclusive of Deaths in Public Institutions of persons admitted from other localities), with*

Marriages:—OCT., NOV., DEC., 1896. **Births & Deaths:**—JAN., FEB., MAR., 1897.

*General Register Office, Charlemont House,
Dublin, 29th April, 1897.*

During the quarter ended 31st March last, there were registered in the 802 Registrars' Districts in Ireland 28,113 births—a number equal to an annual birth-rate of 24·7 in every 1,000 of the estimated population—and 26,085 deaths, representing an annual rate of 22·9 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 3,314 persons emigrated. A decrease of 1,286 would, therefore, appear to have taken place in the population during the quarter. The population estimated to the middle of this year is 4,550,929*.

In England last quarter, the birth-rate represented was 30·4 in every 1,000 of the estimated population, and the death-rate 18·5 per 1,000.

The birth-rate in Ireland for the quarter is 0·8 over the average rate for the corresponding quarter of the last ten years and 0·7 over the rate for the first quarter of the year 1896. The deaths are over those registered in the corresponding quarter of 1896 to the extent of 4,956; the death-rate is 4·3 over the rate for that quarter, and 0·8 over the average for the first quarter of the last ten years.

Compared with those for the corresponding quarter of 1896, the returns of pauperism, furnished by the Local Government Board, show an increase of 1,019 in the average number of Workhouse inmates on Saturdays during the quarter, and an increase of 471 in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years 1887–96 the number of Workhouse inmates shows a decrease of 864

* See page 15.

or 1·9 per cent., and the number of persons on out-door relief a decrease of 6,412, or 10·2 per cent. The estimated decrease in the population as compared with the average population for those years is 2·8 per cent.

The annual marriage-rate (4·5 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1896 is 0·4 over the average rate for the corresponding quarter of the ten years 1886-95.

TABLE I.—Showing for each **Province** and **County** in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of **Marriages** registered during the quarter ended 31st December, 1896, and by the **Births** and **Deaths** registered in the Quarter ended 31st March, 1897.

MARRIAGES.

The marriages (5,109) registered in Ireland during the fourth quarter of 1896 are equivalent to an annual rate of 4·5 per 1,000 of the estimated population, being 0·2 under the rate for the corresponding quarter of 1895, but 0·4 over the average rate for the fourth quarter of the ten years 1886-95. The total number of marriages registered during the year was 22,856, or 5·0 per 1,000 of the population; 15,785 were registered under the provisions of the 26 & 27 Vic., cap. 90, and 7,071 under the 7 & 8 Vic., cap. 81; the former number being equal to 4·6 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·3 per 1,000 of the members of all other religious persuasions. Compared with the averages for the previous ten years the rate for Roman Catholic marriages shows an increase of 0·5, and that for all other marriages an increase of 0·4. Of the 22,856 marriages registered last year, 7,230 were registered in the first quarter, 5,389 in the second, 5,128 in the third, and 5,109 in the fourth.

* The rates for the total of Ireland are calculated on the estimated population in the middle of the year; those for the provinces and counties on the population according to the Census of 1891.

TABLE II.—Showing by Quarterly Periods, the Marriages registered in Ireland in each of the eleven years 1886–96, with the average numbers for the ten years 1886–95.

BIRTHS.

The number of births registered during the quarter ended 31st March last was 28,113—14,385 boys and 13,728 girls—being equal to an annual ratio of 1 in every 40.5, or 24.7 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1887–96 was 27,929, equivalent to an annual rate of 23.9 per 1,000 of the estimated mean population of those years. Thus the birth-rate was 0.8 over the average.

The respective birth-rates for the four provinces* last quarter are—Leinster, 24.0 per 1,000 of the population, according to the Census of 1891; Munster, 22.2; Ulster, 25.1; and Connaught, 23.7.

The highest county birth-rate* is 31.3 for Antrim, and the lowest 17.9 for Cavan. Of the intermediate rates the highest five are—Dublin, 29.4; Down, 28.4; Mayo, 25.5; Armagh, 25.1; and Londonderry, 24.4; and the lowest five are—Monaghan, 18.1; Meath, 18.6; Fermanagh, 19.4; Queen's, 19.5; and Tyrone, 20.0.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 26,085—12,622 males and 13,463 females—affording an annual ratio of 1 in every 43.6, or 22.9 per 1,000 of the estimated population: the average rate for the corresponding quarter of the ten years 1887–96 was 22.1 per 1,000.

The death-rate in Leinster was 25.3 per 1,000 of the population according to the Census of 1891; in Munster, 18.9; in Ulster, 25.0; and in Connaught, 16.1.

The county death-rates* range from 14.6 in Kerry to 36.9 in Dublin. Between these rates the lowest five are—Roscommon, 15.3; Mayo, 15.5; Clare, 15.6; King's, 16.4; and Galway, 16.4; and the highest five are—Antrim, 29.4; Londonderry, 27.1; Armagh, 26.3; Tyrone, 25.7; and Down, 24.2.

* See note on foregoing page.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1887-96, and the average number for that period; also the number registered in the first quarter of the year 1897:—

Average, 1887-96,	23.9	24.3	22.3	21.3	22.9	22.1	18.6	14.7	16.9	18.1
1897.	24.7					22.9				

Ages.—Of the 26,085 deaths registered last quarter, 3,254, or 12.5 per cent., were of children under 1 year old; and 11,286, or 43.3 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 115.7 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 14.3 per cent. of the total deaths registered therein; in Munster, 11.5 per cent.; in Ulster, 12.1 per cent.; and in Connaught, 10.8 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 35.6 per cent.; in Munster to 45.8 per cent.; in Ulster to 45.0 per cent.; and in Connaught to 52.2 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

The mortality returns for the first quarter of 1897 present a marked contrast to those for the corresponding quarter of last year. In that quarter the death-rate was much below the average for the March quarter, but in last quarter the general death-rate was somewhat above the average for the first quarter of the last ten years, and the rate represented by the deaths from the principal zymotic diseases,* taken collectively, was largely in excess of the average for the periods referred to, and was higher than the rate for any of them except that for the first quarter of 1888. The latter increase is chiefly due to the prolonged prevalence of measles and whooping-cough in Dublin, and as regards the increase in the general death-rate when compared with the rate for the March quarter of 1896, the Registrars' Notes (see pages 80-90), show that it was mainly caused by the extended prevalence of influenza and diseases of the respiratory system.

Diseases.—The total number of deaths from the principal zymotic diseases* registered during last quarter is 1,837, equivalent to an annual rate of 1.6 per 1,000 living, being 0.6 over the rate for the preceding three, 0.7 over that for the first quarter of last year, and 0.4 in excess of the average rate for the first quarter of the ten years 1887-96.

(*) See note (†) on page 7.

Small-pox.—The only deaths from small-pox registered during last quarter are 2 which occurred in the City of Dublin; the returns contained no information as to whether the deceased persons had been vaccinated.

Measles.—Owing in great measure to the prevalence of the disease in the Dublin Registration District, where it caused 355 deaths, the mortality from measles was greatly in excess of the average, the deaths amounting to 621, being more than treble the average number for the corresponding quarter of the last five years, and 204, or about 49 per cent., above the highest number for any of these periods, which was 417, the number for the first quarter of the year 1894. The four Unions or Superintendent Registrars' Districts of Belfast, Cork, Dublin North, and Dublin South furnish 489, or 79 per cent., of the deaths from this cause, and there are 8 Unions in which the annual rate represented by the mortality from it exceeded one per 1,000 of the population in 1891, viz.:—Belfast Union (77 deaths), where the rate was 1·1 per 1,000; Clonakilty (7 deaths), 1·3 per 1,000; Cork (48 deaths), 1·4 per 1,000; Dublin North (155 deaths), 4·2 per 1,000; Dublin South (209 deaths), 4·2 per 1,000; Dunmanway (7 deaths), 1·8 per 1,000; Kells (6 deaths), 1·4 per 1,000; and Skull (14 deaths), 5·0 per 1,000. The 7 deaths in Clonakilty Union include 5—equal to an annual rate of 2·9 per 1,000—in Timoleague District; and of the 14 deaths in Skull Union, 10—equal to an annual rate of 8·7 per 1,000—were in Goleen District. There were 10 fatal cases of the disease in Armagh Union, 6 in Larne Union, 12 in Lurgan Union (including 10—equal to an annual rate of 2·6 per 1,000 persons—in Portadown District), 8 in the Union of Rathdown, and 9 in Sligo Union, including 7—equal to an annual rate of 5·9 per 1,000—in Carney No. 2 District. The remaining 53 deaths were distributed over 23 Unions, and there are 123 Unions where no deaths from this cause were registered. The total number for the province of Leinster is 388; for Munster 93; for Ulster 124; and for Connaught 16.

Scarlatina.—The number of deaths from scarlatina is 154, being 40 above the average for the corresponding quarter of the last five years, but 30 under the number for the quarter ended the 31st December last; 32 under the number for the first quarter of last year; and lower than the number for any quarter since the third quarter of 1895. Of the 154 deaths 64 occurred in the province of Leinster (including 41 in the Dublin Registration District); 14 in Munster; 65 in Ulster, and 11 in Connaught. In only 6 Unions did the deaths from this cause amount to 5; these Unions are Belfast, where there were 19 deaths; Dublin North, 14 deaths; Dublin South, 31; Lisburn, 7; Listowel, 5; and Londonderry, 6.

Typhus.—There were only 41 deaths from typhus registered, being 16 below the average of the corresponding quarter of the last five years; they were distributed as follows:—In Leinster 12, in Munster 13, in Ulster 5, and in Connaught 11. Nine of the 12 deaths in Leinster occurred in the City of Dublin, and of the 13 deaths in Munster, 5 were in Clonakilty Union, and 6—equal to an annual rate of 1·3 per 1,000 of the population—in the Union of Dingle.

Whooping-cough.—The deaths from whooping-cough amount to 554, being 225, or 68 per cent., above the average for the corresponding quarter of the last five years, and forming the highest number for any quarter since the third quarter of the year 1880, when 557 deaths from this disease were registered. Considerably more than one-third of the mortality from whooping-cough last quarter occurred in Dublin South

Union, where the deaths from the disease numbered 222, equivalent to an annual rate of 4·4 per 1,000 of the population. In Dublin North Union there were 30 deaths, in Belfast Union, 75, of which 70 (equal to an annual rate of 1 per 1,000 living) were in the City of Belfast; in Cork Union, 14; and there are 16 other Unions in each of which 5 or more deaths from this disease were registered, including the following, in which the annual rate represented exceeded 1 per 1,000 of the population:—Dungannon (9 deaths), 1·03 per 1,000; Dungarvan (8 deaths), 1·9 per 1,000; Granard (9 deaths), 1·3 per 1,000; Lismore (6 deaths, including 5—equal to an annual rate of 6·6 per 1,000—in Tallow District), 1·6 per 1,000; Longford (7 deaths), 1·1 per 1,000; Mohill (10 deaths, of which 7—equal to an annual rate of 6·4 per 1,000—were in Carrigallen District), 1·8 per 1,000; Newry (16 deaths), 1·1 per 1,000; and Thurles (8 deaths), 1·2 per 1,000. The total number for the province of Leinster is 289; for Munster 51; for Ulster 176; and for Connaught 38.

Diphtheria.—The number of deaths from diphtheria is 89, or 4 under the average for the corresponding quarter of the last five years; 20 (including 8 in Dublin South Union) occurred in Leinster; 12—of which 5 were in Cork Union—in Munster; 51 (including 11 in Belfast Union and 7 in the Union of Coleraine) in Ulster, and 6 in Connaught.

Simple continued and ill-defined Fever.—There were only 26 deaths returned under this heading, viz.:—5 in Connaught and 7 in each of the other provinces. The average number for the corresponding quarter of the last five years was 34.

Enteric Fever caused 162 deaths, being 17 over the number of the corresponding quarter of last year, but 9 under the average for the first quarter of the five years 1892–6. In Leinster there were 40 deaths from this disease, including 15 in the North and 12 in the South Dublin Union; in Munster 35; in Ulster 81, of which 57, or more than one-third of the total for Ireland, occurred in Belfast Union; and in Connaught 6.

Diarrhoea.—The number of deaths returned as having been caused by diarrhoea is 186, or one under the average for the corresponding quarters of the last five years; 68 occurred in Leinster; 39 in Munster; 71 in Ulster; and 8, only, in Connaught.

Simple Cholera.—Two deaths—one in Leinster and one in Munster—were ascribed to this disease.

Hydrophobia caused 3 deaths, of which one occurred in Munster, one in Ulster, and one in Connaught.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in 1 district, chicken-pox in 3 districts, measles in 56, German measles in 3, scarlatina in 48, whooping-cough in 45, diphtheria in 9, fever in 29 (typhus 6, simple continued and ill-defined fever 2, and enteric 21), influenza in 127, and mumps in 10.

Inquests.—There were 790 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 33 of the total deaths registered.

In Leinster there was 1 inquest to every 32 deaths registered, in Munster 1 to 33, in Ulster 1 to 30, and in Connaught 1 to 55.

Deaths in Public Institutions.—Of the 26,085 deaths registered, 3,924, or 15·0 per cent., occurred in public institutions. In Leinster the percentage was 20·8, in Munster 20·2, in Ulster 9·6, and in Connaught 9·2.

The following table (TABLE IV.) shows the number of deaths from the principal **zymotic** diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1897, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Zymotic Diseases.											Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Simple and Ill-defined Fever.	Enteric Fever.	Diarrhoea.	Simple Cholera.

URBAN SANITARY DISTRICTS.

Separate statistics for the Urban Sanitary Districts are given in Table V. The death-rate for last quarter in these districts, which contain nearly one-fourth of the total population of the country, was 32·4, and the birth-rate 32·1 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the death-rate was 19·0 and the birth-rate 21·3 per 1,000.

The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Sanitary Districts during the quarter was 4·3 per 1,000 of the population, according to the Census of 1891: in the remainder of the country the rate was 0·7 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FIRST QUARTER of the year 1897, in the DUBLIN REGISTRATION DISTRICT, and in each of the PROVINCIAL URBAN SANITARY DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—"The Dublin Registration District," which consists of the City of Dublin and its Suburban Districts, comprises the Urban Sanitary Districts of Dublin, Clontarf, Drumcondra Clonliffe and Glasnevin, Kilmainham, Rathmines and Rathgar, Pembroke, Blackrock, Kingstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the twenty-two Urban Sanitary Districts marked thus (*) in the following Table have been compiled from the Weekly Returns issued by the Registrars and relate to the thirteen weeks ending Saturday, 3rd April, 1897.

† Small-pox, measles, scarlet fever, typhus, whooping-cough, diphtheria, simple continued and ill-defined fever, enteric fever, diarrhoea and simple cholera.

‡ The rates for Belfast have been calculated on the population estimated in the middle of the year 1897

VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1897, there were 14,423 persons successfully vaccinated; in 4,108 cases the operation was postponed, and 29 children were reported as insusceptible of vaccination. The deaths of 1,743 unvaccinated children under 3 months old were registered during the quarter, making a total of 20,303 children with regard to whom particulars as to vaccination were ascertained.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st March last, was 3,314 (1,936 males and 1,378 females), being 1,715 less than in the corresponding quarter of the year 1896, and 4,107 under the average number for the first quarter of the ten years 1887-96.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February, and March, in 1896 and 1897:—

MONTHS.	NUMBER OF EMIGRANTS.								
	Males.			Females.			Total.		
	1896.	1897.	De-crease.	1896.	1897.	De-crease.	1896.	1897.	De-crease.

Total, . . .	2,891	1,936	955	2,138	1,378	760	5,029	3,314	1,715

PRICES AND PAUPERISM.

The price of Messrs. Boland's (Limited) 4-lb. loaf throughout last quarter was 5½d., which was also the price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of 1896 the average price was 5d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 12s. 9d. per cwt., being 3d. under the average for the corresponding quarter of 1896. In the first quarter of 1887 the average price was 16s. 8d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 1s. 9d. to 3s. 3d. In the first quarter of 1896 the average prices were 1s. 5d. to 2s. 4d., and in the corresponding quarter of 1887 they were 2s. 11d. to 3s. 6d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 45s. 6d. to 56s. 6d. per cwt. In the corresponding quarter of 1896 the average prices were from 44s. to 55s., and in the first quarter of 1887 they were from 42s. 6d. to 52s. 6d.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 17s. to 18s. per ton.

The highest price of 2¼ per cent. Consols at the Dublin Stock Exchange for the quarter was £113½, and the lowest £111½. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland which was raised to 4½ per cent. on 22nd October, 1896, was reduced to 4 per cent. on 21st January last.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1897 was 45,164, or 1,019 over the average for the corresponding period in 1896.

The average weekly number of persons receiving out-door relief during the quarter was 56,353, being 471 over the average for the first quarter of 1896.

Of the persons receiving in-door relief during the first quarter of 1897, an average number of 1,441 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1896 the average weekly number was 1,416.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1897, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.

(a) Rolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ¼d. per 4lb. loaf lower.

(c) Messrs. Manders and Co.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the first quarter of the years 1892–97, respectively

* Latitude 53° 21' 44' 65" north; longitude 6° 21' 0' 35" west. Height above the sea 162·2 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (See Table on page 14):—

The mean height of the barometer during the first quarter of 1897 was 29·815 inches, against an average of 29·927 inches for the corresponding quarter of the five years 1892–96; the highest reading (30·578 inches) was on the 22nd February, at 9 P.M., wind W.S.W.; and the lowest (28·861 inches) on the 2nd March, at 9 P.M., wind N.N.W.

The mean temperature of the air during the quarter was 41·3°, or 1·0° over the average for the first quarter of the five years 1892–96. The maximum temperature was 60·2°, and the minimum 15·7°. The maximum heat in sun was 108·3°, and the minimum on the grass 10·9°.

Rain or snow fell on 67 days during the quarter. The rain-fall measured 7·635 inches, against an average of 6·338 inches for the first quarter of the five years 1892–96. The greatest monthly rainfall was in March, when 3·320 inches were registered.

The wind blew on 29 days from W., on 13 days each from S. and S.W., on 8 days each from N. and E., on 3 days from S.E., on 2 days from N.E., on 1 day from N.W., and the air was calm on 13 days at 9 A.M.

January.—The mean height of the barometer during this month was 29·914 inches; the highest reading (30·427 inches) was on the 1st, at 9 P.M., wind W.S.W.; and the lowest (29·305 inches) on the 30th, at 9 A.M., wind N.W. The mean temperature of the air was 36·2°, the maximum registered was 50·4°, and the minimum 15·7°. The 2nd was the warmest day, and the 17th the coldest night. The mean of the dry bulb was 35·7°, and of the wet bulb 34·4°. The maximum heat in sun was 86·3°, and the minimum on the grass 10·9°. The minimum on the grass was below 32° on 22 nights. The total amount of sunshine recorded was 72·2 hours, the greatest daily amount being 6·9 hours on the 27th. The maximum ozone was 1·0, the minimum ·1, and the mean ·5. Rain or snow fell on 21 days. The rain-fall measured 2·765 inches; the greatest amount in 24 hours was ·480 inch on the 6th.

February.—The mean height of the barometer during this month was 29·995 inches; the highest reading (30·578 inches) was on the 22nd, at 9 P.M., wind W.S.W.; and the lowest (29·215 inches) on the 1st, at 9 P.M., air calm. The mean temperature of the air was 44·0°, the maximum registered was 56·8°, and the minimum 29·7°. The 19th was the warmest day, and the 5th the coldest night. The mean of the dry bulb was 44·0°, and of the wet bulb 42·3°. The maximum heat in sun was 106·7°, and the minimum on the grass 18·8°. The total amount of sunshine recorded was 38·7 hours, the greatest daily amount being 8·4 hours on the 27th. The maximum ozone was ·9, the minimum ·1, and the mean ·5. Rain or snow fell on 19 days. The rain-fall measured 1·550 inches; the greatest amount in 24 hours was ·260 inch on the 2nd.

March.—The mean height of the barometer during this month was 29·537 inches; the highest reading (30·075 inches) was on the 7th, at 9 A.M., air calm; and the lowest (28·861 inches) on the 2nd, at 9 P.M., wind N.N.W. The mean temperature of the air was 43·6°, the maximum registered was 60·2°, and the minimum 21·7°. The 21st was the warmest day, and the 30th the coldest night. The mean of the dry bulb was 43·1°, and of the wet bulb 40·8°. The maximum heat in sun was 108·3°, and the minimum on the grass 14·1°. The minimum on the grass was below 32° on 14 nights. The total amount of sunshine recorded was 111·5 hours, the greatest daily amount being 9·0 hours on the 19th. The maximum ozone was 1·0, the minimum ·3, and the mean ·6. Rain or snow fell on 27 days. The rain-fall measured 3·320 inches; the greatest amount in 24 hours was ·895 inch on the 11th.

At this Station Greenwich mean time is kept, but at the other Stations Local time is observed. observations were taken only at 9 a.m.

corrected for instrumental error, and reduced to 32° Fahr. as before, but not reduced to mean sea level, and them to the normal, the approximate corrections for the purpose (varying within slight limits with the pressure and (City), +.058; Arley, Mount Nugent, +.251; Markree Castle, +.141; Armagh, +.224; Londonderry, +.090.

NOTE.—This table has been constructed for the years 1823 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-97—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91, to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years. The births, deaths, and emigration for the second quarter of 1897 have been estimated.

MARRIAGES Registered during the Quarter ending 31st December, 1896, in the PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st March, 1897; Deaths from SMALL-POX, MEASLES, SCARLET FEVER, TYPHUS, WHOOPING-COUGH, DIPHTHERIA, SIMPLE CONTINUED AND ILL-DEFINED FEVER, ENTERIC FEVER, DIARRHŒA, and CHOLERA; also VIOLENT DEATHS,* INQUEST CASES, and DEATHS in PUBLIC INSTITUTIONS, Registered during the Quarter ending 31st March, 1897, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS of IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

Provinces and Counties.	Area, in Statute Acres.	Popu- lation in 1891.	Marriages.		Births.		Deaths.												The Deaths registered during the Quarter are stated by the Registrars to include												Vaccination Return for the Quarter ending 31st March, 1897.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																		
			Averages in the Quarters ending 31st Dec., 1895- 10 years.	Registered in the Quarter ending 31st Dec., 1896.	Averages in the Quarters ending 31st Mar., 1897- 10 years.	Registered in the Quarter ending 31st Mar., 1897.	Averages in the Quarters ending 31st Mar., in the 10 years, 1887-96.	Registered in the Quarter ending 31st Mar., 1897.	Deaths of												Deaths in Public Insti- tutions.				Number of successful Primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons Ineligible of Vac- cination.	Number of Unsuc- cessful Children under 8 months old, whose deaths were registered during the Quarter.	Total of the foregoing.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																				
									Children under 1 year of age.	Persons aged 60 years and up- wards	Small-pox.	Measles.	Scarlatina.	Typhus.	Whooping-cough.	Diphtheria.	Simple continued fever.	Enteric Fever.	Dysentery.	Cholera.	Violence.*	Inquest Cases.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District or portion of District in the County.

I. PROVINCE OF LEINSTER.

Carlow County.

CARLOW; *Carlow, part of, W.*—Influenza prevailed very generally, and there was one case of typhus fever: this man has been removed to fever hospital, and his house, &c., disinfected and lime-washed. So far the disease has not extended.

Dublin County.

BALROTHERY; *Holmpatrick, W.*—Owing to the fact that scarlatina is in the district, vaccinations were postponed.

BALROTHERY; *Lusk.*—Scarlatina and influenza prevalent during quarter.

CELBRIDGE; *Lucan, part of.*—Measles of a light type is very prevalent.

DUBLIN NORTH; *Coolock and Drumcondra, No. 2.*—Vaccinations postponed owing to an epidemic of measles.

DUBLIN NORTH; *Finglas and Glasnevin.*—Measles has been very prevalent during quarter, but is now abating.

DUBLIN SOUTH; *Rathfarnham.*—Some vaccinations postponed, in consequence of epidemic of measles and whooping-cough.

DUBLIN SOUTH; *South City, No. 4.*—Measles, scarlatina, whooping-cough, enteric fever, and influenza, were epidemic during the winter, which was unusually long and trying; consequently the death-rate is high, deplorably so. The indifference which is exhibited to measles by rich and poor prevents proper precautions being taken to stop its spread. All these coming on the children of the poor, whose vitality was probably reduced by want of food and clothing during the strikes which recently existed, may in some manner account for the high death-rate.

DUBLIN SOUTH; *Tallaght.*—Vaccination postponed, owing to measles.

RATHDOWN; *Dundrum and Glencullen, No. 1.*—Measles very prevalent, also numerous cases of influenza.

RATHDOWN; *Kingstown, No. 1.*—Measles has been very prevalent here, so that a good many infants will be unfitted by this disease for vaccination.

Kildare County.

BALTINGLASS; *Baltinglass, part of.*—Three deaths from influenza took place in Baltinglass Workhouse.

CELBRIDGE; *Celbridge, W.*—Measles very prevalent.

CELBRIDGE; *Kilcock.*—Vaccination postponed owing to the severity of the weather and prevalence of measles in adjoining districts.

CELBRIDGE; *Lucan, part of.*—See note under head of Dublin county.

NAAS; *Rathmore.*—No vaccinations; measles and scarlet fever very prevalent, also typhoid.

Kilkenny County.

CASTLECOMER; *Castlecomer, W.*—The death of a woman aged 101 years was registered; she was a native of county Carlow, and lived in this district nearly 50 years.

NEW ROSS; *Dysartmoon.*—Continued wet weather prevented the children from being taken to dispensaries.

WATERFORD; *Kilmakellege.*—Owing to the cold weather, all vaccinations were postponed.

King's County.

EDENDERRY; *Rhode.*—Some cases of influenza, and one case of typhoid fever.

MOUNTMELICK; *Clonygowan, part of.*—There were a few cases of influenza.

PARSONSTOWN; *Banagher*.—Measles and whooping-cough are epidemic at present, but of a mild type.

PARSONSTOWN; *Kinnitty*.—There have been a few cases of influenza.

TULLAMORE; *Tullamore, W.*—Whooping-cough and influenza of mild type prevalent.

Longford County.

GRANARD; *Scrubby, part of*.—Pertussis (whooping-cough) was very prevalent in the Longford portion of district; also a number of cases of influenza of a mild type. Vaccination postponed on account of the severity of the weather.

LONGFORD; *Longford, W.*—Whooping-cough was very prevalent.

Louth County.

ARDEE; *Ardee, W.*—There is a great deal of sickness in district. Influenza, measles, whooping-cough, and odd cases of scarlatina.

DROGHEDA; *St. Mary's, part of*.—Epidemic influenza was very prevalent during the quarter.

DROGHEDA; *Termonfeckin*.—Influenza has been widely prevalent during the quarter. Vaccinations have been unavoidably postponed in consequence. The deaths of six persons have been registered, the average of whose ages represents 89 years; of these two are over 90 years and three over 80 years of age. In Clogher Head, a congested fishing village, the influenza epidemic has assumed, during the quarter, a very virulent type; hyperpyrexia with marked nervous prostration, cerebro-spinal and gastro-intestinal complications, &c., being quite usual, some of the catarrhal cases developing, during what ought to be the period of convalescence, into acute phthisis. The mortality of this village, owing to this epidemic, has been high; nearly half the deaths registered during last quarter being those of residents in Clogher Head who have succumbed to influenza or some one of its complications. Overcrowding in insanitary dwellings and the pressure of poverty, together with the malignant type the epidemic assumed, occurring in a congested village, with very imperfect sanitary surroundings, has had much to do with causing the high mortality. The village of Clogher Head has attained to an unenviable notoriety in consequence of this epidemic, and the poor fishermen, to add to their trials, have been quite unable to market their fish owing to the absurd fear of infection entertained by consumers.

DUNDALK; *Dromiskin*.—Vaccination postponed owing to weather.

DUNDALK; *Dundalk, W.*—Influenza and whooping-cough prevailed during the whole quarter. Three urban deaths from influenza and two rural. A peculiar form of influenza (?) has occurred amongst

children, characterized by incessant dry cough, prostration, excessively rapid breathing (in many cases over 100 per minute), lungs clear, little or no expectoration, slight rise in temperature. The disease is distinct from whooping-cough, in the character of the cough, and the constant excessively rapid breathing.

DUNDALK; *Louth, part of*.—Whooping-cough during this quarter very prevalent, also influenza with various complications; several cases of erysipelas of head and face came under notice; one case of scarlatina was removed from the Louth portion of the district to the union fever hospital. This was the only case, so far. All disinfecting precautions were carried out at the end of the quarter. A great many children with bronchitis (capillary and simple), carrying a high temperature, were affected. All the children in many dwellings were seized. The symptoms outside the bronchitis were severe, such as high temperature, rapid pulse, and great prostration. The attack presented many features of influenza, and seemed to be of an infectious nature; at present there are many families of children suffering from it.

Meath County.

ARDEE; *Drumcondra*.—A case of triplets in first week of quarter. Two died within 12 hours from birth; one survived 30 hours. Some scarlatina occurred through the quarter, no mortality, type mild; tonsillitis prevalent.

DROGHEDA; *St. Mary's, part of, W.*—See note under head of Louth county.

DROGHEDA; *Stamullen*.—With the exception of four cases of scarlatina of a mild type the district has been in a healthy state.

DUNSHAUGHLIN; *Killeen*.—In consequence of some cases of measles and scarlatina the medical officer deemed it advisable not to vaccinate during the quarter.

KELLS; *Kilskeer*.—Vaccination postponed in all cases in consequence of the prevalence of measles during the quarter.

KELLS; *Moynalty, part of*.—Of the fifteen deaths in Meath portion of district, 10 were over 60 years of age, viz., one at 102, three over 70, four over 80, and two over 90 years of age. Of three deaths in Cavan portion, one was over 80, and one over 70 years of age.

NAVAN; *Navan, W.*—Measles, whooping-cough, and scarlet fever were prevalent during the quarter. There were also some cases of enteric fever.

NAVAN; *Painestown*.—A few cases of influenza, of a mild type.

OLDCASTLE; *Oldcastle, W.*—The health of the town and district is due more to "climateric" influences than to sanitation.

TRIM; *Innsfield*.—Measles of a very mild type is prevalent.

Queen's County.

CARLOW; *Carlow*, part of.—See note under head of Carlow county.

MOUNTMELICK; *Clonygowan*, part of.—See note under head of King's county.

MOUNTMELICK; *Emo*.—One death registered of a man aged 102 years.

MOUNTMELICK; *Mountmellick*, W.—Influenza has been prevalent and many of the cases complicated with bronchitis and catarrhal pneumonia.

Westmeath County.

BALLYMAHON; *Ballymore*.—Vaccinations postponed during the quarter owing to the inclemency of the weather.

DELVIN; *Delvin*, W.—Owing to very wet and stormy weather prevalent during greater part of quarter children were not brought for vaccination.

MULLINGAR; *Ballinacarrigy*.—Within the past month some cases of influenza have occurred, accompanied in elderly subjects by bronchitis and pneumonia. Vaccination difficult to carry out in consequence of the inclemency of the weather preventing children being taken out of their homes.

MULLINGAR; *Milltown*.—Only two cases of measles, of a very mild form.

MULLINGAR; *Mullingar*, W.—Scarlatina and measles prevailed throughout the district.

Wexford County.

ENNISCORTHY; *Ferns*.—No vaccination in consequence of unsuitable weather.

GOREY; *Coolgreany*.—Vaccinations were few, owing, I believe, to the inclemency of the weather.

GOREY; *Kilkenagh and Wells*.—Whooping-cough has been prevalent to some extent.

NEW ROSS; *Fethard*, No. 2.—The severity of the weather prevented any vaccinations during past quarter. Five out of twelve deaths registered averaged 85 years.

NEW ROSS; *New Ross*, W.—Influenza and pneumonia have been prevalent during March. A pure water supply is still badly needed for this town. New houses require to be built in many spaces for the labouring classes, as many of the old houses have fallen down. Sanitary accommodation is very deficient in many houses.

WEXFORD; *Taghmon and Glynn*.—For the last twenty years the death rate has never been so low. Of five deaths registered, one is that of a child of eleven days; the other deaths were aged respectively 87, 78, 76, and 70.

Wicklow County.

BALTINGLASS; *Baltinglass*, part of, W.—See note under head of Kildare county.

RATHDOWN; *Delgany*.—Deaths at advanced ages were respectively, two at 66, and one each at 65, 72, 81, and 86 years.

RATHDOWN; *Powerscourt*.—A mild type of German measles in two townlands.

RATHDRUM; *Dunganstown*.—Owing to the severe weather and prevalence of influenza there were no vaccinations.

RATHDRUM; *Newcastle*.—Influenza and its usual chest complications has been very prevalent during the quarter, especially among children and the aged. The case of small-pox reported by me last quarter is now convalescent. No other case occurred. The house has been thoroughly disinfected, papered and painted. Vaccination much below the average, owing to non-compliance with the Vaccination Act. The deaths of those registered above 60 years are as follows:—Two at 75 and 83 each, and one each at 60, 63, 66, 68, 72, 78, 82, 85, and 87 years.

II. PROVINCE OF MUNSTER.**Clare County.**

CORROFIN; *Corrofin*, W.—Influenza has been very prevalent.

ENNIS; *Newmarket*.—With the exception of a few cases of influenza, the district has been free from all zymotic diseases.

KILLADYSERT; *Labasheeda*.—There is the death of a woman, whose age was stated to be 108 years. All her faculties were perfect up to within a few days of her death. She was very healthy during her life, married, and had a family.

KILRUSH; *Kilrush*, W.—Some scattered cases of influenza.

LIMERICK; *Bridgetown*.—The only thing of note is the number of deaths of old people.

Cork County.

BANTRY; *Durrus and Kilcrohane*.—An outbreak of measles for the past quarter; had to postpone all vaccination.

BANTRY; *Kealkill*.—Influenza prevalent.

CASTLETOWN; *Kilcatherine*.—Measles has now disappeared, and children are being brought for vaccination.

CLONAKILTY; *Clonakilty*, W.—The four deaths from typhus fever were all from the Timoleague district, one, an inmate of industrial school, is supposed to have taken the infection from relatives met outside the institution.

CLONAKILTY; *Timoleague*.—Vaccination postponed in consequence of measles and influenza.

CORK; Carrigaline, No. 1.—Vaccination which had been suspended during last quarter, in consequence of prevalence of whooping-cough, was resumed in February, and is now going on steadily.

CORK; Carrigaline, No. 2.—During the past month measles appeared in the district, and increased so as to assume the dimensions of an epidemic; as a rule the cases were of a favourable type, and no deaths occurred.

CORK; Carrignavar, No. 1.—Measles is prevalent at present.

CORK; Cork, No. 1.—Measles prevalent.

CORK; Cork, No. 9.—Two deaths due to influenza (one 80 and one 60 years); 6 deaths to pneumonia and bronchitis.

DUNMANWAY; Ballineen.—Did not vaccinate during the past three months, in consequence of an epidemic of measles, and the cold weather.

FERMOY; Ballynoe.—Eight cases of defaulters since Christmas report were postponed as they were delicate.

KANTURK; Kanturk, W.—Measles rather prevalent.

KANTURK; Milford.—Out of fifteen deaths recorded, seven were aged respectively, 73, 74, 75, 78, two 80, and one 97 years.

KILMALLOCK; Charleville, part of.—We had two deaths from croup last month.

KINSALE; Ballyfeard.—Influenza rather prevalent, complicated with bronchitis; no deaths from it.

KINSALE; Kinsale, W.—Four children died unvaccinated, whose ages were respectively, 15 months, 11 months, 7 months, and 5 months.

MACROOM; Inchigeelagh.—There had been an epidemic of pneumonia, preceded in many cases by well marked symptoms of influenza.

MACROOM; Slieveveagh.—Number of deaths registered is unusually large; it exceeds the number of births registered, an occurrence which has seldom if ever happened in the district.

MALLOW; Ballyclogh.—Owing to infantile diseases, such as mumps, influenza, and whooping-cough, vaccination was completely stopped, and the long continued severe weather was also a hindrance. The district has been particularly free otherwise from epidemics, but bronchial complaints naturally have been prevalent.

MALLOW; Rahan.—Influenza has been very prevalent; no further cases of scarlatina.

MIDDLETON; Cloyne.—The reason there were no vaccinations. It was on last month I was appointed Medical Officer and the weather was very inclement. I shall proceed at once and vaccinate all children over 2½ months.

MITCHELSTOWN; Kildorrery.—Chronic impetigo is prevalent, and prevented vaccination.

MITCHELSTOWN; Mitchelstown, part of, W.—Vaccination entirely postponed, owing to epidemics of mumps, scabies, chickenpox, and enteric fever.

SKIBBEREEN; Skibbereen, W.—Epidemic of measles has now practically disappeared. One death in hospital from hydrophobia.

SKIBBEREEN; Tullagh.—Epidemic of measles abating.

SKULL; Goleen.—There are a great many vaccination defaulters, whose names I have forwarded twice to the Guardians, having also notified themselves. The Guardians requested me not to urge on prosecutions until after March, as the weather was bad. Measles prevalent in eastern portion of district.

SKULL; Skull, W.—Owing to an epidemic of measles, very few children were vaccinated.

Kerry County.

CAHERSIVEEN; Emlagh.—Vaccinations postponed owing to severity of weather.

CAHERSIVEEN; Glanbehy.—Two died of influenza. There was no vaccination in consequence of the winter being so severe.

DINGLE; Anascaul.—Typhus fever, scarlatina, and mumps were prevalent. Vaccination was postponed in consequence.

KENMARE; Kenmare, W.—Of the eleven deaths registered seven have been at the following ages, 80, 85, 80, 70, 95, 81, and 79 years.

KENMARE; Tuosist.—One death of a man over 100 years; he was in full possession of his faculties to the last, and within a week of his death he walked over 12 miles. Some dozen cases of enteric fever in the Ardea district, so far no death.

KILLARNEY; Coom.—Vaccination was not performed owing to inclemency of season.

KILLARNEY; Killarney, No. 1, W.—No vaccinations in consequence of the continuous severe weather.

KILLARNEY; Milltown.—Influenza of a very severe type has appeared since Christmas.

LISTOWEL; Ballylongford.—Vaccination has been backward, owing, in a great measure, to severe weather.

LISTOWEL; Tarbert, No. 1, part of.—Influenza prevalent. Vaccination had to be postponed in consequence of the severity of the weather and influenza.

TRALEE; Castleisland.—Chest affections prevalent during the last month of the quarter.

TRALEE; Castlemaine.—The sanitary condition of the district is not satisfactory. The majority of the houses of the poor are small and overcrowded.

TRALEE; Tralee, No. 2.—There have been some cases of influenza, but not of a fatal sort, up to the present.

Limerick County.

CROOM; Croom, W.—Mumps prevalent, but of so light a type as not to require medical interference, unless in one case.

KILMALLOCK; Bruree.—Influenza with abdominal and pulmonary complications was prevalent.

KILMALLOCK; Charleville, part of.—See note under head of Cork county.

KILMALLOCK; Hospital.—Scarlatina prevalent.

LISTOWEL; Tarbert, No. 1, part of.—See note under head of Kerry county.

LISTOWEL; Tarbert, No. 2.—One death from scarlatina. I was aware of two other cases of scarlatina in district, the disease was of a mild form, and the children made a rapid recovery. Influenza also prevailed, but there was only one death arising therefrom. The disease has now disappeared.

MITCHELSTOWN; Mitchelstown, part of.—See note under head of Cork county.

NEWCASTLE; Ardagh.—The sanitary state of the district is pretty fair. Typhoid fever has occurred in the eastern part of Ardagh district for the past two months; all the cases were removed to hospital, and the houses disinfected.

NEWCASTLE; Newcastle, W.—Six and thirty cases of typhoid fever admitted into union fever hospital, chiefly from Ardagh district.

RATHKEALE; Pallaskerry.—There have been three deaths from enteric fever during the past fortnight.

RATHKEALE; Rathkeale, No. 1, W.—Typhoid fever prevalent in one end of district, all the cases removed to hospital, where the two deaths took place.

RATHKEALE; Shanagolden.—Mumps prevalent in locality, owing to that vaccination postponed. Scarlatina (of a mild type) has appeared in one townland in the western portion of district.

Tipperary County.

BORRISOKANE; CloghJordan.—The ages of some of the persons whose deaths were registered during the quarter were 74, 97, 83, 87, 72, 82, 81, 90, 76, 76, 80, and 70.

BORRISOKANE; Terryglass.—Whooping-cough prevalent, in consequence of which few children came to be vaccinated.

CALLAN; Mullinahone.—Some cases of influenza, not of a very severe type.

CASHEL; Killenale.—No vaccination performed, owing to cases of mild scarlatina turning up amongst the children; no death from the outbreak.

CLOGHEEN; Caher.—Two mild cases of scarlatina occurred.

CLONMEL; Clonmel, W.—A mild form of influenza.

NENAGH; Nenagh, W.—Measles made its appearance during the last fortnight.

NENAGH; Toomyvara.—One female child, aged four months, died from scarlatina.

PARSONSTOWN; Riverstown.—There was an epidemic of "English cholera," one case proved fatal—girl, aged 21 years.

THURLES; Thurles, W.—Influenza and whooping-cough very prevalent during quarter.

URLINGFORD; Kilcooly.—Though the sanitary arrangements of the district are good, yet we had a regular epidemic of typhoid, and one case of typhus. I noticed the disease attacked the rich as well as the poor. The district is now completely free of any zymotic disease, as I have not noticed a case for some time.

Waterford County.

CARRICK ON-SUIR; Rathgormuck.—A few cases of influenza have come under notice, but were rather of a mild type. I have also had under treatment some cases of parotitis (mumps), which were likewise of a mild nature. There has been a slight falling off in the attendance of children to be vaccinated, which I attribute to the severity of the weather, the people in some cases having to bring them long distances on foot.

CLONMEL; Ballymacarbry.—Of the deaths registered one was 77, one 74, one 73, and one 71 years respectively.

DUNGARVAN; Dungarvan, W.—Vaccination was backward, owing to epidemic of whooping-cough.

DUNGARVAN; Seskinan.—Vaccination postponed, owing to the severity of the weather.

KILMACKTHOMAS; Kilmackthomas, W.—The mortality during quarter just ended is the largest since quarter ended 31st March, 1894, when there were forty-seven deaths registered. One death occurred from typhus from the adjoining district, but died in workhouse hospital, and one which died of dysenteric diarrhoea in the previous quarter, but registered in this. Vaccination well attended to.

LISMORE; Ballyduff.—Whooping-cough somewhat prevalent.

LISMORE; Tallow.—Whooping-cough was very prevalent, in consequence of which I suspended vaccinations.

WATERFORD; Woodstown.—Influenza has been very prevalent in Passage East, but few people, out of a population of 800, escaping. Gastric symptoms marked in most cases.

YOUGHAL; Clashmore.—Influenza was prevalent throughout the quarter.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; Doagh.—The epidemic of measles has abated. Influenza has been and still is very rife in the district.

ANTRIM; Randalstown.—Influenza prevalent. Some mild cases of scarlatina in the earlier months of the quarter; no deaths therefrom.

ANTRIM; Templepatrick.—There were a great many cases of influenza; two deaths were registered from this cause.

BALLYCASTLE; Ballycastle, W.—Influenza very prevalent during first two months of quarter.

BALLYCASTLE; Croagh.—Owing to the rough, cold weather the children were not brought out for vaccination, but I have to attend at two stations during the month of April, when I expect to vaccinate them all.

BALLYCASTLE; Cushendall.—Vaccination postponed owing to severity of weather, and prevalence of influenza and whooping-cough.

BALLYMENA; Clogh.—There were a large number of cases of influenza, from which there were only two deaths.

BALLYMENA; Galgorm.—The death-rate has been very high. Influenza was epidemic, which caused deaths from chest diseases, chiefly among the aged.

BALLYMENA; Toome.—Some cases of influenza and a few mild cases of scarlatina. Both diseases now disappearing. Mortality among aged persons very high.

BALLYMONEY; Ballymoney, W.—Influenza was very rife.

BALLYMONEY; Dervock.—Influenza prevalent to a great extent in January and February, complicated in many cases with pneumonia and bronchitis.

BELFAST; Belfast, No. 8.—There has been a number of isolated cases of influenza.

BELFAST; Belfast, No. 9.—Whooping-cough has been prevalent during the latter half of the past quarter.

LARNE; Ballycarry.—Measles very prevalent; bronchial affections troublesome.

LARNE; Carrickfergus.—Whooping-cough and measles prevalent.

LARNE; Waterfoot.—Vaccination postponed, owing to prevalence of whooping-cough.

LISBURN; Glenavy.—No epidemic in the district, but diphtheria on the borders. The death of a woman at the well-authenticated age of 108 occurred during the quarter. She was baptized, according to the parish records, in March, 1788.

LISBURN; Lisburn, part of, W.—One death occurred from hydrophobia in the county infirmary on 25th February. The patient was admitted from the Aghalee dispensary district, in the Lurgan Union (reported at time). Of the thirty-five deaths registered of persons 60 years of age and upwards, one was 80 years, one 82, one 84, one 87, one 89, and one 91 years of age. Of the deaths registered 21 were of children under 1 year of age, which is a very high percentage. Two deaths from influenza, viz.,—one in urban, and one in rural district. [See next note.]

LURGAN; Aghalee.—Influenza prevalent. One child got bitten by a dog in November last. I cauterized the wound, not having any proof of the animal being rabid; her friends remained satisfied; however three months later, hydrophobia set in, and I sent the child to Lisburn infirmary, where she died from the disease. [See note for Lisburn district.]

Armagh County.

ARMAGH; Blackwatertown.—Influenza has been epidemic, and although the cases were not so numerous as in some of the preceding years, yet the type was severe. Nine deaths have been registered as due either directly or indirectly to it.

ARMAGH; Keady.—Measles, whooping-cough, and mumps have been prevalent.

ARMAGH; Markethill.—Whooping-cough and mumps have been epidemic during the last two months of the quarter. A great many persons over 60 years of age died in the last month (March). Chest affections were very prevalent. Influenza appeared during the last month, but not of a severe kind.

CASTLEBLAXNEY; Newtownhamilton, part of.—An outbreak of pertussis (whooping-cough) prevalent during the first two months of the quarter is accountable for the small number of vaccinations done.

LURGAN; Lurgan, No. 2.—Vaccination postponed owing to measles and influenza.

NEWRY; Forkill.—One case each of enteric fever and scarlatina, both fatal. Whooping-cough generally prevalent. Vaccination postponed in a great number of cases.

NEWRY; Meigh.—A few cases of influenza.

NEWRY; Mullaghglass.—Whooping-cough of a mild form very prevalent and widespread, two deaths from this cause.

complicated with bronchitis. A few cases of measles in one division of district, not of a severe type, also six cases of enteric fever, no death.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—Whooping-cough was very prevalent amongst the children.

BAWNBOY; *Ballyconnell, W.*—Several cases of typhoid fever; no fresh case for the last month reported. There is at present an epidemic of a mild form of influenza in the district. Few cases of vaccination owing to very severe weather.

BAWNBOY; *Swanlinbar.*—During the past month (March) there has been a great amount of influenza and ill-defined fever.

CAVAN; *Ballyhaise.*—Owing to the prevalence of scarlatina and measles vaccination had to be generally postponed.

CAVAN; *Bellananagh.*—Four cases of diphtheria occurred in one district during the quarter. Three of the cases were successfully treated with anti-diphtheritic serum. There was a widespread epidemic of whooping-cough. Measles and scarlatina were also prevalent.

CAVAN; *Cavan, W.*—Vaccination postponed in all cases owing to an epidemic of measles. There have been a few cases of scarlatina.

CAVAN; *Killeshandra.*—One death from diphtheria consequent on scarlatina maligna in a child two years old was registered. Scarlatina has been prevalent throughout the district in more or less sporadic cases, and influenza and diseases of respiratory organs have been prevalent.

COOTEHILL; *Drum, part of.*—Scarlatina of a mild form prevalent during the quarter. No fatal cases.

ENNISKILLEN; *Holywell, part of.*—Influenza, measles and mumps are prevalent, which accounts for the small amount of primary vaccination performed.

GRANARD; *Scrubby, part of.*—See note under head of Longford county.

KELLS; *Moynalty, part of.*—See note under head of Meath county.

OLDCASTLE; *Ballyjamesduff.*—Vaccination is not up to the usual number, owing I believe to the severity of the weather, and a catarrhal bronchitis which has been prevalent among children.

OLDCASTLE; *Virginia.*—A few cases of scarlatina occurred, but no deaths resulted.

Donegal County.

BALLYSHANNON; *Ballintra.*—Influenza has been rather prevalent. Water-supply, as usual, almost none.

DONEGAL; *Dunkineely.*—Several cases of influenza during March.

DONEGAL; *Laghy.*—No vaccinations owing to inclemency of the season and influenza.

DONEGAL; *Pettigoe.*—Influenza and diseases of the respiratory organs prevalent.

DUNFANAGHY; *Crossroads.*—Of twenty-eight deaths, eleven were of persons whose ages ranged from 72 to 96 years. Influenza prevalent of a mild form. Vaccination under the average owing to influenza and severe weather.

DUNFANAGHY; *Dunfanaghy, W.*—Influenza has been prevalent during the quarter, and a few cases of scarlatina have made their appearance during the last month.

GLENTIES; *Ardara.*—The death of a man was registered at 100 years of age.

GLENTIES; *Carrick.*—Some few cases of typhoid fever. Influenza very prevalent.

GLENTIES; *Dunglow, No. 1.*—Influenza prevalent.

GLENTIES; *Dunglow, No. 2.*—Influenza is epidemic in district. Whooping-cough and measles have disappeared.

GLENTIES; *Killybegs.*—There were eighteen cases of measles during the quarter, all confined to St. Columba's Industrial School. No deaths occurred. The disease was brought from a distance by an inmate coming to the institution.

INISHOWEN; *Buncrana.*—Vaccination had to be postponed in a number of cases owing to the prevalence of influenza.

INISHOWEN; *Moville.*—Influenza and German measles were very prevalent, and there are a great many cases of both diseases existing yet, particularly influenza. Several deaths of old people have been registered from same cause.

LETTERKENNY; *Church Hill.*—Of the deaths registered one was 93, one 89, two 85, two 84, one 83, one 82, and three 80 years of age.

LONDONDERRY; *Burt.*—A number of cases of influenza, and there were a good many bad complications after it, chiefly congestion of the bases of the lungs.

LONDONDERRY; *Kilderry, part of.*—There has been a severe epidemic of influenza followed in a large number of cases by pneumonia. Two cases of diphtheria occurred in Muff village.

LONDONDERRY; *Killea.*—Number of primary vaccinations not up to the average, owing to the prevalence of influenza and scarlatina.

MILLFORD; *Fanad.*—There has been a very severe epidemic of influenza which has been the cause of a very high mortality, but chiefly of people of 60 years or upwards.

This epidemic and the bad weather have caused the performance of vaccination to have been badly attended to. There has also been a couple of cases of typhoid fever, but it does not appear to be spreading.

MILLFORD; *Kilmacrenan and Millford, W.*—One death registered at the age of 102 years.

MILLFORD; *Rathmullan.*—Influenza has been prevalent during quarter.

STRABANE; *Raphoe.*—Severe epidemic of influenza, from which two deaths were registered; also epidemic of scarlatina and measles, but no deaths registered therefrom.

STRANORLAR; *Cloghan.*—Two of the deaths registered were at the advanced age of 92 and 94 years respectively.

Down County.

BANBRIDGE; *Ballyward.*—Whooping-cough of a mild type very prevalent.

BANBRIDGE; *Dromore.*—Influenza has been very prevalent all over the district during the quarter, causing several deaths by its complications, and considerably retarding vaccination. The disease is now rather on the decline, but is leaving many pains and penalties behind it.

BANBRIDGE; *Loughbrickland.*—Influenza has been rather prevalent in the latter half of the quarter.

BELFAST; *Castlereagh, No. 1.*—Whooping-cough becoming prevalent.

DOWNPATRICK; *Ballynahinch.*—Some isolated families have had whooping-cough.

DOWNPATRICK; *Downpatrick, W.*—Six deaths were registered from influenza, and one from dysentery. There has been an extensive epidemic of scarlatina of a mild type, and a few cases of measles, but no deaths from either malady.

DOWNPATRICK; *Killough.*—Of the thirty-one deaths registered, twenty were of persons aged 60 years and upwards, there being three over 90, and twelve others over 70. Scarlet fever seems to be dying out.

DOWNPATRICK; *Killyleagh.*—During the past quarter there have been a good many cases of bronchitis, pneumonia and pleurisy. Young children have suffered from bronchitis a good deal, and consequently vaccination has been postponed in more cases than usual. There is still influenza.

DOWNPATRICK; *Strangford.*—Scarlatina of a very mild type has been prevalent during the quarter. There has also been an epidemic of whooping-cough.

KILKEEL; *Kilkeel, No. 2, W.*—Two cases of typhoid fever from bad water.

KILKEEL; *Rostrevor.*—Scarlatina in a mild form prevailed during the quarter.

LISBURN; *Ballyleason.*—Influenza has been universal throughout the district during past winter, and three deaths from pneumonia are registered. Scarlatina has been of an unusually malignant type.

LISBURN; *Lisburn, part of.*—See note under head of Antrim County.

LISBURN; *Saintfield.*—Bronchial catarrh of a mild kind has been pretty common amongst children, and a few cases of influenza in adults.

LURGAN; *Moir.*—The birth and death rate have been both high during the past quarter, especially the latter. I think it is the largest number of deaths I have ever registered in one quarter during my time (21 years past) of office. There has been a great deal of sickness, influenza, bronchitis, in the beginning of the year, and pneumonia later on. Ordinary "colds" of a severe type have been prevalent, which has meant the onset of phthisis in more than one delicate subject. A child bitten by a rabid dog in an adjoining district, and not sent to Paris, died of hydrophobia.

LURGAN; *Waringstown.*—In one portion of the district there was an epidemic of measles. In another portion there have been a good many cases of diphtheria. Influenza is now prevalent and spreading. One death is registered from it, of a child of two months old, but the case is uncertified, as no medical man saw it.

NEWRY; *Rathfriland.*—Whooping-cough prevalent. Scarlatina in the country parts. Town healthy.

NEWTOWNARDS; *Comber.*—Measles was prevalent in some parts, and influenza was very prevalent since Christmas.

NEWTOWNARDS; *Greyabbey.*—Two deaths recorded from diphtheria, one in Ballywalter, no trace of origin, sanitary condition of dwelling fairly good. Disinfection as prescribed by Local Government Board fully carried out. The other case in Greyabbey, origin not known. Offensive smell from bedroom as if from subsoil gas. No village sewerage. County drain opposite house blocked up for some time and footpath flooded therefrom in close proximity to dwelling.

NEWTOWNARDS; *Kilmood.*—Measles, German measles, and influenza prevalent during the quarter. Two deaths from influenza.

NEWTOWNARDS; *Newtownards, W.*—There has been a good deal of bronchial catarrh, scarlet fever, and whooping-cough during the past three months.

Fermanagh County.

BALLYSHANNON; *Belleek.*—Vaccination was postponed on account of severity of weather.

CLONES; Newtownbutler, part of.—There has been a good deal of scarlatina, so that I postponed several vaccinations.

ENNISKILLEN; Florencecourt.—One case of enteric fever occurred, which was removed to fever hospital and is getting on well. A death which took place from scarlet fever happened in a young man who had old-standing heart-disease, and succumbed to the disease in a few days.

ENNISKILLEN; Holywell, part of.—See note under head of Cavan county.

IRVINESTOWN; Clonelly.—Two cases of scarlatina, last on 9th March, no further cases since. One case of enteric fever, patient only a week in district when I saw him; disease probably contracted elsewhere. Influenza and diseases of respiratory organs prevalent.

IRVINESTOWN; Ederney.—The district has suffered severely from influenza and diarrhoea, but very few deaths occurred. Owing to this the vaccination return is not up to the average. Influenza is now abating.

LISNASKEA; Derrylin.—No vaccination owing to diphtheria existing in district.

LISNASKEA; Lisnaskea, W.—Whooping-cough and mumps were prevalent during quarter.

Londonderry County.

COLERAINE; Coleraine, W.—Influenza was very prevalent. Four deaths were caused by diphtheria, but the cases were isolated ones and there was no epidemic.

COLERAINE; Garvagh.—In the months of January and February we had the worst epidemic of influenza yet experienced, but it has entirely disappeared.

LIMAVADY; Ballykelly.—Influenza was prevalent during quarter, but no death is recorded from that disease.

LIMAVADY; Bellarena.—There have been many cases of influenza during the past quarter, affecting the patients in many ways. A few deaths are recorded from the results.

LIMAVADY; Feeny.—Influenza has been very prevalent during quarter.

LIMAVADY; Limavady, W.—One death from diphtheria, but disease did not spread. Deaths at extreme ages have been registered, viz., one at 80, one at 82, one at 83, two at 90, one at 92, one at 97, and one at 112 (a woman). I believe she was 112 at the time of her death. She had twenty children, only one of whom is now alive in Ireland. She enjoyed good health all her lifetime, worked as a washerwoman usually up until a few years since. She could walk about until a month before her death.

LONDONDERRY; Claudy.—A severe epidemic of influenza existed, scarcely a household escaping. Five deaths only were registered from this cause. Of thirty-three deaths registered eighteen are those of persons of 60 years and upwards, twelve were

70 years and upwards, ten were 80 years and upwards, and one was 93 years.

LONDONDERRY; City of Derry, No. 1.—There is practically no vaccination.

LONDONDERRY; Eglinton.—Influenza was very prevalent.

LONDONDERRY; Kilderry, part of.—See note under head of Donegal county.

MAGHERAFELT; Bellaghy.—The deaths are rather above the average, possibly owing to the prevalence of heavy rains during an unusually wet winter.

MAGHERAFELT; Draperstown.—The deaths are much over the average, but there are fifteen over 80 and six over 90 years. Influenza and complications were the cause of almost the whole mortality.

MAGHERAFELT; Maghera.—A great number of deaths from influenza and its sequelæ were registered.

MAGHERAFELT; Magherafelt, W.—Influenza of a severe type has been very prevalent, accompanied with lung and other complications.

MAGHERAFELT; Moneymore.—The death-rate has been very high, far in excess of the births, owing to the extreme prevalence during the first two months of the quarter of a very severe form of influenza, nearly always accompanied or followed by pneumonia, which proved fatal to a great many old people. The epidemic appears now to have passed away. Parents were afraid to expose their children, and very little vaccination was performed.

Monaghan County.

CASTLEBLAYNEY; Castleblayney, W.—The severity of the weather and the prevalence of infantile illness interfered with vaccination, but during the last week of March a large number of children have been vaccinated.

CASTLEBLAYNEY; Newtownhamilton, part of.—See note under head of Armagh county.

CLOGHER; Aghnacloy, part of.—Owing to whooping-cough and influenza there have been very few cases of vaccination.

CLONES; Newtownbutler, part of.—See note under head of Fermanagh county.

COOTEHILL; Drum, part of.—See note under head of Cavan County.

DUNDALK; Louth, part of.—See note under head of Louth county.

MONAGHAN; Monaghan, W.—There has been an epidemic of measles, but it has passed off.

Tyrone County.

CASTLEBERG; Castlederg, W.—Influenza most prevalent with pulmonary complications which increased mortality. Several cases of scarlatina of a mild type.

CASTLEBERG; Drumquin.—Influenza has prevailed here as an epidemic during latter part of quarter.

CLOGHER; Aughnacloy, part of.—See note under head of Monaghan county.

CLOGHER; Fivemiletown.—The majority of the deaths were among the aged; two having reached the age of 94 years. I believe the severity of the winter caused the deaths of so many old people. There were a great many cases of influenza, but no deaths. We had also a good deal of whooping-cough, but only two fatal cases.

COOKSTOWN; Cookstown, W.—There has been a severe epidemic of influenza, six deaths recorded from the disease. Owing to this epidemic vaccination was postponed and delayed.

COOKSTOWN; Pomeroy.—Owing to a severe epidemic of influenza there are very few cases of primary vaccination. The district is now fairly healthy with the exception of an occasional case of influenza.

COOKSTOWN; Stewartstown.—There were about five hundred cases of influenza. A great many deaths from complications.

DUNGANNON; Coal Island.—Influenza and complications very prevalent. Owing to this and inclemency of weather therefore the number of deaths was higher than usual, several of those registered being aged from 70 to 88 years, and one of a man aged 102 years.

OMAGH; Fintona.—Influenza with lung complications has been epidemic throughout district. The death-rate of persons over 60 years of age has been high.

OMAGH; Gortin.—I registered the death of an old woman aged 115 years. I visited her as a curiosity, and believe she was every hour of the age stated.

OMAGH; Omagh, No. 1, W.—Influenza has been very prevalent, on account of which vaccination is very much behind.

OMAGH; Omagh, No. 2.—Owing to an epidemic of influenza the death rate was exceptionally high.

STRABANE; Newtownstewart.—One death registered at 103 years of age.

STRABANE; Plum Bridge.—Owing to the severity of the winter and influenza deaths have been above the average.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; Killaan.—Influenza amongst children and adults very prevalent and of severe type, and frequently followed by pneumonia of an asthenic character.

BALLINASLOE; Kiltormer.—The severity of the weather has brought its usual results, viz., colds and bronchitis, the latter has been rather fatal to the aged. No contagious diseases exist, acute pneumonia has been prevalent, but now disappearing.

BALLINASLOE; Laurencetown.—Whooping-cough was prevalent in one part of the district, and in another scarlet-fever of a malignant type. There were no deaths from whooping-cough.

BALLINROBE; Cappaghduff, part of.—Epidemic of measles; could not give number as most of the children in both counties had it. Measles on the decline.

CLIFDEN; Inishbofin.—Of the deaths one was 87 years, and one 75 years.

CLIFDEN; Roundstone, No. 1.—One death from croup is registered, which was sporadic and uncertified. One of the deaths registered is that of a female aged 80 years.

GALWAY; Oranmore.—Of the deaths registered nine were respectively aged 88, 85, 81, 80, 81, 79, 72, 68, 64 years.

GALWAY; Turloughmore.—Some mild cases of influenza.

GLENNAMADDY; Williamstown.—Influenza made its appearance at the end of March and now threatens the district with a severe epidemic.

GORT; Kinvarra.—An epidemic of pertussis (whooping-cough) prevailed. Nearly all the children were affected, and this kept back the vaccination.

LOUGHREA; Athenry.—Five deaths aged respectively, 98, 98, 92, 90, and 90 years, have been registered.

LOUGHREA; Bullaun.—The deaths of seven persons at advanced ages were registered, they were respectively, 77, 76, 78, 80, 86, 91, and 96 years.

LOUGHREA; Woodford.—During the past two months influenza, in a rather severe form, has been very prevalent, but it has caused only one death so far.

LOUGHTEARD; Cloonbur, No. 1.—Measles has disappeared. No other zymotic disease prevails.

LOUGHTEARD; Lettermore.—There is at present an outbreak of whooping-cough, apparently of a mild form up to this time. Vaccination had to be postponed owing to it.

TUAM; Headford.—Owing to the inclemency of the weather, vaccination had to be postponed.

TUAM; Tuam, No. 1, W.—No vaccination in consequence of the severe winter.

Leitrim County.

BALLYSHANNON; Kinlough.—The death of an old woman has been registered at the remarkable age of 95 years.

BAWNBOY; Ballinamore.—Scarlatina appeared in three or four different houses, about same time.

MANORHAMILTON; Lurganboy.—Influenza of a very severe type has been prevalent.

MANORHAMILTON; Manorhamilton, W.—Measles has been very prevalent.

MOHILL; Carrigallen.—Influenza was very prevalent during the quarter as well as whooping-cough, seven deaths were registered from the latter; none of the cases were medically attended; all those who were so attended recovered.

MOHILL; Mohill, W.—Whooping-cough prevalent. Vaccination postponed in consequence, also from the inclemency of the season.

Mayo County.

BALLINROBE; Cappaghduff, part of.—See note under head of Galway county.

BALLINROBE; Cong.—Measles of a mild type prevailed in parts of the district. Twelve of the fourteen deaths registered were over 60 years, one having reached 99 years, four over 80, and six over 70 years.

BALLINROBE; Hollymount.—Owing to prevalence of catarrhal affections in young children there were very few vaccinations.

BELMULLET; Binghamstown, W.—About twelve cases of typhus fever occurred, and seven of gastric fever. At present a severe epidemic of influenza exists; vaccination had to be postponed in consequence, and also the very severe weather. Of the twenty-three deaths that occurred, seventeen were on an average of 75 years.

CASTLEBAR; Castlebar, No. 1, W.—One case of hydrophobia; an inquest was held, and a verdict of death from hydrophobia was returned.

CLAREMORRIS; Ballyhaunis.—There were three cases of scarlet fever, one of which proved fatal. The disease has disappeared for some weeks past.

SWINEFORD; Kilkelly.—Owing to the inclemency of the weather and the long distances the vaccination has not been up to the average.

WESTPORT; Achill.—An epidemic of febricula and a few cases of scarlatina, in consequence of which all vaccinations had to be postponed. A few cases of febricula still prevail.

WESTPORT; Ballycroy.—This quarter was excessively bad with rain and storms of the worst form, so that I could not think of asking children to come up for vaccination. Influenza raged over the district and left several patients prostrate for a long time.

Roscommon County.

BALLINASLOE; Creagh.—Vaccination in a backward state owing to inclemency of the weather.

BOYLE; Boyle, part of, W.—Influenza of a mild type has been prevalent.

STROKESTOWN; Strokestown, W.—There has been a severe epidemic of influenza during the quarter. Vaccination had to be postponed owing to severity of the weather.

Sligo County.

BOYLE; Boyle, part of.—See note under head of Roscommon county.

SLIGO; Ballymote.—Influenza and bronchitis prevalent.

SLIGO; Carney, No. 1.—Vaccination postponed owing to measles and pertussis (whooping-cough).

SLIGO; Carney, No. 2.—A severe epidemic of measles was raging here during the first portion of the quarter. It was characterised by marked cerebral symptoms; chicken pox was also very prevalent. Vaccination backward owing to measles and severe weather.

SLIGO; Collooney.—Deaths of persons of the following ages, 98, 90, 89, 86, 84, 84, 78, 77 years, were registered. One case of typhoid, several scarlatina, and a good number of chicken pox.

TOBERCURREY; Tobercurrey, W.—There were four cases of scarlatina in one family, two of which ended fatally.

1897.]
2nd Quarter.

QUARTERLY RETURN OF THE MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS OR
SUPERINTENDENT REGISTRARS' DISTRICTS, AND
REGISTRARS' DISTRICTS IN IRELAND;

Marriages—JAN., FEB., MAR., 1897. **Births & Deaths**—APRIL, MAY, JUNE, 1897.

*General Register Office, Charlemont House,
Dublin, 30th July, 1897.*

During the quarter ended 30th June last, there were registered in the 801 Registrars' Districts in Ireland 27,470 births—a number equal to an annual birth-rate of 24.1 in every 1,000 of the estimated population—and 21,78 deaths, representing an annual rate of 19.1 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 16,104 persons emigrated. A decrease of 10,414 would, therefore, appear to have taken place in the population during the quarter. The population estimated to the middle of this year is 4,551,631*.

In England last quarter, the birth-rate represented was 29.2 in every 1,000 of the estimated population, and the death-rate 16.2 per 1,000.

The birth-rate in Ireland for the quarter is 0.2 under the average rate for the corresponding quarter of the last ten years and 0.6 under the rate for the second quarter of the year 1896. The deaths are over those registered in the corresponding quarter of 1896 to the extent of 2,619; the death-rate is 2.2 over the rate for that quarter, and 0.5 over the average for the second quarter of the last ten years.

Compared with those for the corresponding quarter of 1896, the returns of pauperism, furnished by the Local Government Board, show an increase of 1,033 in the average number of Workhouse inmates on Saturdays during the quarter, and an increase of 1,292 in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years 1887–96 the number of Workhouse inmates shows a decrease of 457

* See page 105.

or 1.1 per cent., and the number of persons on out-door relief a decrease of 5,680, or 9.2 per cent. The estimated decrease in the population as compared with the average population for those years is 2.8 per cent.

The annual marriage-rate (6.7 per 1,000 of the population) represented by the marriages registered during the first quarter of 1897 is 0.8 over the average rate for the corresponding quarter of the ten years 1887-96.

TABLE I.—Showing for each **Province** and **County** in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of **Marriages** registered during the quarter ended 31st March, 1897, and by the **Births** and **Deaths** registered in the Quarter ended 30th June, 1897.

MARRIAGES.

The marriages (7,578) registered in Ireland during the first quarter of 1897 are equivalent to an annual rate of 6.7 per 1,000 of the estimated population, being 0.4 over the rate for the corresponding quarter of 1896, and 0.8 over the average rate for the first quarter of the ten years 1887-96. Of the total marriages 6,150 were registered under the provisions of the 26 & 27 Vic., cap. 90, and 1,428 under the 7 & 8 Vic., cap. 81; the former number being equal to 7.2 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 5.1 per 1,000 of the members of all other religious persuasions. Compared with the averages for the first quarter of the last ten years the rate for Roman Catholic marriages shows an increase of 1.1, and that for all other marriages a decrease of 0.2. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while, as regard other marriages, there is generally but little difference in the numbers registered in the several quarters.

* The rates for the total of Ireland are calculated on the estimated population in the middle of the year; those for the provinces and counties on the population according to the Census of 1891.

TABLE II.—Showing by Quarterly Periods, the Marriages registered in Ireland in each of the ten years 1887–96, and the first quarter of 1897.

BIRTHS.

The number of births registered during the quarter ended 30th June last was 27,470—14,040 boys and 13,430 girls—being equal to an annual ratio of 1 in every 41.4, or 24.1 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1887–96 was 28,410, equivalent to an annual rate of 24.3 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23.1 per 1,000 of the population, according to the Census of 1891; Munster, 22.3; Ulster, 25.8; and Connaught, 20.0.

The highest county birth-rate* is 32.1 for Antrim, and the lowest 16.9 for Roscommon. Of the intermediate rates the highest five are—Down, 31.1; Dublin, 27.3; Armagh, 24.0; Galway, 23.7; and Kerry, 23.7; and the lowest five are—Mayo, 17.9; Meath, 18.0; Monaghan, 18.3; Cavan, 18.9; and Carlow, 19.3.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 21,780—11,002 males and 10,778 females—affording an annual ratio of 1 in every 52.2, or 19.1 per 1,000 of the estimated population: the average rate for the corresponding quarter of the ten years 1887–96 was 18.6 per 1,000.

The death-rate in Leinster was 20.6 per 1,000 of the population according to the Census of 1891; in Munster, 16.3; in Ulster, 19.5; and in Connaught, 16.5.

The county death-rates* range from 13.6 in Kerry to 25.5 in Dublin. Between these rates the lowest five are—Clare, 14.8; Cavan, 15.0; Queen's, 15.5; Roscommon, 15.6; and Mayo, 15.8; and the highest five are—Antrim, 21.9; Westmeath, 21.6; Down, 20.7; Armagh, 19.7; and Wexford, 19.4.

* See note on foregoing page.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1887–96, and the average number for that period; also the number registered in the first and second quarters of the year 1897:—

Average, 1887–96,	23.9	24.3	22.3	21.3	22.9	22.1	18.6	14.7	16.9	18.1
1897.	24.7	24.1				22.9	19.1			

Ages.—Of the 21,780 deaths registered last quarter, 2,822, or 13.0 per cent., were of children under 1 year old; and 8,982, or 41.2 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 102.7 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 14.5 per cent. of the total deaths registered therein; in Munster, 12.2 per cent.; in Ulster, 13.1 per cent.; and in Connaught, 10.6 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 35.4 per cent.; in Munster to 44.5 per cent.; in Ulster to 39.8 per cent.; and in Connaught to 51.8 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

As already stated, the general death-rate in Ireland last quarter was slightly in excess of the average for the June quarter of the last ten years. The rate represented by the deaths from the principal zymotic diseases also is over the average for the second quarter, a result due to a heavy mortality from some of these diseases in a limited number of districts. Enteric fever proved very fatal in Belfast, as did measles and whooping-cough in the Dublin Registration District; but in the latter area the mortality from measles and whooping-cough showed a very marked decline as compared with the number of deaths from these diseases in the first quarter of this year.

Diseases.—The total number of deaths from the principal zymotic diseases* registered during last quarter is 1,328, equivalent to an annual rate of 1.2 per 1,000 living, being 0.4 under the rate for the preceding three months, 0.2 over that for the second quarter of last year, and 0.1 in excess of the average rate for the second quarter of the ten years 1887–96.

* See note (†) on page 97.

Small-pox.—No deaths from small-pox were registered during the quarter, nor do the Registrars' Notes contain any reference to the occurrence of any case of the disease.

Measles.—Deaths from measles which, owing mainly to the prevalence of the disease in the Dublin Registration District, had risen from 153 for the fourth quarter of 1896 to 621 for the first quarter of this year, fell last quarter to 281, or 49 under the average for the corresponding quarter of the last five years. In Belfast Union or Superintendent Registrar's District there were 40 deaths from this cause; in Cork Union, 26; in Dublin North Union, 53 (including 11—equal to an annual rate of 5·7 per 1,000 of the population—in Blanchardstown and Castleknock District); in Dublin South Union, 57; in Larne Union, 11 (including 7—equal to an annual rate of 3·1 per 1,000—in Carrickfergus District); in Nenagh Union, 8 (equivalent to an annual rate of 1·2 per 1,000); in Rathdown Union, 24, a number equal to an annual rate of 1·7 per 1,000; in Ballinrobe Union, 5; in Mullingar Union, 5; and in Westport Union, 6. Thus in the ten Unions here named 235 of the 281 deaths from measles in Ireland occurred. In 126 Unions no deaths from the disease were registered. The total number for the province of Leinster is 147; for Munster, 46; for Ulster, 69; and for Connaught, 19.

Scarlatina.—The mortality from scarlatina was below the average, the number of deaths being 113, or 16 under the average for the second quarter of the last five years, and 41 under the number for the first quarter of this year. In only 5 Unions were there 5 or more deaths from this cause registered: these are—Belfast, 13 deaths; Clogher 5 (equal to an annual rate of 1·1 per 1,000 of the population); Dublin North, 11; Dublin South, 15; and Limerick, 7. The total number for Leinster is 41; for Munster, 20; for Ulster, 41; and for Connaught, 11.

Typhus.—The number of deaths from typhus registered is 37, being 3 over the low number for the corresponding quarter last year, but 25 under the average for the second quarter of the five years 1892–6. The highest number for any Union is 4, the number for Athlone and Castlebar respectively. The distribution according to provinces was—Leinster, 7; Munster, 7; Ulster, 8; and Connaught, 15.

Whooping-cough caused 426 deaths, being 165 or 63 per cent. in excess of the average for the corresponding quarter of the last five years, but 128 under the high number for the first quarter of this year. There are 22 Unions in each of which 5 or more deaths from whooping-cough were registered; these Unions include the following:—Belfast, 52 deaths; Clarendon, 13 (all of which were in Ballyhaunis District, where 13 deaths in a quarter are equal to an annual rate of 4·4 per 1,000 of the population); Clogher 9 (of which 6—equivalent to an annual rate of 4·9 per 1,000—were in Aughnacloy District); Cork, 26; Downpatrick, 19 (equal to an annual rate of 1·8 per 1,000); Dublin North, 25; Dublin South, 81, a number equivalent to an annual rate of 1·6 per 1,000; Galway, 9 (including 5—equal to an annual rate of 4·8 per 1,000—in Oranmore District); Granard, 8 (representing an annual rate of 1·2 per 1,000); Letterkenny, 5 (equal to an annual rate of 1·4 per 1,000); Longford, 18, a number equal to an annual rate of 2·9 per 1,000; Macroom 5, all of which were in Slieveveagh District, where 5 deaths in a quarter represent an annual rate of 4·8 per 1,000; Mountbellew 7 (all—equivalent to an annual rate of 4·9 per 1,000—in Killeroran District); Newry 14; and Oughterard 14, all of

which were in Lettermore District, where 14 deaths in a quarter represent an annual rate of 6·8 per 1,000 of the population. The total number for the province of Leinster is 161; for Munster, 51; for Ulster, 151; and for Connaught, 63.

Diphtheria.—The number of deaths from diphtheria registered is 61, being 5 below the average for the corresponding quarter of the last five years, and 28 under the number for the first quarter of this year. The three Unions of Belfast (8 deaths), Cork (7 deaths), and Dublin South (29 deaths), furnish 35, or more than one-half of the deaths from this disease. The remaining 26 deaths were distributed over nineteen Unions. No deaths from diphtheria were registered in Connaught: the respective numbers for the other provinces are:—Leinster, 31; Munster, 10; and Ulster, 20.

Simple continued and ill-defined Fever.—Thirty deaths were returned under this heading; this number is 4 over the low number for the preceding quarter, but 18 under the average for the second quarter of the last five years. Seven of the 30 deaths occurred in Leinster; 7 in Munster; 12 in Ulster; and 4 in Connaught.

Enteric Fever. There were 200 deaths from enteric fever, being 59 in excess of the average for the corresponding quarter of the last five years, and 38 over the number for the quarter ended the 31st March last. One-half of the total mortality from this disease occurred in the city of Belfast, where it caused 100 deaths, a number equal to an annual rate of 1·4 per 1,000 living. There were 5 deaths (equal to an annual rate of 1·2 per 1,000) from this cause in Carrickmacross Union; 5 in Dublin North Union; 8 in Dublin South Union; 6 in Newcastle Union; and 5 in Rathdown Union. The remaining 71 deaths were distributed over 40 Unions, and there are 114 Unions in which no deaths from enteric fever were registered. The total number for the province of Leinster is 29; for Munster, 24; for Ulster, 139 and for Connaught, 8.

Diarrhoea.—The mortality from diarrhoea was much below the average of the June quarter, the number of deaths being 171, which is 44 or 20 per cent. under the average for the second quarter of the last five years. Of the 171 deaths, 53 were in Leinster; 31 in Munster; 72 in Ulster; and 15 in Connaught.

Simple Cholera.—Nine deaths—7 in Leinster, one in Munster, and one in Ulster—were ascribed to this disease.

Hydrophobia.—One death from hydrophobia was registered—it occurred in the province of Ulster.

The Registrars, in their Notes, report the presence of the following diseases:—Measles in 34 districts, scarlatina in 35, whooping-cough in 34, diphtheria in 4, fever in 21 (typhus 4, simple continued and ill-defined fever 4, and enteric 13), influenza in 30, mumps in 3, and choleraic diarrhoea in 7.

Inquests.—There were 731 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 30 of the total deaths registered.

In Leinster there was 1 inquest to every 28 deaths registered, in Munster 1 to 28, in Ulster 1 to 27, and in Connaught 1 to 65.

Deaths in Public Institutions.—Of the 21,780 deaths registered, 3,379, or 15·5 per cent., occurred in public institutions. In Leinster the percentage was 22·4, in Munster 19·3, in Ulster 9·8, and in Connaught 10·4.

The following table (TABLE IV.) shows the number of deaths from the principal **zymotic** diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1897, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Zymotic Diseases.											Percentage of Total Deaths.	Number in every 100,000 of the population.

URBAN SANITARY DISTRICTS.

Separate statistics for the Urban Sanitary Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-fourth of the total population of the country, was 23.6, and the birth-rate 31.1 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the death-rate was 16.9 and the birth-rate 20.9 per 1,000.

The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Sanitary Districts during the quarter was 2.5 per 1,000 of the population, according to the Census of 1891: in the remainder of the country the rate was 0.7 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the SECOND QUARTER of the year 1897, in the DUBLIN REGISTRATION DISTRICT, and in each of the PROVINCIAL URBAN SANITARY DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—"The Dublin Registration District," which consists of the City of Dublin and its Suburban Districts, comprises the Urban Sanitary Districts of Dublin, Clontarf, Drumcondra, Clonliffe and Glasnevin, Kilmalmainham, Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the twenty-two Urban Sanitary Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the thirteen weeks ending Saturday, 3rd July, 1897.

† Small-pox, measles, scarlet fever, typhus, whooping-cough, diphtheria, simple continued and ill-defined fever, enteric fever, diarrhoea and simple cholera.

‡ The rates for Belfast have been calculated on the population estimated in the middle of the year 1897.

VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1897, there were 28,298 persons successfully vaccinated; in 2,892 cases the operation was postponed, and 29 children were reported as insusceptible of vaccination. The deaths of 1,705 unvaccinated children under 3 months old were registered during the quarter, making a total of 32,924 children with regard to whom particulars as to vaccination were ascertained.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th June last, was 16,104 (6,893 males and 9,211 females), being 3,959 less than in the corresponding quarter of the year 1896, and 13,522 under the average number for the second quarter of the ten years 1887-96.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June, in 1896 and 1897:—

MONTHS.	NUMBER OF EMIGRANTS.								
	Males.			Females.				Total.	
	1896.	1897.	De-crease.	1896.	1897.	In-crease.	De-crease.	1896.	1897.

May, . . .	3,872	2,635	1,237	4,638	3,553	—	1,085	8,510	6,188
June, . . .	1,236	1,207	29	1,449	1,472	23	—	2,685	2,679
Total, . .	9,393	6,893	2,500	10,670	9,211	—	1,459	20,063	16,104
									3,959

PRICES AND PAUPERISM.

The price of Messrs. Boland's (Limited) 4-lb. loaf throughout last quarter was $5\frac{1}{2}d.$, which was also the price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of 1896 the average price was $5d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was $12s. 9d.$ per cwt., being $3d.$ over the average for the corresponding quarter of 1896. In the second quarter of 1887 the average price was $15s. 2d.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were $2s. 4d.$ to $3s. 10d.$ In the second quarter of 1896 the average prices were $1s. 8d.$ to $2s. 5d.$, and in the corresponding quarter of 1887 they were $3s. 1d.$ to $3s. 10d.$

The average prices of beef at the Dublin Cattle Market during the quarter were from $46s.$ to $62s.$ per cwt. In the corresponding quarter of 1896 the average prices were from $43s.$ to $55s.$, and in the second quarter of 1887 they were from $45s.$ to $55s. 6d.$

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from $16s.$ to $17s.$ per ton.

The highest price of $2\frac{3}{4}$ per cent. Consols at the Dublin Stock Exchange for the quarter was $\pounds 113\frac{5}{8}$, and the lowest $\pounds 111\frac{1}{2}$. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland which was reduced to 4 per cent. on 21st January last, was further reduced to $3\frac{1}{2}$ per cent. on 1st April, and to 3 per cent. on 13th May.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1897 was 42,127 or 1,033 over the average for the corresponding period in 1896.

The average weekly number of persons receiving out-door relief during the quarter was 56,187 being 1,292 over the average for the second quarter of 1896.

Of the persons receiving in-door relief during the second quarter of 1897, an average number of 1,434 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1896 the average weekly number was 1,417.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD; OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1897, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.	
	BREAD (4 lb. Loaf.)		OATMEAL (Corn Exchange, per Cwt. 1st quality.	POTATOES (at Potato Market), per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.			NUMBER OF PERSONS RELIEVED

(a) Rolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

(c) Messrs. Manders and Co.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the second quarter of the years 1892–97, respectively,

* Latitude 53° 21' 44" 65" north; longitude 6° 21' 6" 35" west. Height above the sea 162·2 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (See Table on page-104):—

The mean height of the barometer during the second quarter of 1897 was 29·927 inches, against an average of 30·032 inches for the corresponding quarter of the five years 1892–96; the highest reading (30·451 inches) was on the 16th May, at 9 A.M., wind E.S.E.; and the lowest (29·219 inches) on the 28th May, at 9 P.M., wind S.

The mean temperature of the air during the quarter was 50·1°, or 1·4° under the average for the second quarter of the five years 1892–96. The maximum temperature was 74·8°, and the minimum 28·3°. The maximum heat in sun was 130·5°, and the minimum on the grass 20·7°.

Rain or snow fell on 58 days during the quarter. The rain-fall measured 6·775 inches, against an average of 5·729 inches for the second quarter of the five years 1892–96. The greatest monthly rainfall was in June, when 3·000 inches were registered.

The wind blew on 27 days from E., on 23 days from W., on 11 days from S.W., on 9 days from N., on 7 days from N.E., on 5 days from S.E., on 3 days each from S. and N.W., and the air was calm on 3 days at 9 A.M.

April.—The mean height of the barometer during this month was 29·804 inches; the highest reading (30·279 inches) was on the 10th, at 9 A.M., wind N.N.W.; and the lowest (29·261 inches) on the 1st, at 9 A.M., wind N.N.E. The mean temperature of the air was 44·5°, the maximum registered was 58·4°, and the minimum 28·3°. The 28th was the warmest day, and the 2nd and 8th the coldest nights. The mean of the dry bulb was 44·1°, and of the wet bulb 41·4°. The maximum heat in sun was 121·9°, and the minimum on the grass 20·7°. The minimum on the grass was below 32° on 9 nights. The total amount of sunshine recorded was 138·4 hours, the greatest daily amount being 13·0 hours on the 23rd. The maximum ozone was ·8, the minimum ·2, and the mean ·5. Rain or snow fell on 22 days. The rain-fall measured 2·670 inches; the greatest amount in 24 hours was ·420 inch on the 20th.

May.—The mean height of the barometer during this month was 29·970 inches; the highest reading (30·451 inches) was on the 16th, at 9 A.M., wind E.S.E.; and the lowest (29·219 inches) on the 28th, at 9 P.M., wind S. The mean temperature of the air was 48·4°, the maximum registered was 62·8°, and the minimum 33·1°. The 16th was the warmest day, and the 13th the coldest night. The mean of the dry bulb was 48·8°, and of the wet bulb 45·3°. The maximum heat in sun was 129·5°, and the minimum on the grass 26·8°. The minimum on the grass was below 32° on 14 nights. The total amount of sunshine recorded was 230·7 hours, the greatest daily amount being 14·9 hours on the 22nd. The maximum ozone was ·9, the minimum ·1, and the mean ·3. Rain fell on 15 days. The rain-fall measured 1·105 inches; the greatest amount in 24 hours was ·320 inch on the 6th.

June.—The mean height of the barometer during this month was 30·006 inches; the highest reading (30·223 inches) was on the 3rd, at 9 A.M., wind E.; and the lowest (29·458 inches) on the 18th, at 9 A.M., wind N.W. The mean temperature of the air was 57·3°, the maximum registered was 74·8°, and the minimum 37·3°. The 30th was the warmest day, and the 3rd the coldest night. The mean of the dry bulb was 56·8°, and of the wet bulb 54·2°. The maximum heat in sun was 130·5°, and the minimum on the grass 30·6°. The minimum on the grass was below 32° on 1 night. The total amount of sunshine recorded was 160·1 hours, the greatest daily amount being 15·0 hours on the 22nd. The maximum ozone was ·7, the minimum ·1, and the mean ·3. Rain fell on 21 days. The rain-fall measured 3·000 inches; the greatest amount in 24 hours was ·475 inch on the 19th.

TABLE VIII.—METEOROLOGICAL OBSERVATIONS taken at the under-
LONDON, during the SECOND QUARTER of the Year 1897,

1897.	Mean Pressure at 32 Degrees Fahrenheit.	AIR TEMPERATURE.										HUMIDITY.

* At Valencia cloud amount is observed at 10 a.m. and 10 p.m. each day, and rainfall at 10 a.m.

NOTE.—From the beginning of the year 1890 the mean pressures shown in these tables have been given therefore they are not directly comparable with each other. If it be desired for any purpose to reduce temperature are as follow:—Valencia +.080; Killarney, +.102; Parsonstown, +.191; Dublin

mentioned Seven IRISH STATIONS, in connexion with the METEOROLOGICAL OFFICE, kindly furnished by the METEOROLOGICAL COUNCIL.

NOTE.—This table has been constructed for the years 1823 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-97—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91 to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years.

MARRIAGES Registered during the Quarter ending 31st March, 1897, in the PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 30th June, 1897; Deaths from SMALL-POX, MEASLES, SCARLET FEVER, TYPHUS, WHOOPING-COUGH, DIPHTHERIA, SIMPLE CONTINUED AND ILL-DEFINED FEVER, ENTERIC FEVER, DIARRHEA, and CHOLERA; also VIOLENT DEATHS,* INQUEST CASES, and DEATHS IN PUBLIC INSTITUTIONS, Registered during the Quarter ending 30th June, 1897, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS of IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

Provinces and Counties.	Area, in Statute Acres.	Population in 1891.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrar to include													Vaccination Return for the Quarter ending 30th June, 1897.					Total of the foregoing.		
			Averages in the Quarter ending 31st Mar., 1897.	Averages in the 10 years, 1887-96.	Registered in the Quarter ending 30th June, 1897.	Averages in the 10 years, 1887-96.	Registered in the Quarter ending 30th June, 1897.	Averages in the 10 years, 1887-96.	Children under 1 year of age.	Persons aged 60 years and up-wards.	Small-pox.	Measles.	Scarlatina.	Typhus.	Whooping-cough.	Diphtheria.	Simple continued and ill-defined fever.	Enteric fever.	Diarrhoea.	Cholera.	Violence.*	Inquest Cases.	Deaths in Public Institutions.	Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons inasceptible of Vaccination.		Number of Unvaccinated Children under 5 months old, whose deaths were registered during the Quarter.

---	----------------------	-------	-----	---	---	---	---	---	---	---	---	---	---	---	---	---	---

* The Registrars' Districts (801 in number) are Subdivisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 119 and 120 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 4th April to 3rd July, 1897. With the exception of 77 deaths of persons from localities outside the "Dublin Registration District," the deaths in Public Institutions in these districts have been assigned to the respective districts from which the deceased were admitted.

The letter W denotes that the Registrar's District (or portion of a district) contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

ABSTRACT V.—REGISTRARS' DISTRICTS WHICH EXTEND INTO MORE THAN ONE COUNTY—continued.

[illegible]

[illegible]

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District or portion of District in the County.

I. PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Kiltegan, part of*.—During the latter part of May and the month of June there was an epidemic of "cholera nostras" throughout the entire district. With a few exceptions, however, the attacks were of a mild nature, and no deaths have been reported as having been due to it.

BALTINGLASS; *Rathvilly, part of*.—An epidemic of diarrhoea prevailed, accompanied in some cases by vomiting and cramps in legs, etc., followed by great prostration; temperature normal. One death registered from this disease, a child 2½ years.

CARLOW; *Carlow, part of, W*.—Scarlatina of a mild type was prevalent, but has now almost disappeared. Diarrhoea of a virulent type, accompanied by choleraic symptoms, prevailed during latter weeks of June.

ENNISCORTHY; *Newtownbarry, part of*.—Two persons aged above 90 years and three aged above 80 died. All deaths in county Carlow portion were above 60 years.

Dublin County.

BALROTHERY; *Holmpatrick, W*.—Scarlatina and measles are still in the district, hence the delay of vaccinations.

DUBLIN NORTH; *Coolock and Drumcondra, No. 2*.—Vaccination postponed owing to an epidemic of measles.

DUBLIN SOUTH; *Clondalkin*.—Whooping-cough of a mild type prevails, and odd cases of measles.

Kildare County.

BALTINGLASS; *Rathvilly, part of*.—See note under head of Carlow County.

EDENDERRY; *Carbury*.—One case of diphtheria, which was at once removed to fever hospital.

Kilkenny County.

CASTLECOMER; *Ballyragget*.—Two cases of enteric fever in the month of May. Two in June. Influenza with diarrhoea prevalent in May and June. Vaccination postponed owing to outbreak of influenza with diarrhoea.

CASTLECOMER; *Castlecomer, W*.—Bronchial affections were prevalent owing to the severity of the weather.

King's County.

MOUNTMELICK; *Clonygowan, part of*.—One case of scarlatina (sporadic).

TULLAMORE; *Clara*.—Measles of a mild type has developed, but is now on the decline; no death has taken place; precautions taken to prevent spreading.

TULLAMORE; *Kilbeggan, part of*.—Measles an epidemic.

TULLAMORE; *Philipstown*.—Vaccination was postponed owing to the prevalence of measles and whooping-cough. Whooping-cough is very prevalent, and has been fatal in one case owing to bronchial complications.

TULLAMORE; *Tullamore, W*.—Some influenza, which, under the influence of the cold weather in May, developed fatal pneumonia in many cases.

Longford County.

GRANARD; *Scrabby, part of*.—One death registered of a person aged 100 years, who died suddenly after getting up in the morning.

LONGFORD; *Drumlish*.—Whooping-cough and scarlatina prevalent, which prevented vaccination. Eleven cases of typhoid fever occurred, three of which were sent to the workhouse hospital, the others were treated at home; no deaths occurred from said disease.

Louth County.

DROGHEDA; Termonefckin.—Measles has been epidemic; vaccinations had to be postponed in some cases in consequence.

DUNDALK; Barronstown, part of.—There were several cases of typhoid fever in the beginning of the quarter. I had all the cases removed to the Dundalk Union Fever Hospital and the houses disinfected. There has been no recurrence of the disease. One of the cases died in hospital; the rest recovered.

DUNDALK; Louth, part of.—A second case of scarlatina occurred in Louth portion of district in same family as was notified in last quarter's return. Also seven fresh cases came under my notice, in the one family, in the Monaghan portion. These were at the height of the fever when called to attend; they all presented low aphthous throats, and as sequelæ, large cervical abscesses, one had otorrhœa. The single case that was above referred to was removed to hospital, but the latter family was treated at their own home; the dwelling was an isolated one; they all made a good recovery; all sanitary precautions were taken. I was called to attend a case of typhoid fever and found that 7 of the family had it; one case with complications died. I believe it was brought by a member of the family who lived in another district, and as they did not take any precautions, the other members caught the infection; when informed of the nature of their illness disinfection was attended to. This fever was in the Monaghan portion of district. An infectious form of diarrhœa seized another family, 4 in number, all being children; the temperature in all was very high; one member suffered from worms; they are all making a slow recovery. Sanitary precautions were put in operation in this dwelling also, and indeed they were required. This family reside in the Monaghan portion also.

DUNDALK; Ravensdale.—Whooping-cough of a mild type is prevalent. No fatal cases.

Meath County.

ARDEE; Drumcondra.—One death at 102 years registered; evidence thereof authentic; deceased not actually bed-ridden, but for past 10 years kept her bed, and was in perfect possession of her faculties.

EDENDERRY; Ballyboggan.—Scarlatina prevalent in first month of the quarter. Of the deaths registered one was over 90 years of age, one over 80, and three over 70 years.

NAVAN; Painestown.—A few cases of simple uncomplicated influenza showed up from time to time.

TRIM; Innfield.—During the latter part of April and the beginning of May the people of a portion of the district were attacked by English cholera. Some of the cases were very severely attacked, one in particular having all the stages well marked. No deaths occurred.

Queen's County.

CARLOW; Carlow, part of.—See note under head of Carlow County.

MOUNTMELICK; Clonygowan, part of.—See note under head of King's County.

MOUNTMELICK; Coolrain.—Diarrhœa prevalent during quarter.

Westmeath County.

ATHLONE; Athlone, No. 1, W.—Amongst the deaths registered there is that of a female aged 102 years, whose mental and bodily health was wonderfully good up to the day of her death.

BALLYMAHON; Ballymore.—Owing to an epidemic of measles and whooping-cough vaccination is backward.

MULLINGAR; Ballynacarrigy.—The district is fairly healthy. Four cases of scarlatina have occurred during the past week, the subjects of the disorder being children whose parents were at the Militia training in Mullingar, where the disease attacked them.

MULLINGAR; Killucan.—Three families (neighbours) were attacked with typhoid fever. There were a few cases of mild scarlatina, but the disease did not spread beyond three families.

MULLINGAR; Mullingar, W.—Measles was prevalent throughout the district.

TULLAMORE; Kilbeggan, part of.—See note under head of King's County.

Wexford County.

ENNISCORTHY; Newtownbarry, part of.—See note under head of Carlow County.

NEW ROSS; Fethard, No. 2.—Seven of the deaths registered averaged 70 years, and all the deaths registered were females.

Wicklow County.

BALTINGLASS; Kiltegan, part of.—See note under head of Carlow County.

RATHDOWN; Delgany.—One case scarlatina, one case measles. Advanced ages, respectively, 67, 76, and 70 years.

RATHDRUM; Newcastle.—In the beginning of quarter there was an epidemic of Gastro-enteritis amongst children, probably due to the use of bad potatoes, but no deaths occurred. In the latter end of June seven cases of a very malignant form of diphtheria occurred in the village amongst the Protestant church school children; the three first cases were only seen six hours before death, "too late to do anything for them," but the other four cases were removed to Newtownmountkennedy fever hospital, and are doing well. Every sanitary precaution has been taken.

II. PROVINCE OF MUNSTER.**Clare County.**

CORROFIN ; Corrofin, W.—A mild epidemic of pertussis (whooping-cough). Severe epidemic of measles, but not many affected, and no death.

Cork County.

BANDON ; Murragh.—Measles rather prevalent for the last few weeks, but is now on the decline.

BANTRY ; Bantry, W.—Measles prevails most extensively through the district, of a favourable type, and up to the present no deaths due to it have been registered. No other disease prevalent. Number of deaths is higher than usual, owing to the lamentable accident in Bantry Bay, whereby six Petty Officers of H.M.S. "Collingwood" were drowned, also a policeman, by the upsetting of a boat in Castletown Berehaven.

BANTRY ; Durrus and Kilcrohane.—Mild epidemic of measles; no deaths registered from same, and it is now dying out.

CORK ; Carrigaline, No. 2.—There was one case of diphtheria during early part of the quarter, but the disease did not spread.

DUNMANWAY ; Dunmanway, W.—Two cases of typhus fever sent to hospital.

FERMOY ; Rathcormack.—Measles prevalent.

KANTURK ; Kanturk, W.—Measles very prevalent.

MALLOW ; Ballyclogh.—I have met some few cases of whooping-cough of a mild type.

MALLOW ; Rahan.—Measles has occurred amongst the children in some houses in Clenor Electoral Division. It is of a simple kind.

MITCHELSTOWN ; Kildorrery.—A few cases of enteric fever occurred. The continuance of impetigo prevented some children being brought for vaccination.

SKIBBEREEN ; Skibbereen, W.—With the exception of an epidemic of parotitis (mumps), the district is free from diseases of an infectious character.

SKIBBEREEN ; Tullagh.—Measles, scarlatina, and parotitis (mumps), have been in the district, but are now disappearing.

SKIBBEREEN ; Unionhall.—Measles very prevalent for the past two months. Vaccination neglected in consequence.

SKULL ; Skull, W.—Five deaths were from pneumonia, and four from phthisis.

Kerry County.

DINGLE ; Anascaul.—One death registered at the age of 100 years. From information I received, I believe the age stated is correct.

DINGLE ; Ventry.—Three deaths from influenza. One death at 101 years of age.

KILLARNEY ; Coom.—Vaccination had to be postponed in consequence of an outbreak of whooping-cough. One case of typhus fever sent to hospital.

LISTOWEL ; Ballylongford.—There were three cases of scarlatina in the western part of the district, one of which terminated fatally from complications. Seventeen persons died, aged respectively, one each at 60, 64, 68, 70, 75, 76, 85, and 89 years; two at 78 years each; four at 80 years each, and three at 90 years each.

LISTOWEL ; Tarbert, No. 1, part of.—Two deaths registered, ages 97 and 100 years.

TRALEE ; Ardfernt.—Influenza has been somewhat prevalent.

TRALEE ; Castlemaine.—Some cases of typhoid fever removed to fever hospital.

Limerick County.

KILMALLOCK ; Bruff.—Four cases of scarlatina during the quarter of a mild type.

KILMALLOCK ; Bruree.—Registered the death of one female, aged 100 years.

KILMALLOCK ; Hospital.—Scarlatina prevalent.

KILMALLOCK ; Kilfinnane.—Scarlatina prevalent during quarter.

KILMALLOCK ; Kilmallock, W.—Acute bronchitis was very prevalent during May and June. Infants and young children suffered most severely. There were a few deaths.

LIMERICK ; Annacotty.—There have been some cases of scarlatina during the past month.

LISTOWEL ; Tarbert, No. 1, part of.—See note under head of Kerry County.

LISTOWEL ; Tarbert, No. 2.—Measles of a mild type has been very rife during the latter part of the quarter; it caused no deaths, and is now showing signs of disappearing.

TIPPERARY ; Grean, part of.—Some case of scarlatina of a mild type occurred during the quarter.

Tipperary County.

CALLAN ; Ballingarry.—Six cases of scarlatina have recently come under my notice, and influenza has been prevalent during the quarter.

CASHEL ; Killenaule.—Mild whooping cough prevailing here. One death from diphtheria in April.

CASHEL ; Kilpatrick.—Two cases of scarlatina occurred, which were of a mild type. Whooping-cough prevalent, no deaths from same. Vaccination postponed through latter affection.

NENAGH; *Nenagh, W.*—Measles and whooping-cough very prevalent during the quarter, so much so, that a great number of the children's vaccinations had to be postponed.

NENAGH; *Portroe.*—Measles very prevalent. Many grown up people attacked.

NENAGH; *Silvermines.*—There was an epidemic of measles attended by complications, and vaccination was postponed in consequence, but there was no death from it.

PARSONSTOWN; *Riverstown.*—One death occurred from choleraic diarrhoea. There were some fifty cases of it in the district, one of a very severe type. The drainage seemed to have no influence on it.

TIPPERARY; *Emly.*—One death of 100 years, another of 86 years, were registered.

TIPPERARY; *Grean, part of.*—See note under head of Limerick County.

TIPPERARY; *Tipperary, W.*—The sanitary arrangements have been very much improved since introduction of new water supply. There has been an isolated outbreak of scarlatina near Limerick junction, but no cases in the town.

URLINGFORD; *Kilcooly.*—The fever prevalent during previous quarter has abated off.

Waterford County.

DUNGARVAN; *Dungarvan, W.*—I registered the death of a man aged 107 years, who was in the habit of walking into town, about a mile from his residence, up to short time before his death.

KILMACKTHOMAS; *Kilmackthomas, W.*—One man (fully verified by me on a strict inquiry), attained the age of 101 years.

LISMORE; *Tullow.*—Of the fifteen deaths registered, one was of a person aged 85, one aged 84, one 83, three aged 80, and one at 77, 76, and 70 years each.

WATERFORD; *Woodstown.*—A supplemental water-supply for Dunmore East is being obtained. The death of a woman aged 106 years was registered. She remembered the year of the Rebellion distinctly.

YOUGHAL; *Ardmore.*—Whooping-cough prevalent.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Crumlin.*—Sanitary arrangements pretty good, but in the village of Crumlin, owing to the flat nature of the ground and the want of a water supply for flushing, the drains are at times hard to keep tight. During the months of May and June have had a good many cases of influenza, but none fatal.

BALLYCASTLE; *Cushendall.*—Vaccination postponed owing to prevalence of whooping-cough.

BALLYMENA; *Clogh.*—The healthy state of the district breaks all former records.

BALLYMENA; *Galgorm.*—There was an epidemic of whooping-cough. In the last week of June a number of cases of measles have occurred.

BALLYMENA; *Toome.*—A few cases of measles in one portion of district. No deaths as yet, and the disease is confined to one part. Of the deaths registered, four were of persons over 80, and one had reached the advanced age of 97 years.

BELFAST; *Belfast, No. 8.*—A number of isolated cases of influenza.

LARNE; *Waterfoot.*—Vaccination postponed, owing to prevalence of whooping-cough and scarlatina.

LISBURN; *Glenavy.*—Two fatal cases of diphtheria which fortunately did not spread.

LISBURN; *Lisburn, part of, W.*—Of the thirty-one deaths registered at 60 years and upwards, eighteen were of persons aged between 60 and 70 years; six between 70 and 80 years; six between 80 and 90 years, and one was 94 years of age.

Armagh County.

ARMAGH; *Keady.*—I would consider some regulation necessary to exclude persons affected with phthisis from factories and work-rooms.

ARMAGH; *Markethill.*—Typhus fever broke out in a family. They were all removed to the hospital and recovered. Whooping-cough was prevalent, but has not caused any deaths. Typhoid fever broke out in one family in the district near Armagh, and caused one death.

BANBRIDGE; *Tanderagee.*—Two fatal cases of scarlatina occurred in the same family in the same week. There have been no further cases for so far, nor has there been a case in the district since the first quarter of 1893.

DUNDALK; *Barronstown, part of.*—See note under head of Louth County.

NEWRY; *Mullaghglass.*—Four cases of enteric fever, three of which were sent to hospital, and one treated in own home; no deaths.

NEWRY; *Newry, No. 1, part of, W.*—Measles has been very prevalent, but no deaths have been registered from this cause. There are a good number of vaccination defaulters, but some of them are of old standing.

Cavan County.

BAILIEBOROUGH; *Kingscourt.*—During last month of quarter an epidemic of English cholera spread through the district attacking both children and adults; no deaths have been caused by it.

BAILIEBOROUGH ; Shercock.—Whooping-cough prevalent during the quarter.

BAWNBOY ; Swanlinbar.—There was one death probably from scarlatina. I was called in to attend five other members of same family, just after the death of another member had taken place. The five whom I attended were suffering from scarlatina, and all recovered.

CAVAN ; Ballyhaise.—Scarlatina and measles very prevalent during quarter.

CAVAN ; Killashandra.—An epidemic of pertussis (whooping-cough), with broncho-pneumonia prevailed during quarter; no deaths registered from it. No fresh cases of scarlatina. Gastro-hepatic complaints prevailed throughout the quarter.

COOTEHILL ; Tullyvin.—Vaccination postponed in two cases, as the children were in ill-health. Five deaths from phthisis.

ENNISKILLEN ; Holywell, part of.—Excepting whooping-cough, which has just made its appearance, the district is free from epidemic disease.

GRANARD ; Scrabby, part of.—See note under head of Longford County.

Donegal County.

BALLYSHANNON ; Ballintra.—Two cases of enteric fever. Water supply almost none.

DONEGAL ; Dunkineely.—Influenza prevalent in April and May, but in a mild form, Tonsillitis and otitis were frequent sequela in children.

GLENTIES ; Killybegs.—This district has been comparatively free from disease during the past nine months. The total number of deaths for that time is only 27 out of a population of over 4000. The total number of deaths for the quarter just ended in only 6, four of which are deaths of people between 70 and 80 years of age. I consider these figures remarkable compared with the high death-rate all over the country during the same period.

INISHOWEN ; Buncrana.—Whooping-cough prevalent, two deaths in very young children.

MILLFORD ; Fanad.—Whooping-cough very prevalent, and therefore a lot of vaccinations had to be postponed.

STRABANE ; Raphoe.—A few isolated cases of scarlatina.

Down County.

BANBRIDGE ; Ballyward.—One death from whooping-cough, and one death from typhoid fever, imported from Belfast. Neither of these has yet been registered. The epidemic of whooping-cough which prevailed during the last six months is subsiding.

BANBRIDGE ; Loughbrickland.—Cases of diarrhoea and vomiting have been somewhat prevalent.

BELFAST ; Castlereagh, No. 1.—The district is tolerably free from epidemics, with the exception of typhoid, which is mostly among the younger class, and also whooping-cough.

DOWNPATRICK ; Ballynahinch.—Influenza cases numerous in the early part of the quarter, but not many fatal cases.

DOWNPATRICK ; Downpatrick, W.—Three deaths attributed to influenza.

DOWNPATRICK ; Killough.—Whooping-cough very prevalent during quarter. I registered a death at 101 years.

KILKEEL ; Rosstrevor.—Senile decay caused five deaths.

LISBURN ; Ballylesson.—Fever prevalent; no mortality for so far.

LISBURN ; Lisburn, part of.—See note under head of Antrim County.

LISBURN ; Saintfield.—A few cases of scarlatina and measles of a mild character occurred, but all recovered well.

NEWRY ; Newry, No. 1, part of.—See note under head of Armagh County.

NEWRY ; Newry, No. 2.—The epidemic of whooping-cough which prevailed last quarter has disappeared, but has been replaced by one of measles. As usual in all our epidemics of measles, the use of whiskey and sulphur, "to bring out the rash," has been productive of serious, and, in some cases, fatal diarrhoea.

NEWTOWNARDS ; Comber.—No epidemic now except influenza colds from changeable weather.

NEWTOWNARDS ; Greyabbey.—In Kirkcubbin division a number of cases of whooping-cough presented; no deaths. Influenza presented during the whole quarter in one or other division; two deaths attributed to it as a cause. Owing to fluctuation of atmospheric temperature and density, majority of deaths from chest affections.

Fermanagh County.

CLONES ; Newtownbutler, part of.—A good many cases of scarlatina, and a regular epidemic of mumps.

ENNISKILLEN ; Florencecourt.—Influenza, bronchitis, and pneumonia have been very prevalent during April and May, causing a great many deaths, especially among the aged and those of weak constitution. A number of cases of scarlet fever have shown themselves, which were sent to Fever Hospital. At present I have no cases of scarlet fever under my care.

ENNISKILLEN ; Holywell, part of.—See note under head of Cavan County.

IRVINESTOWN; *Clonelly*.—At present one case of enteric fever. The patient probably contracted the disease in Enniskillen.

IRVINESTOWN; *Irvinestown, No. 2, part of*.—Pertussis (whooping-cough) prevalent.

LISNASKEA; *Maguiresbridge*.—A few cases of scarlet fever, but no deaths have, so far, resulted from the disease.

Londonderry County.

COLERAINE; *Garvagh*.—Two cases of scarlatina occurred, but the disease did not appear to spread.

LONDONDERRY; *Claudy*.—The birth and death-rates are both above the average. As regards the latter, the two extremes of life are principally affected; more than two-thirds of the deaths are those of children under one year old, and of persons above 60 years of age. Of thirty deaths registered, fifteen are those of persons of 60 years and upwards, and of these, seven are 80 years old or upwards. A cold, changeable, damp spring, and bad firing, are, in my opinion, the causes of the mortality.

LONDONDERRY; *Glendernmot, W.*—Longevity seems remarkable; out of forty-nine deaths, twenty-five were of persons over 60 years of age; of these eleven died between 60 and 70, five between 70 and 80, and seven between 80 and 90; three were over 85, and one reached 90 years. In one family three sisters died within six weeks of each other at the respective ages of 80, 86, and 90 years.

MAGHERAFELT; *Bellaghy*.—The greater number of the deaths registered are those of aged people from 60 to 94 years old.

MAGHERAFELT; *Moneymore*.—Two cases of measles.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—Two deaths of females, at 96 and 98 years, were registered.

CARRICKMACROSS; *Donaghmoynne*.—Two deaths from influenza registered.

CASTLEBLAYNEY; *Ballybay*.—In April and May scarlatina was prevalent. The deaths of a woman aged 101 years, and of a man aged 112 years, were registered.

CLOGHER; *Aughnacloy, part of*.—Vaccination almost at a stand-still owing to whooping-cough.

CLONES; *Newtownbutler, part of*.—See note under head of Fermanagh County.

DUNDALK; *Louth, part of*.—See note under head of Louth county.

Tyrone County.

ARMAGH; *Caledon*.—Sanitary arrangements anything but good.

CLOGHER; *Aughnacloy, part of*.—See note under head of Monaghan County.

CLOGHER; *Fivemiletown*.—Some few cases of influenza during the first period of the quarter.

COOKSTOWN; *Stewartstown*.—Some cases of influenza.

DUNGANNON; *Coal Island*.—Influenza prevalent at beginning of this quarter.

IRVINESTOWN; *Irvinestown, No. 2, part of*.—See note under head of Fermanagh County.

OMAGH; *Fintona*.—With the exception of some cases of lung affections following influenza the health of the district has been very good. The death-rate of persons over 60 years of age has been high.

OMAGH; *Omagh, No. 1, W.*—There were a large number of cases of scarlatina, but of a very mild nature.

STRABANE; *Dunnamanagh*.—I had one death from hydrophobia, a boy of 15 years of age bitten by a dog supposed at the time not to be rabid. The boy died three months afterwards from this disease.

STRABANE; *Newtownstewart*.—Scarlet fever was prevalent in a mild form.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Killaan*.—Whooping-cough exists in a part of Killaan electoral division, and has already caused two deaths.

CLIFDEN; *Roundstone, No. 1*.—Of the deaths registered four had reached the ages of 95, 84, 80, and 87 years, respectively.

GALWAY; *Oranmore*.—Of the deaths registered five were aged respectively 70, 73, 74, 75, 80 years.

GLENNAMADDY; *Dunmore*.—Influenza prevalent.

GLENNAMADDY; *Glennamaddy, W.*—Influenza was very prevalent during the two first months of quarter.

GLENNAMADDY; *Williamstown*.—An epidemic of scarlatina prevailed in one part of the district. I attribute the small number of vaccinations performed to this cause, as well as to the lateness of the spring this year, which required the constant attendance of the people at their farms at the period that they generally brought in their children for vaccination.

GORT; *Ardrahan*.—Whooping-cough and measles prevalent.

GORT; *Kimwarra*.—Two cases of typhus fever, one of which was complicated by a miscarriage, and two cases of scarlatina, which are progressing favourably. The typhus cases recovered.

LOUGHREA; *Athenry*.—The death of a person aged 96 years was registered.

LOUGHREA; *Bullaun*.—Deaths of persons of the following ages:—61, 67, 68, 73, 79, 80, 89, 86, and 89 years were registered.

LOUGHTERARD; *Cloonbur*, No. 1.—One death registered was 110 years, and from inquiry I have made, the woman must have been quite up to that age.

LOUGHTERARD; *Lettermore*.—The mortality amongst infants and young children has been very high owing to an epidemic of whooping-cough. Some deaths also occurred from acute bronchitis and bronchopneumonia which made their appearance generally as complications or sequelæ of whooping-cough, but sometimes as primary affections. Vaccination is very satisfactory considering the prevalence of the above-mentioned diseases.

TUAM; *Abbey*.—Influenza rather prevalent during quarter.

TUAM; *Dunmore*.—Influenza prevalent.

Leitrim County.

BALLYSHANNON; *Kinlough*.—The deaths of nine persons at advanced ages were registered; they were respectively 86, 85, 82, 88, 80, 94, 90, 84, and 76 years.

MANORHAMILTON; *Drumahaire*.—The sanitation of this village, for want of sewers and outlet, is in its usual deplorable state.

MOHILL; *Mohill, W.*—More attention to yards of the labouring class, also some of the licensed premises in the town of Mohill. Manure heaps still continue to be in many cases too near the dwelling-houses.

Mayo County.

BALLINA; *Crossmolina*.—There were three deaths registered at 80 years each, two at 85 years of age, and two at 87 years.

BALLINROBE; *Hollymount*.—Epidemic of influenza; some severe cases.

BELMULLET; *Binghamstown, W.*—Vaccination is very slow, probably owing to an epidemic of fever in part of the district.

CLAREMORRIS; *Ballindine*.—Vaccination postponed owing to epidemic of whooping-cough.

CLAREMORRIS; *Ballyhaunis*.—Whooping-cough and influenza, both of an aggravated type, were very prevalent, and, where complicated with pneumonia, frequently fatal.

SWINEFORD; *Kilkelly*.—Whooping-cough has been prevalent. Two deaths were of persons aged 90 years.

WESTPORT; *Achill*.—Febricula and influenza, with a few cases of scarlatina, prevailed during the early part of the quarter, nearly every one being more or less affected, which prevented the children from being vaccinated. I have noticed the children to be presented at once for vaccination now. Sanitary state good, and no epidemic present now, except a few isolated cases of influenza.

WESTPORT; *Ballycroy*.—One death over 90 years.

WESTPORT; *Newport*.—Measles of a mild type very prevalent at present.

Roscommon County.

ATHLONE; *Brideswell*.—One townland was affected with fever, but now the disease is extinct.

ATHLONE; *Kiltoom*.—Most of the deaths registered were of old people, whose ages ranged between 63 and 97 years.

BALLINASLOE; *Creagh*.—Vaccination is in a backward state.

STROKESTOWN; *Roosky*.—Two of the deaths were at the advanced age of 96 years.

STROKESTOWN; *Strokestown, W.*—There has been an epidemic of influenza, in some cases followed by pneumonia.

Sligo County.

DROMORE WEST; *Easky, W.*—A few cases of influenza, with pulmonary complications; none fatal.

SLIGO; *Ballymote*.—Influenza and diarrhoea prevalent during the quarter.

SLIGO; *Carney, No. 2*.—Vaccination rather backward, owing to influenza, and a weak state left in most children after measles.

SLIGO; *Collooney*.—One case of scarlatina, which recovered.

QUARTERLY RETURN OF THE MARRIAGES, BIRTHS, AND DEATHS

Marriages:—APRIL, MAY, JUNE, 1897. **Births & Deaths:**—JULY, AUG., SEPT., 1897.

*General Register Office, Charlemont House,
Dublin, 27th October, 1897.*

During the quarter ended 30th September last, there were registered in the 801 Registrars' Districts in Ireland 26,160 births—a number equal to an annual birth-rate of 23·0 in every 1,000 of the estimated population—and 17,485 deaths, representing an annual rate of 15·4 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 8,531 persons emigrated. An increase of 144 would, therefore, appear to have taken place in the population which is estimated to have been 4,551,631 in the middle of the year.*

In England last quarter, the birth-rate represented was 30·0 in every 1,000 of the estimated population, and the death-rate 17·9 per 1,000.

The birth-rate in Ireland for the quarter is 0·7 over the average rate for the corresponding quarter of the last ten years but 0·2 under the rate for the third quarter of the year 1896. The deaths are over those registered in the corresponding quarter of 1896 to the extent of 1,357; the death-rate is 1·2 over the rate for that quarter, and 0·7 over the average for the third quarter of the last ten years.

Compared with those for the corresponding quarter of 1896, the returns of pauperism, furnished by the Local Government Board, show an increase of 709 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 129 in the average number of persons on out-door relief.

Compared with the averages for the third quarter of the ten years 1887–96 the number of Workhouse inmates shows an increase of 166,

* See page 191.

and the number of persons on out-door relief a decrease of 5,537, the total under both heads being 5·4 per cent. below the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2·8 per cent.

The annual marriage-rate (4·3 per 1,000 of the population) represented by the marriages registered during the second quarter of 1897 is 0·1 over the average rate for the corresponding quarter of the ten years 1887–96.

TABLE I.—Showing for each **Province** and **County** in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of **Marriages** registered during the quarter ended 30th June, 1897, and by the **Births** and **Deaths** registered in the Quarter ended 30th September, 1897.

MARRIAGES.

The marriages (4,915) registered in Ireland during the second quarter of 1897 are equivalent to an annual rate of 4·3 per 1,000 of the estimated population, being 0·4 under the rate for the corresponding quarter of 1896, but 0·1 over the average rate for the second quarter of the ten years 1887–96. Of the total marriages 3,093 were registered under the provisions of the 26 & 27 Vic., cap. 90, and 1,822 under the 7 & 8 Vic., cap. 81; the former number being equal to 3·6 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·5 per 1,000 of the members of all other religious persuasions. Compared with the averages for the second quarter of the last ten years the rate for Roman Catholic marriages shows a decrease of 0·1, and that for all other marriages an increase of 0·5. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while, as regard other marriages, there is generally but little difference in the numbers registered in the several quarters.

* The rates for the total of Ireland are calculated on the estimated population in the middle of the year; those for the provinces and counties on the population according to the Census of 1891.

TABLE II.—Showing by Quarterly Periods, the Marriages registered in Ireland in each of the ten years 1887–96, and the first and second quarters of 1897.

1897, 1st quarter	7.2	3.6	---	---	---	5.1	6.5	---	---	---	6.7	4.3	---	---	---	

BIRTHS.

The number of births registered during the quarter ended 30th September last was 26,160—13,488 boys and 12,672 girls—being equal to an annual ratio of 1 in every 43.5, or 23.0 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1887–96 was 26,053, equivalent to an annual rate of 22.3 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23.2 per 1,000 of the population, according to the Census of 1891; Munster, 20.8; Ulster, 24.1; and Connaught, 18.9.

The highest county birth-rate* is 31.5 for Antrim, and the lowest 14.7 for Leitrim. Of the intermediate rates the highest five are—Dublin, 29.3; Down, 28.2; Londonderry, 22.7; Wicklow, 22.3; and Kerry, 22.2; and the lowest five are—Longford, 16.3; Cavan, 16.7; Roscommon, 16.8; Westmeath, 17.4; and Monaghan, 17.6.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 17,485—8,825 males and 8,660 females—affording an annual ratio of 1 in every 65.1, or 15.4 per 1,000 of the estimated population: the average rate for the corresponding quarter of the ten years 1887–96 was 14.7 per 1,000.

The death-rate in Leinster was 16.8 per 1,000 of the population according to the Census of 1891; in Munster, 13.5; in Ulster, 15.9; and in Connaught, 11.5.

The county death-rates* range from 10.6 in Sligo to 22.5 in Dublin. Between these rates the lowest five are—Leitrim, 10.8; Mayo, 11.2; Kerry, 11.3; Roscommon, 11.8, and Fermanagh, 12.0; and the highest five are—Antrim, 20.6; Down, 17.6; Waterford, 16.0; King's, 15.4; and Armagh, 15.2.

* See note on foregoing page.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1887-96, and the average number for that period; also the number registered in the first, second, and third quarters of the year 1897:—

Equivalent Annual Rate per 1,000 living:—										
Average, 1887-96,	23.9	24.3	22.3	21.3	22.9	22.1	18.6	14.7	16.9	18.1
1897,	24.7	24.1	23.0			22.9	19.1	15.4		

Ages.—Of the 17,485 deaths registered last quarter, 2,922, or 16.7 per cent., were of children under 1 year old; and 6,445, or 36.9 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 111.6 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 17.8 per cent. of the total deaths registered therein; in Munster, 15.4 per cent.; in Ulster, 18.3 per cent.; and in Connaught, 11.7 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 33.1 per cent.; in Munster to 39.2 per cent.; in Ulster to 35.2 per cent.; and in Connaught to 46.6 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

It has been already pointed out that the annual death-rate (15.4 per 1,000) represented by the deaths from all causes registered last quarter, although not high, is somewhat in excess of the average rate for the corresponding quarter of the last ten years. The rate afforded by the deaths from the principal zymotic diseases,* taken collectively, was also over the average for the September quarter. As regards the increase in the latter rate an analysis of the returns shows that it is due to the heavy mortality from one or other of these diseases in a limited number of districts—notably Dublin and Belfast—and to the rather extended prevalence of whooping-cough.

Diseases.—The total number of deaths from the principal zymotic diseases* registered during last quarter is 1,706, equivalent to an annual rate of 1.5 per 1,000 living, being 0.3 over the rate for the preceding three months, and 0.2 in excess of the average rate for the third quarter of the ten years 1887-96.

* See note (†) on page 183.

Small-pox.—A death from small-pox occurred in Ballinrobe District, Ballinrobe Union: the patient stated he was inoculated by a quack when a child. This was the only case of the disease in the district and, so far as the Registrars' Notes show, there was no other case in the whole of the country.

Measles.—There were only 63 deaths from measles, which caused 281 deaths in the preceding quarter, 621 in the first three months of this year, and an average of 156 in the third quarter of the five years 1892-6. Of the 63 deaths 10 occurred in the province of Leinster, 21 in Munster (including 6 in Skibbereen Union or Superintendent Registrar's District), 21 in Ulster (6 of which were in Belfast Union and 7 in Newry Union), and 11 in Connaught.

Scarlatina.—The decline in the mortality from scarlatina noted in the Returns for the first two quarters of this year continued during the third quarter, the total number of deaths from the disease during that period being 90, or 23 under the number for the preceding quarter, and 30, or 25 per cent., below the average for the third quarter of the last five years. In Cavan Union there were 6 deaths from scarlatina, in Dublin North Union 8, and in Dublin South Union 19. The highest number for any other Union is 4, and in 120 of the 159 Unions no deaths from the disease were recorded. The total number for the province of Leinster is 50; for Munster, 13; for Ulster, 22; and for Connaught, 5.

Typhus caused 23 deaths only, being 34 below the average for the corresponding quarter of the last five years, and 14 under the number for the quarter ended the 30th June last. Four of the 23 deaths occurred in Cork Union, and 3 in the Union of Athlone, and the remaining 16 were distributed over 12 Unions. The total number for Leinster is 1, for Munster 9, for Ulster 5, and for Connaught 8.

Whooping-cough.—Deaths from whooping-cough which, after having risen to 554 in the first quarter of this year, fell to 426 in the following three months, further declined last quarter to 350, but this number is 146, or 72 per cent., in excess of the average for the corresponding quarter of the last five years. In 83 of the 159 Unions the disease proved fatal, and in a few localities the rate of mortality was very high. Thus in Ballyhaunis District, Claremorris Union, there were 15 deaths from whooping-cough, a number equivalent to an annual rate of 5.1 per 1,000 of the population at all ages; in Buncrana District, Inishowen Union, 8 deaths—representing an annual rate of 5.6 per 1,000; and in Drumlish District, Longford Union, 9 deaths—equal to an annual rate of 3.7 per 1,000. In Belfast Union there were 49 deaths from this disease; in Cork, 17; in Dublin North, 20; in Dublin South, 17; and in Galway, 11; the total number of Unions in which 5 or more deaths were registered being 20. The gross number for the province of Leinster is 90; for Munster, 68; for Ulster, 130; and for Connaught, 62.

Diphtheria caused 71 deaths, being 10 over the number for the preceding quarter, but 3 under the average for the third quarter of the last five years. There were 6 deaths from this disease—equal to an annual rate of 7 per 1,000 of the population—in Doneraile District, Mallow Union; 6 in the Union of Belfast; 5 in Cork Union; 6 in Dublin North Union; and 17 in Dublin South Union, so that in these five localities 40 of the 71 deaths occurred. The total number for the province of Leinster is 35; for Munster, 18; for Ulster, 17; and for Connaught, 1.

Simple continued and ill-defined Fever.—Only 17 deaths were returned under this heading, being little more than one-third of the average number (42) for the corresponding quarter of the last five years, and 13 under the number for the second quarter of this year. Seven of the 17 deaths were in Leinster; an equal number in Ulster, and the remaining 3 in Connaught.

Enteric Fever.—The deaths from enteric fever amounted to 244, being 44 in excess of the number for the preceding quarter, and 77, or 46 per cent., over the average for the third quarter of the last five years: they were distributed through the four provinces as follows:—In Leinster, 54; in Munster, 33; in Ulster, 151; and in Connaught, 6. One-half of the total number of deaths from this cause during the preceding quarter were registered in the city of Belfast, and of the 244 fatal cases in Ireland last quarter, 92, or 38 per cent., occurred there, the annual death-rate represented by these 92 deaths being 1·3 per 1,000 of the estimated population of the city. There were 16 deaths from enteric fever in the extra civic portion of Belfast Union, and of the 136 deaths from this disease in other parts of Ireland 7 were in Banbridge Union; 6 in the Union of Cork; 22 in Dublin North Union; 19 in Dublin South Union; 5 in Strabane Union; and the remaining 77 were distributed over 49 Unions. In 104 Unions no deaths from enteric fever were recorded.

Diarrhœa.—The mortality from diarrhœa was largely in excess of the average for the third quarter, the number of deaths from this cause amounting to 819 against an average of 635 for the corresponding quarter of the last five years. This result is mainly due to the prevalence of the disease in the city of Belfast and the Dublin Registration District, in the former of which areas it caused 277 deaths—a number equal to an annual rate of 3·9 per 1,000 living—and in the latter 221, representing an annual rate of 2·5 per 1,000. There were also 40 deaths from this cause in the city of Londonderry, where 40 deaths in a quarter represent an annual rate of 4·8 per 1,000 of the population according to the Census of 1891; 26—equal to an annual rate of 4 per 1,000—in the city of Waterford; and 22 in the city of Cork. It will be observed that the deaths from diarrhœa in the five urban localities above mentioned amount to 586, and form 72 per cent. of the total number for Ireland. The provincial distribution of the deaths from this cause was—Leinster, 272; Munster, 110; Ulster, 423; and Connaught, 14.

Simple Cholera.—The number of deaths ascribed to this cause is 28, viz.:—12 in Leinster; 5 in Munster; and 11 in Ulster.

Hydrophobia.—No deaths from this cause were registered.

The Registrars, in their Notes, report the presence of the following diseases:—Small-pox in one district, varicella (chicken-pox) in one, measles in 22, scarlatina in 30, whooping-cough in 70, diphtheria in 3, fever in 40 (typhus 5, simple continued and ill-defined fever 2, and enteric 33), influenza in 6, and mumps in 2.

Inquests.—There were 629 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 28 of the total deaths registered.

In Leinster there was 1 inquest to every 27 deaths registered, in Munster 1 to 22, in Ulster 1 to 28, and in Connaught 1 to 51.

Deaths in Public Institutions.—Of the 17,485 deaths registered, 2,747, or 15·7 per cent., occurred in public institutions. In Leinster the percentage was 21·3, in Munster 20·0, in Ulster 10·6, and in Connaught 9·8.

The following table (TABLE IV.) shows the number of deaths from the principal **zymotic** diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1897, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Zymotic Diseases.											Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Simple and Ill-defined Fever.	Enteric Fever.	Diarrhoea.	Simple Cholera.	Total.

URBAN SANITARY DISTRICTS.

Separate statistics for the Urban Sanitary Districts are given in Table V. The death-rate for last quarter in these districts, which contain nearly one-fourth of the total population of the country, was 22·3, and the birth-rate 32·1 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the death-rate was 12·5 and the birth-rate 19·1 per 1,000.

The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Sanitary Districts during the quarter was 3·7 per 1,000 of the population, according to the Census of 1891: in the remainder of the country the rate was 0·7 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the THIRD QUARTER of the year 1897, in the DUBLIN REGISTRATION DISTRICT, and in each of the PROVINCIAL URBAN SANITARY DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—“The Dublin Registration District,” which consists of the City of Dublin and its Suburban Districts, comprises the Urban Sanitary Districts of Dublin, Clontarf, Drumcondra, Clonliffe and Glasnevin, Kilmanham, Rathmines and Rathgar, Fennbrooke, Blackrock, Kingstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the twenty-two Urban Sanitary Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the thirteen weeks ending Saturday, 2nd October, 1897.

† Small-pox, measles, scarlet fever, typhus, whooping-cough, diphtheria, simple continued and ill-defined fever, enteric fever, diarrhoea and simple cholera.

† The rates for Belfast have been calculated on the population estimate in the middle of the year 1897.

VACCINATION.

According to the Returns of Primary Vaccinations received for the third quarter of the year 1897, there were 24,807 persons successfully vaccinated; in 2,986 cases the operation was postponed, and 58 children were reported as insusceptible of vaccination. The deaths of 1,682 unvaccinated children under 3 months old were registered during the quarter, making a total of 29,533 children with regard to whom particulars as to vaccination were ascertained.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th September last, was 8,531 (3,222 males and 5,309 females), being 837 less than in the corresponding quarter of the year 1896, and 5,209 under the average number for the third quarter of the ten years 1887-96.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September, in 1896 and 1897:—

MONTHS	NUMBER OF EMIGRANTS.								
	Males.			Females.				Total.	
	1896.	1897.	De-crease.	1896.	1897.	In-crease.	De-crease.	1896.	1897.
July, . . .	1,185	973	212	1,155	964	—	191	2,340	1,937
August, . .	1,247	1,022	225	1,700	1,500	—	200	2,947	2,522
September, .	1,311	1,227	84	2,770	2,845	75	—	4,081	4,072
Total, . .	3,743	3,222	521	5,625	5,309	—	316	9,368	8,531

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $5\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of 1896 the average price was $5d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was $13s. 6d.$ per cwt., being $1s. 6d.$ over the average for the corresponding quarter of 1896. In the third quarter of 1887 the average price was $14s. 2d.$ per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were $2s. 4d.$ to $3s. 6d.$. In the third quarter of 1896 the average prices were $2s. 4d.$ to $3s. 9d.$, and in the corresponding quarter of 1887 they were $3s. 9d.$ to $6s. 8d.$

The average prices of beef at the Dublin Cattle Market during the quarter were from $44s.$ to $56s.$ per cwt. In the corresponding quarter of 1896 the average prices were from $44s.$ to $54s.$, and in the third quarter of 1887 they were from $46s.$ to $52s.$

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was $16s.$ per ton.

The highest price of $2\frac{3}{4}$ per cent. Consols at the Dublin Stock Exchange for the quarter was $\pounds 113\frac{3}{8}$, and the lowest $\pounds 111\frac{1}{8}$. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland which was reduced to 3 per cent. on 13th May was raised to $3\frac{1}{2}$ per cent. on 23rd September.

NOTE—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1897 was 40,703, or 709 over the average for the corresponding period in 1896.

The average weekly number of persons receiving out-door relief during the quarter was 53,307, being 129 under the average for the third quarter of 1896.

Of the persons receiving in-door relief during the third quarter of 1897, an average number of 1,417 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1896 the average weekly number was 1,402.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1897, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD	Average PRICES OF PROVISIONS.								PAUPERISM.	
	BREAD (4 lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market), per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		NUMBER OF PERSONS RELIEVED	In-door.	Out-door.

(a) Polands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ¼d. per 4lb. loaf lower.

(c) Messrs. Manders and Co.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the *Dublin Gazette*; and the average prices of Potatoes and Beef have been compiled from the *Dublin Journals*. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the third quarter of the years 1892–97, respectively,

* Latitude 53° 21' 44"–55" north; longitude 6° 21' 6"–35" west. Height above the sea 162·2 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (See Table on page 190):—

The mean height of the barometer during the third quarter of 1897 was 29·926 inches, against an average of 29·937 inches for the corresponding quarter of the five years 1892–96; the highest reading (30·605 inches) was on the 13th September, at 9 A.M., air calm, and the lowest (29·256 inches) on the 1st September, at 9 P.M., wind N.N.W.

The mean temperature of the air during the quarter was 57·4°, or 0·8° over the average for the third quarter of the five years 1892–96. The maximum temperature was 79·0°, and the minimum 35·1°. The maximum heat in sun was 134·5°, and the minimum on the grass 29·0°.

Rain fell on 53 days during the quarter. The rain-fall measured 8·610 inches, against an average of 9·079 inches for the third quarter of the five years 1892–96. The greatest monthly rainfall was in August, when 4·485 inches were registered.

The wind blew on 33 days from W., on 19 days from S.W., on 10 days from S., on 6 days from E., on 5 days each from N.E., S.E. and N.W., on 4 days from N., and the air was calm on 5 days at 9 A.M.

July.—The mean height of the barometer during this month was 30·017 inches; the highest reading was 30·375 inches on the 30th, at 9 A.M., wind W.; and the lowest 29·642 inches on the 20th, at 9 A.M., wind E., and on the 5th at 9 P.M., wind W. The mean temperature of the air was 59·4°, the maximum registered was 79·0°, and the minimum 38·7°. The 16th was the warmest day, and the 11th the coldest night. The mean of the dry bulb was 59·1°, and of the wet bulb 55·5°. The maximum heat in sun was 134·5°, and the minimum on the grass 32·8°. The total amount of sunshine recorded was 190·3 hours, the greatest daily amount being 15·4 hours on the 14th. The maximum ozone was ·5, the minimum ·1, and the mean ·3. Rain fell on 14 days. The rain-fall measured 1·530 inches; the greatest amount in 24 hours was ·275 inch on the 18th.

August.—The mean height of the barometer during this month was 29·739 inches; the highest reading (30·226 inches) was on the 3rd, at 9 A.M., wind N.E.; and the lowest (29·281 inches) on the 29th, at 9 P.M., wind S. The mean temperature of the air was 59·3°, the maximum registered was 76·8°, and the minimum 46·5°. The 2nd was the warmest day, and the 27th the coldest night. The mean of the dry bulb was 58·4°, and of the wet bulb 55·4°. The maximum heat in sun was 132·5°, and the minimum on the grass 36·8°. The total amount of sunshine recorded was 183·0 hours, the greatest daily amount being 12·0 hours on the 5th. The maximum ozone was ·5, the minimum ·2, and the mean ·3. Rain fell on 23 days. The rain-fall measured 4·485 inches; the greatest amount in 24 hours was ·890 inch on the 7th.

September.—The mean height of the barometer during this month was 30·023 inches; the highest reading (30·605 inches) was on the 13th, at 9 A.M., air calm; and the lowest (29·256 inches) on the 1st, at 9 P.M., wind N.N.W. The mean temperature of the air was 53·4°, the maximum registered was 70·0°, and the minimum 35·1°. The 14th was the warmest day, and the 10th the coldest night. The mean of the dry bulb was 52·6°, and of the wet bulb 50·2°. The maximum heat in sun was 123·7°, and the minimum on the grass 29·0°. The minimum on the grass was below 32° on 4 nights. The total amount of sunshine recorded was 166·6 hours, the greatest daily amount being 10·9 hours on the 10th. The maximum ozone was ·4, the minimum ·1, and the mean ·3. Rain fell on 16 days. The rain-fall measured 2·595 inches; the greatest amount in 24 hours was 1·090 inches on the 1st.

NOTE.—This table has been constructed for the years 1823 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-97—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91 to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years.

MARRIAGES Registered during the Quarter ending 30th June, 1897, in the PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS** and **DEATHS** Registered during the Quarter ending 30th September, 1897; Deaths from SMALL-POX, MEASLES, SCARLET FEVER, TYPHUS, WHOOPING-COUGH, DIPHTHERIA, SIMPLE CONTINUED AND ILL-DEFINED FEVER, ENTERIC FEVER, DIARRHŒA, and CHOLERA; also VIOLENT DEATHS,* INQUEST CASES, and DEATHS in PUBLIC INSTITUTIONS, Registered during the Quarter ending 30th September, 1897, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS of IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

Provinces and Counties.	Area, in Statute Acres.	Popu- lation in 1891.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrar to include												Vaccination Return for the Quarter ending 30th Sept., 1897.						
			Averages in the Quarters ending the 30th June, 1897.	Registered in the Quarters ending the 30th June, 1897.	Averages in the Quarters ending the 30th Sept., 1897.	Registered in the Quarters ending the 30th Sept., 1897.	Children under 1 year of age.	Persons aged 60 years and up-wards.	Small-pox.	Measles.	Scarlatina.	Typhus.	Whooping-cough.	Diphtheria.	Simple continued Fever, and ill-defined Fever.	Enteric Fever.	Diarrhœa.	Cholera.	Violence.*	Inquest Cases.	Deaths in Public Insti- tutions.	Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons insusceptible of Vac- cination.	Number of Unvacci- nated Children under 3 months old, whose deaths were registered during the Quarter.	Total of the foregoing.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District or portion of District in the County.

I. PROVINCE OF LEINSTER.

Carlow County.

CARLOW; *Carlow, part of, W.*—Four deaths from diarrhoea. The diarrhoea was accompanied by vomiting of the choleraic type.

ENNISCORTHY; *Newtownbarry, part of.*—Summer diarrhoea has been very prevalent, but no death from it occurred.

SHILLELAGH; *Coolkenna and Hacketstown, part of.*—Deaths were registered of persons aged 80, 82, 84, 84, 85, 86, 86, and 87 years.

Dublin County.

CELBRIDGE; *Lucan, part of.*—One case of scarlatina reported.

DUBLIN NORTH; *Blanchardstown and Cstleknock.*—Enteric fever only in Barracks, 2nd Hants Regiment. Six cases of scarlet fever came under my notice, but of a very mild type.

DUBLIN SOUTH; *Clondalkin.*—The prevalence of whooping-cough and measles stopped the vaccination.

DUBLIN SOUTH, *Tallaght.*—Two deaths, 87, 89 years.

Kildare County.

BALTINGLASS; *Balinglass, part of.*—One case of typhus fever during the quarter.

CELBRIDGE; *Lucan, part of.*—See note under head of Dublin County.

EDENDERRY; *Carbury.*—One case of typhoid fever, now convalescent, probably contracted in Dublin. Influenza prevalent for past two months.

Kilkenny County.

CASTLECOMER; *Castlecomer, W.*—The death of a woman aged ninety-six years has been registered, who spent all her lifetime in the district.

King's County.

EDENDERRY; *Rhode.*—Whooping-cough very prevalent.

MOUNTMELICK; *Clonygowan, part of.*—The following ages were registered:—69, 72, 76, 75, 78, 80, 88, 88, and 97 years.

TULLAMORE; *Kilbeggan, part of.*—Whooping-cough prevalent.

TULLAMORE; *Philipstown.*—Whooping-cough prevalent.

TULLAMORE; *Tullamore, W.*—Measles, mild type epidemic. Few cases scarlatina.

Louth County.

DUNDALK; *Barronstown, part of.*—Whooping-cough prevails in the Ballsmill portion of the district.

DUNDALK; *Louth, part of.*—Whooping-cough and bronchitis very prevalent (amongst children). Several cases of pneumonia in the young and also in adults came under my notice. In the third week of August, a very severe case of summer or English cholera was attended by me; it occurred in a woman within two days of parturition. The vomiting and flux from bowel were constant, liquid and profuse for four hours, but ceased on treatment; two attendants on patient caught the infection from patient, and a third, an old woman in same

house, also became attacked. Those three did not present nearly such severe symptoms or so constant as the pregnant case. I am of opinion that her attack (the bowel discharge) was most infectious. They all made a good recovery. Two other cases of this disease came under my notice, living some distance apart. Sanitary and disinfectant precautions were seen to. The last two cases were of a few days' duration, but diarrhoea and vomiting less frequent than in the other cases. At present the district is in a healthy state, with the exception of whooping-cough. One case of scarlatina came into the Louth part of the district from another Union. I was called upon to visit it on 15th September, and had it removed to Union Fever Hospital next morning. The dwelling was afterwards thoroughly lime-washed and disinfected, and all clothes that were in contact with patient were sent to the Union disinfecting chamber. This was the only case of above fever came under my notice.

DUNDALK; *Ravensdale*. — The water supply is pure and ample, except in one townland, viz.:—Bellurgan.

Meath County.

EDENDERRY; *Ballyboggan*. — A rather severe epidemic of diarrhoea, but no fatal case occurred during the last two months of quarter.

NAVAN; *Painestown*. — The death of one female was registered at 91 years and another at 83 years.

OLDCASTLE; *Oldcastle, W.* — Several cases of scarlet fever occurred recently in this district, two with fatal results (one of which is not yet registered).

TRIM; *Innfield*. — One death occurred from summer diarrhoea, a man aged 56 years.

TRIM; *Summerhill*. — Two cases of cerebro-spinal meningitis terminated fatally — both females, sisters, ages 15 and 7 years respectively — occurring almost simultaneously.

Queen's County.

CARLOW; *Carlow, part of*. — See note under head of Carlow County.

MOUNTMELICK; *Clonygowan, part of*. — See note under head of King's County.

Westmeath County.

ATHLONE; *Athlone, No. 1, W.* — Two of the deaths recorded had reached the ages of 97 and 94 years respectively, the former a female and the latter a male, and both from the rural part of the district.

MULLINGAR; *Ballynacarrigy*. — The district is comparatively free from any serious epidemic disorder, with the excep-

tion of whooping-cough, which has been generally prevalent during the past month. Scarlatina, which broke out in this village about the middle of last quarter, was confined to the locality where it first appeared; there were not many cases and most of them were of a simple type of the affection, all the cases having satisfactorily recovered. The weather had a very unfavourable influence on the vaccination of young children, many of whom could not be brought out in the wet and cold then prevalent, and the collecting of vaccine lymph was, for the same reason, very much interfered with.

MULLINGAR; *Castletown Geoghegan*. — An epidemic of whooping-cough prevalent, which I find on inquiry is not confined to this district.

MULLINGAR; *Killucan*. — One person died 101 years old.

MULLINGAR; *Multyfarnham*. — Scarlatina has been prevalent.

TULLAMORE; *Kilbeggan, part of*. — See note under head of King's County.

Wexford County.

ENNISCORTHY; *Enniscorthy, No. 2, W.* — A large number of children suffering from whooping-cough, and, as a consequence, a high percentage of postponement of vaccination.

ENNISCORTHY; *Newtownbarry, part of*. — See note under head of Carlow County.

NEW ROSS; *Fethard, No. 2*. — Six of the eight deaths registered averaged 73 years. No vaccinations owing to prevalence of bronchial catarrh amongst children.

WEXFORD; *Bannow*. — One death was registered in which the age was stated to be 100 years.

WEXFORD; *Wexford, W.* — Seven of the persons whose deaths were registered were over 80 years of age, including four aged 92 years and upwards.

Wicklow County.

BALTINGLASS; *Baltinglass, part of, W.* — See note under head of Kildare County.

RATHDOWN; *Powerscourt*. — Three deaths registered, aged 94, 84, and 78 years respectively.

RATHDRUM; *Newcastle*. — Pertussis (whooping-cough) has been prevalent for the last two months, and a good many cases of influenza with diarrhoea. The two deaths registered from diphtheria occurred last quarter. Owing to active sanitary precautions, no further cases have come under notice.

SHILLELAGH; *Coolkenna and Hacketstown, part of*. — See note under head of Carlow County.

II. PROVINCE OF MUNSTER.**Clare County.**

BALLYVAGHAN; Ballyvaghan, W.—The average age of half the deaths recorded is 76. One man reached 100 years.

ENNISTIMON; Ennistimon, W.—Three deaths from acute dysentery. Only one has been registered yet. The disease was brought into the district by a girl who got ill returning from America.

ENNISTIMON; Miltown Malbay.—Whooping-cough prevalent.

KILRUSH; Kilrush, W.—A few cases of infantile diarrhoea.

LIMERICK; Bridgetown.—Scarlet fever appeared in one house; it was brought from a school in another district. The disease has now disappeared.

SCARRIFF; Annacarriga.—One death is registered at the age of 112 years.

SCARRIFF; Feake.—Whooping-cough had been very prevalent, causing several deaths—only two registered.

TULLA; Kilkishen.—There is in the Kilkishen part of the district an epidemic of whooping-cough. There was also, lately, a case of typhoid fever, the patient coming from Tulla, but there have been none following it, all proper precautions having been taken to prevent it spreading.

Cork County.

BANTRY; Durrus and Kilcrohane.—Sanitary arrangements good since the new sewerage pipes were laid down in the village of Durrus. Measles of a mild type has again broken out in the northern part of district, but no deaths from same.

BANTRY; Glengarriff.—No epidemic of any kind occurred, although measles was prevalent in Bantry and its neighbourhood, and in the adjacent districts, only a few sporadic cases occurred, and these few were imported into the district, but owing to isolation and attention to sanitary matters, the disease was prevented from spreading.

CORK; Carrigaline, No. 1.—Vaccination suspended during July, owing to the hot weather; in August whooping-cough appeared, and is now very prevalent; this has prevented vaccination. I see no prospect of being able to resume vaccination for some time.

CORK; Carrigaline, No. 2.—There were a few cases of typhoid fever during the early part of September, which were sent to hospital for treatment.

FERMOY; Fermoy, W.—Measles prevailed very extensively in the urban portion of the district during the quarter, attended by the usual mortality from bronchial affections amongst children under twelve months old.

FERMOY; Rathcormack.—Some cases of bronchitis after measles.

KANTURK; Kanturk, W.—I attended and registered the birth of triplets during the quarter, two sons and one daughter. One lived for three days, and the two others died after twenty-four hours.

KILMALLOCK; Charleville, part of.—There were four cases of typhoid fever. All have recovered.

KINSALE; Ballyfeard.—Whooping-cough, in many cases complicated with chest affections, rather prevalent.

MACROOM; Macroom, W.—The death of a man at the age of 105 years was registered. He enjoyed perfect health and full possession of his faculties and senses to the last.

MALLOW; Ballyclogh.—One case of typhoid fever, which was treated at home. The patient recently came from Dublin, being employed there. Disinfection and isolation strictly enforced. The disease has not spread. Some few cases of whooping-cough occurred in early part of quarter, but of a mild type, also measles, which interfered with vaccination at that time.

MILLSTREET; Cullen.—Whooping-cough was prevalent.

MITCHELSTOWN, Kildorrery.—Owing to various forms of skin disease vaccination had to be postponed in a large number of cases.

SKIBBEREEN; Tullagh.—There have been a few cases of scarlatina and measles.

SKIBBEREEN; Unionhall.—Mumps very prevalent.

Kerry County.

CAHERSIVEEN; Emlagh.—Diarrhoea prevalent, owing probably to the use of bad potatoes.

CAHERSIVEEN; Valencia.—Measles of a favourable type prevalent for the past two months of quarter.

DINGLE; Castlegregory.—People have, at my giving notice, taken up their children promptly this past quarter for vaccination.

DINGLE; Dingle, W.—In the last week of quarter a few cases of influenza have appeared.

KENMARE; Kenmare, W.—Some cases of whooping-cough, which in most cases were of a mild type.

KENMARE; Tuosist.—A rather severe epidemic of whooping-cough has raged for some months past. It is now abating.

KILLARNEY; Coom.—Whooping-cough prevalent throughout the district during the quarter. Vaccination had to be postponed in consequence. One fatal case of croup (diphtheritic). A second case doubtful, not attended by a medical man.

KILLARNEY; Killarney, No. 2.—Whooping-cough broke out and prevented vaccination.

KILLARNEY; Milltown.—Only one case of typhoid under treatment at present. Pneumonia epidemic, but chiefly confined to very young children.

LISTOWEL; Ballyhorgan.—Three of the deaths averaged 70 years of age.

LISTOWEL; Ballylongford.—With the exception of a few cases of scarlatina the district has been very healthy. Vaccination has not been quite satisfactory, but this resulted by reason of people trying to avail themselves of the little fine weather they got by staying at home and saving their crops. Seven persons whose deaths were registered were aged respectively 60, 71, 74, 80, 87, 94, and 96 years.

TRALEE; Castleisland.—Whooping-cough was prevalent during the last month of the quarter; vaccination postponed in consequence.

TRALEE.—*Tralee No. 2.*—I have had a few cases of scarlatina.

Limerick County.

CROOM; Castletown.—A few cases of enteric fever have occurred, but caused no death.

CROOM; Croom, W.—Whooping-cough prevailed.

KILMALLOCK; Charleville, part of.—See note under head of Cork County.

KILMALLOCK; Kilfinnane.—Some cases of scarlatina.

KILMALLOCK; Kilmallock, W.—Three cases of measles.

LIMERICK; Caherconlish.—There have been some cases of scarlet fever here.

MITCHELSTOWN; Galbally.—A few isolated cases of scarlatina. Three deaths in one family of young children suffering from vomiting and diarrhoea.

NEWCASTLE; Ardagh.—A few cases of scarlatina of a mild type in the western part of the district, in one family only. All the patients are now convalescent.

NEWCASTLE; Feenagh.—Owing to the unprecedented outbreak of typhoid fever vaccination has been postponed.

NEWCASTLE; Newcastle, W.—I have at present in hospital thirty-six cases of typhoid fever, all from surrounding districts.

RATHKEALE; Rathkeale No. 2.—A few cases of typhoid fever.

TIPPERARY; Grean, part of.—Two isolated cases of diphtheria occurred, both of which proved fatal.

Tipperary County.

BORRISOKANE; CloghJordan.—Epidemic whooping-cough.

CARRICK-ON-SUIR; Carrick-on-Suir, part of, W.—A few cases of whooping-cough in Carrickbeg, and one case of typhoid in August.

CASHEL; Kilpatrick.—Whooping-cough prevalent during quarter from which no death occurred.

CLOGHEEN; Caher.—Whooping-cough is at present epidemic: it is of a mild type.

CLOGHEEN; Clogheen, W.—Whooping-cough prevalent owing to which the vaccination of several children was postponed.

CLONMEL; Marlfield.—Whooping-cough prevalent during August and September. One case of enteric fever removed to hospital; ran a mild course, ending in good recovery.

NENAGH; Nenagh, W.—Vaccination delayed owing to whooping-cough and measles early in the quarter, and some scarlatina later on.

NENAGH; Silvermines.—Measles and whooping-cough prevalent.

TIPPERARY; Grean, part of.—See note under head of Limerick county.

TIPPERARY; Tipperary, W.—There have been some isolated cases of scarlatina, most of them not of a very serious type.

URLINGFORD; Kilcooly.—There were three cases of typhoid fever. Two were removed to hospital: the other was too bad to be removed when I saw it, but has made a good recovery. I have taken all sanitary precautions, and have had the house white-washed and places cleaned up through the district.

Waterford County.

CARRICK-ON-SUIR; Carrick-on-Suir, part of.—See note under head of Tipperary County.

DUNGARVAN; Dungarvan, W.—During the quarter I ordered the removal of seven patients suffering from typhoid fever, from different parts of this district, to the union hospital.

DUNGARVAN; Seskinan.—One case of fever.

KILMATHOMAS; Kilmathomas, W.—One case of diarrhoea imported from an adjoining district (Rathgormuck).

WATERFORD; Waterford, No. 1 W.—The large infantile mortality was due to a severe form of diarrhoea which was prevalent during the quarter.

YOUGHAL; Ardmore.—Whooping-cough prevalent.

YOUGHAL; Clashmore.—Among the deaths registered was that of a labourer's widow whose age was stated to be "about

95 years;" also that of a labourer of "about 60," certified to have been caused by tetanus of fourteen days duration, after a slight wound of one of the toes accidentally self-inflicted while cutting a corn. How the wound had become infected—by the knife, through the hands, or directly from infected soil—could not be ascertained.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Crumlin*.—Had a few cases of influenza, but none severe or fatal.

ANTRIM; *Randalstown*.—Two deaths registered of persons 93 and 96 years. One case of enteric fever, which came from Belfast.

BALLYCASTLE; *Cushendall*.—Vaccination entirely postponed owing to the prevalence of whooping-cough.

BALLYMENA; *Ballymena, W.*—One case of typhoid fever removed to workhouse hospital. Several cases of measles

BALLYMENA; *Clogh*.—A number of cases of whooping-cough, from which no deaths have been registered.

BALLYMENA; *Toome*.—There were two deaths from typhoid, one in a case imported from Belfast. I have under treatment at present two more cases, also from Belfast, both doing well. The usual disinfectants are being used, and the disease is not spreading. A few mild cases of influenza; with these exceptions the district is very healthy.

BELFAST; *Belfast, No. 9*.—Several cases of typhoid fever occurred, most of whom were sent to hospital. Diarrhoea prevalent amongst infants and children particularly.

LARNE; *Ballycarry*.—Scarlet fever and whooping-cough prevalent.

LARNE; *Waterfoot*.—Whooping-cough prevalent, and vaccination in consequence entirely postponed.

LISBURN; *Glenavy*.—A local outbreak of typhoid, evidently contracted outside the district, caused one death at home, and one in hospital, and fortunately did not spread outside the one family.

LISBURN; *Lisburn, part of, W.*—There have been a few cases of scarlatina, but no deaths have occurred. One death from enteric fever, and also one death from typhus fever, which, however, was admitted to hospital from another district.

Armagh County.

ARMAGH; *Blackwatertown*.—Whooping-cough has been very prevalent; two deaths were registered due to it with complications, and vaccination had to be postponed in a number of cases, on account of it.

ARMAGH; *Loughgall*.—Bronchial catarrh has been prevalent amongst children, also varicella (chickenpox).

ARMAGH; *Markethill*.—Whooping-cough and measles have been prevalent, but caused no death.

BANBRIDGE; *Tanderagee*.—Two cases of puerperal septicæmia, one of which cases was fatal on 20th July.

CASTLEBLAYNEY; *Newtownhamilton, part of*.—Pertussis (whooping-cough) still very prevalent. The water supply (public) of the town is most inadequate.

DUNDALK; *Barronstown, part of*.—See note under head of Louth County.

NEWRY; *Meigh*.—One case of typhoid fever was imported from another district, but the disease has not spread.

NEWRY; *Mullaghglass*.—In one portion of district there are a few cases of whooping-cough of a severe type.

NEWRY; *Pointzpass*.—One death occurred from whooping-cough, in which no medical man had been called in.

Cavan County.

BAILIEBOROUGH; *Termon*.—One case of scarlatina, and one of typhus.

COOTEHILL; *Drum, part of*.—One death registered at 102 years. There were several cases of jaundice in children, due to catarrh of the bile duct.

COOTEHILL; *Tullyvin*.—Three deaths from phthisis. One from gangrene of lung.

OLDCASTLE; *Ballyjamesduff*.—There has been one death registered from German measles, and two deaths from supposed German measles, but as no medical man saw the latter two, and the parents only thought it a cold, with a slight rash, bronchitis, probably was the immediate cause.

Donegal County.

BALLYSHANNON; *Ballyshannon, W.*—Vaccination neglected by parents.

DONEGAL; *Dunkineely*.—One case of whooping-cough, seen 29th September.

DONEGAL; *Pettigoe*.—Pertussis (whooping-cough) has appeared within past week. Sanitary accommodation in Pettigoe deficient.

DUNFANAGHY; *Dunfanaghy, W.*—There was an outbreak of enteric fever in the town of Dunfanaghy in the month of July. Six cases occurred in the town, and two or three others in outlying parts of the district. No death took place.

MILLFORD; *Fanad*.—There was a severe epidemic of whooping-cough during the first part of the quarter.

STRANORLAR; *Cloghan*.—One of the deaths registered reached the advanced age of 92 years.

Down County.

BANBRIDGE; Ballyward.—The epidemic of whooping-cough has ceased. Typhoid fever was imported from Belfast in two cases, and in one from Banbridge. This fever occurred in three other cases, without being traced to any cause outside the district.

BELFAST; Castlereagh, No. 1.—Typhoid fever has been very common all through this district, and chiefly arises amongst young children. Diarrhoea is also confined to that class. A few cases of whooping-cough appeared, but of a mild form.

BELFAST; Castlereagh, No. 4.—Diarrhoea among children was prevalent, but has greatly diminished. Typhoid fever is still prevalent.

DOWNPATRICK; Ballynahinch.—A mild epidemic of whooping-cough exists in some parts of the district, but for so far no deaths have resulted therefrom.

DOWNPATRICK; Clough.—Whooping-cough prevalent.

DOWNPATRICK; Killyleagh.—During the last month of the quarter an epidemic of diarrhoea occurred among young children. Only in one case did the disease prove fatal. I have seen a few cases of whooping-cough, which were confined to one part of the district.

KILKEEL; Rosstrevor.—The ages of the persons, 60 and upwards, whose deaths were registered, were 100, 93, 76, 75, and 70. The whooping-cough case was an imported one.

LISBURN; Lisburn, part of.—See note under head of Antrim County.

LISBURN; Saintfield.—One death registered was of a male aged 93 years.

NEWRY; Newry, No. 2.—Measles has disappeared.

NEWTOWNARDS; Bangor.—One death registered as that of a woman aged 93 years.

NEWTOWNARDS; Greyabbey.—Measles prevalent in Portavogie, Ballyhalbert division. No death. No case recently reported, but prevailed during first two months of quarter. A sore throat of an infective type amongst children in Ballywalter and Greyabbey divisions, especially Ballywalter. One died from subsequent laryngitis—cause unknown.

NEWTOWNARDS; Kilmoody.—A few (6) isolated cases of typhoid fever imported from Belfast.

NEWTOWNARDS; Newtownards, W.—There are a great number of children suffering from measles in this town at present. I have since the end of August attended 63 dispensary patients suffering from this disease.

Fermanagh County.

BALLYSHANNON; Belleek.—Only one case of typhoid fever came under my observation, and there were three more children in the house in which this fatal case occurred, and none of them, as far as I know, took the disease.

CLONES; Rosslea, part of.—As there were a good many cases of pertussis (whooping-cough) the number of successful primary vaccinations is somewhat below the average.

IRVINESTOWN; Clonelly.—Two cases of typhoid fever. An outbreak of pertussis (whooping-cough) during past week.

IRVINESTOWN; Ederney.—Whooping-cough has been prevalent, but is now on the decline.

LISNASKEA; Lisnaskea, W.—Some cases of scarlatina, causing one death.

LISNASKEA; Maguiresbridge.—District now free of scarlet fever, of which we had two cases at end of last quarter.

Londonderry County.

COLERAINE; Garvagh.—Whooping-cough is general at present with a good deal of complications (pneumonia and bronchitis). A few cases of measles lately, but not becoming general. A considerable number of cases of pleurisy and pneumonia in adults.

LIMAVADY; Dungiven.—Three cases of typhoid fever occurred, one died, the other two are convalescent. The houses in which these diseases originated have been disinfected.

LONDONDERRY; Claudy.—A few cases of whooping-cough have come under my care. The epidemic was confined to one portion of the district, and was the cause of one death.

LONDONDERRY; Londonderry, No. 1.—The rather severe epidemic of diarrhoea which prevailed has almost disappeared.

MAGHERAFELT; Moneymore.—Two cases of scarlatina in one family, which are being kept isolated, and I do not expect any extension of the disease.

Monaghan County.

CARRICKMACROSS; Raferagh.—Only eight deaths have occurred out of a population estimated at about 4,500. This represents a death-rate of (approximately) 7 per 1,000 per annum. Four deaths were at the ages of 60, 64, 87, and 95 years respectively. One case of scarlet fever occurred in a house, several of whose occupants suffered from that disease four years ago. The subject of the present attack was at that time absent from home.

CASTLEBLAYNEY; Castleblayney, W.—Two cases of diphtheria were attended; the patients are making satisfactory recovery, and the disease is not spreading.

CASTLEBLAYNEY; *Newtownhamilton, part of*.—See note under head of Armagh County.

CLOGHER; *Aughnacloy, part of*.—A good many cases of whooping-cough in county Monaghan, so that little vaccination could be done.

CLONES; *Rosslea, part of*.—See note under head of Fermanagh County.

COOTEHILL; *Drum, part of*.—See note under head of Cavan County.

DUNDALK; *Louth, part of*.—See note under head of Louth county.

MONAGHAN; *Glaslough*.—Whooping-cough is very prevalent, but no deaths have been registered from it up to the present.

MONAGHAN; *Kilmore*.—A widely scattered outbreak of whooping-cough. One death from that disease.

MONAGHAN; *Monaghan, W.*—Some cases of mumps, which however have now disappeared.

Tyrone County.

ARMAGH; *Caledon*.—No deaths, though whooping-cough has been prevalent.

CLOGHER; *Aughnacloy, part of*.—See note under head of Monaghan County.

CLOGHER; *Clogher, W.*—Owing to harvest operations a number of children were not brought in for vaccination.

OMAGH; *Fintona*.—A few isolated cases of mild scarlatina, and one case of enteric fever.

OMAGH; *Omagh, No. 1, W.*—There were a large number of cases of scarlatina, of a mild type, only one death registered from it.

STRABANE; *Strabane, W.*—Typhoid fever has appeared in town; ten cases sent to hospital.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Killaan*.—Whooping-cough has now disappeared, and there are no epidemic diseases. There have been several cases of English cholera, one of an extremely severe type, in fact resembling Asiatic cholera in its symptoms.

BALLINASLOE; *Laurencetown*.—Of the ten deaths registered five were of persons aged 80 years and upwards.

BALLINROBE; *Cappaghduff, part of*.—A few cases of influenza. An epidemic of measles, which is now on the decline.

CLIFDEN; *Inishbofin*.—One of the deaths was of a person 74 years of age. There were a few cases of simple ill-defined fever, but no deaths resulted, nor any epidemic.

CLIFDEN; *Roundstone, No. 2*.—A few cases of whooping-cough.

GALWAY; *Turloughmore*.—Both measles and whooping-cough were prevalent here during the quarter.

GLENNAMADDY; *Glennamaddy, W.*—Vaccination backward owing to whooping-cough.

GLENNAMADDY; *Williamstown*.—Whooping-cough made its appearance about middle of quarter, and nearly the whole of the district is now infected with it. So far only one death has occurred from the disease. The prevalence of whooping-cough accounts for the small number of vaccinations.

LOUGHREA; *Bullaun*.—Of the deaths registered two were at the age of 77 years.

LOUGHREA; *Woodford*.—There has been an outbreak (not yet done with) of typhus fever in the mountain district about a mile south-west of Woodford. Some twenty-three cases have come under my notice in that portion of the parish which is included in my own district. There has been one death, but this is not yet registered, owing to the remainder of the family being still in quarantine.

OUGHTERARD; *Lettermore*.—Two deaths were registered at 100 years of age. Whooping-cough is still in this district, but the epidemic is dying out. Four deaths from it were registered during the quarter as compared with fourteen during the June quarter.

PORTUMNA; *Eyrecourt*.—The district is almost free from contagious disease.

TUAM; *Abbey*.—Measles, scarlatina, and whooping-cough very prevalent.

TUAM; *Headford*.—Diarrhoea has been very prevalent.

Leitrim County.

BALLYSHANNON; *Kinlough*.—One death at the remarkable age of 91 years has been registered.

MOHILL; *Carrigallen*.—There were a few cases of scarlatina, but no tendency to an epidemic. There are a few cases of pertussis (whooping-cough), of which we had a very severe epidemic last spring.

Mayo County.

BALLINROBE; *Ballinrobe, W.*—There occurred one case of modified smallpox in the district. The patient stated that he was inoculated by a quack when a child. Every sanitary precaution was adopted and the disease did not spread.

BALLINROBE; *Cappaghduff, part of*.—See note under head of Galway County.

BALLINROBE; *Hollymount*.—One death registered at 100 years; one at 90, 80, and 79 years each; and two at 78 years. An

outbreak of enteric fever, twenty-three cases in all, occurred in the village of Hollymount. All the cases are now either well or convalescent. No fresh case for over four weeks.

BELMULLET; Bangor. — Six cases of measles occurred in an isolated part of the district, but the disease did not spread.

CASTLEBAR; Castlebar, No. 2. — Of the thirteen deaths registered, one each was at 90, 87, 81, 80, and 78 years, and two at 75 years of age.

CLAREMORRIS; Ballyhaunis. — Whooping-cough, of exceptional severity, frequently complicated with lung trouble, prevailed extensively, and caused the deaths of many infants. It is gradually disappearing.

KILLALA; Killala, W. — With the exception of influenza the district has been practically free from infectious disease. Two cases of typhus fever occurred in one village, but the disease did not spread.

SWINEFORD; Kilkelly. — Vaccination delayed, owing to prevalence of a mild form of whooping-cough. The people have been very busy at the harvest work, and have not brought in their children.

WESTPORT; Achill. — Sanitary state fair, and a great many have been noticed to cleanse and lime-wash. Vaccination still backward; very difficult to make parents present children.

Rosecommon County.

BALLINASLOE; Creagh. — Vaccination in a backward state.

CASTLEREAGH; Castlephunket. — Measles prevailed, but no fatal cases have come to my knowledge.

CASTLEREAGH; Castlereagh, W. — Measles and whooping-cough prevailed much.

STROKESTOWN; Strokestown, W. — One death registered at the age of 96—an army pensioner.

Sligo County.

SLIGO; Carney, No. 2. — Vaccination backward, owing to August being so very wet.

Price One Shilling.

Marriages:—JULY, AUG., SEPT., 1897. **Births & Deaths:**—OCT., NOV., DEC., 1897.

*General Register Office, Charlemont House,
Dublin, 27th January, 1898.*

During the quarter ended 31st December last, there were registered in the 801 Registrars' Districts in Ireland 24,789 births—a number equal to an annual birth-rate of 21·8 in every 1,000 of the estimated population—and 18,476 deaths, representing an annual rate of 16·2 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 4,586 persons emigrated. An increase of 1,727 would, therefore, appear to have taken place in the population during the quarter. The population estimated to the middle of the year 1897, was 4,551,631.*

In England last quarter, the birth-rate represented was 29·1 in every 1,000 of the estimated population, and the death-rate 17·1 per 1,000.

The birth-rate in Ireland for the quarter is 0·5 over the average rate for the corresponding quarter of the ten years 1887–96, but 1·0 under the rate for the fourth quarter of the year 1896. The deaths are less than those registered in the corresponding quarter of 1896 to the extent of 806; the death-rate is 0·9 under the rate for that quarter, and 0·7 under the average for the fourth quarter of the ten years 1887–96.

Compared with those for the corresponding quarter of 1896, the returns of pauperism, furnished by the Local Government Board, show an

* See page 283.

increase of 675 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 432 in the average number of persons on out-door relief.

Compared with the averages for the fourth quarter of the ten years 1887-96 the number of Workhouse inmates shows an increase of 443, and the number of persons on out-door relief a decrease of 4,824, the total under both heads being 4·3 per cent. below the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 2·8 per cent.

The annual marriage-rate (4·6 per 1,000 of the population) represented by the marriages registered during the third quarter of 1897 is 0·5 over the average rate for the corresponding quarter of the ten years 1887-96.

TABLE I.—Showing for each **Province** and **County** in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of **Marriages** registered during the quarter ended 30th September, 1897, and by the **Births** and **Deaths** registered in the Quarter ended 31st December, 1897.

MARRIAGES.

The marriages (5,188) registered in Ireland during the third quarter of 1897 are equivalent to an annual rate of 4·6 per 1,000 of the estimated population, being 0·1 over the rate for the corresponding quarter of 1896, and 0·5 over the average rate for the third quarter of the ten years 1887-96. Of the total marriages 3,254 were registered under the provisions of the 26 & 27 Vic., cap. 90, and 1,934 under the 7 & 8

* The rates for the total of Ireland are calculated on the estimated population in the middle of the year; those for the provinces and counties on the population according to the Census of 1891.

Vic., cap. 81; the former number being equal to 3·8 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·9 per 1,000 of the members of all other religious persuasions. Compared with the averages for the third quarter of the preceding ten years the rate for Roman Catholic marriages shows an increase of 0·4, and that for all other marriages an increase of 0·5. It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages are celebrated in the first quarter, while, as regard other marriages, there is generally but little difference in the numbers registered in the several quarters.

TABLE II.—Showing by **Quarterly Periods**, the **Marriages** registered in Ireland in each of the ten years 1887–96, and the first, second, and third quarters of 1897.

BIRTHS.

The number of births registered during the quarter ended 31st December last was 24,739—12,710 boys and 12,079 girls—being equal to an annual ratio of 1 in every 45·9, or 21·8 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1887–96 was 24,867, equivalent to an annual rate of 21·3 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 21·2 per 1,000 of the population, according to the Census of 1891; Munster, 19·5; Ulster, 22·7; and Connaught, 19·7.

The highest county birth-rate* is 29·3 for Antrim, and the lowest 16·0 for Monaghan. Of the intermediate rates the highest five are—Down, 26·9; Dublin, 25·9; Mayo, 21·6; King's, 21·4; and Armagh, 21·1; and the lowest five are—Cavan, 16·5; Fermanagh, 16·7; Longford, 16·7; Carlow, 16·9; and Roscommon, 17·0.

* See note on foregoing page.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 18,476—9,176 males and 9,300 females—affording an annual ratio of 1 in every 61·6, or 16·2 per 1,000 of the estimated population: the average rate for the corresponding quarter of the ten years 1887–96 was 16·9 per 1,000.

The death-rate in Leinster was 18·2 per 1,000 of the population according to the Census of 1891; in Munster, 14·5; in Ulster, 16·2; and in Connaught, 12·6.

The county death-rates* range from 11·5 in Leitrim to 23·1 in Dublin. Between these rates the lowest five are—Fermanagh, 11·6; Sligo, 11·8; Kerry, 11·9; Roscommon, 12·0; and Donegal, 13·0; and the highest five are—Antrim, 20·1; King's, 18·9; Down, 17·5; Armagh, 16·4; and Louth, 16·1.

TABLE III.—Showing by **Quarterly Periods**, the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1887–96, and the average number for that period; also the number registered during each quarter of the year 1897:—

Average, 1887–96,	23·9	24·3	22·3	21·3	22·9	22·1	18·6	14·7	16·9	18·1
1897,	24·7	24·1	23·0	21·8	23·4	22·9	19·1	15·4	16·2	18·4

Ages.—Of the 18,476 deaths registered last quarter, 2,636, or 14·3 per cent., were of children under 1 year old; and 7,482, or 40·5 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 106·3 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 14·3 per cent. of the total deaths registered therein; in Munster, 13·6 per cent.; in Ulster, 15·1 per cent.; and in Connaught, 13·0 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 37·2 per cent.; in Munster to 42·5 per cent.; in Ulster to 38·8 per cent.; and in Connaught to 49·4 per cent. of the total deaths registered in the province.

* See note on page 266.

HEALTH OF THE PEOPLE.

As already stated, the general death-rate in Ireland for last quarter is below the average for the December quarter of the preceding ten years, and is also under that for the fourth quarter of 1896. The rate represented by the deaths from the principal zymotic diseases* is about the average for the December quarter, as an increased mortality from whooping-cough, diphtheria, and enteric fever, counterbalances a decline in deaths from other diseases of this class.

Diseases.—The total number of deaths from the principal zymotic diseases* registered during last quarter is 1,261, equivalent to an annual rate of 1.1 per 1,000 living, being 0.4 under the rate for the preceding three months, and about the average rate for the fourth quarter of the ten years 1887–96.

Small-pox.—No death from small-pox was registered during last quarter. In the preceding three months one death occurred, and in the first quarter of the year there were two fatal cases, but these were the only deaths from this cause during 1897.

Measles.—There were only 74 deaths from measles; this number, although 11 over that for the preceding quarter, is 207 under that for the second quarter, 547 under the number for the first three months of the year, and 73 below the average for the December quarter of the five years 1892–6. In the corresponding quarter of 1896 the deaths from measles amounted to 153. The 74 deaths comprise 10 in Leinster, 32 (including 21 in Cahersiveen Union, 13 of which, representing an annual rate of 17.6 per 1,000 of the population, were in Valencia District,) in Munster; 17 in Ulster (including 8 in Newtownards Union), and 15 in Connaught.

Scarlatina.—Deaths from scarlatina, which had fallen from 154 in the March quarter of the year to 113 in the second, and to 90 in the third, rose to 131 in the last three months, but this number is 29 below the average for the December quarter. Of the 131 deaths, 72 were registered in Leinster (33 being in the Dublin Registration District, where 26 deaths occurred in the preceding quarter); 29 in Munster (7 of which took place in Fermoy Union, and 10 in Tipperary Union); 24 in Ulster; and 6 in Connaught.

Typhus.—Only 27 deaths are ascribed to typhus. This number is 4 over that for the preceding three months, but 25 below the average for the fourth quarter of the five years 1892–6. No deaths from typhus were registered in Leinster; in Munster there were 11 (including 5 in Dungarvan Union); in Ulster, 7; and in Connaught, 9.

Whooping-cough.—The mortality from this disease was considerable and widespread, and although the deaths are below those for each of the three preceding quarters of the year, the number registered, 333, is 111 above the average for the corresponding period of the five years

* See note (†) on page 271.

1892-6. In Leinster there were 82 deaths; in Munster, 86; in Ulster, 112; and in Connaught, 53. The Unions in which 10 or more deaths were due to this cause are, Belfast, 24; Carrick-on-Suir, 22; Mullingar, 11; Parsonstown, 13; and Swineford, 12: about one-fourth of the total occurring in these five Unions, and the remaining deaths being distributed over 78 Unions.

Diphtheria.—The total number of deaths from diphtheria is 100, or about the average (98) for the fourth quarter of the preceding five years. Of the 100 deaths, 41 are distributed as follows:—Belfast Union, 18; Cork, 6; Dublin South, 11; and Mallow, 6.

Simple continued and ill-defined Fever.—Only 24 deaths were returned under this heading, viz.:—9 in Leinster; 6 in Munster; 4 in Ulster; and 5 in Connaught. The 24 deaths are 13 below the average.

Enteric Fever.—As heretofore, many deaths resulted from enteric fever in the City of Belfast and the Dublin Registration District, and these areas furnish 60 per cent. of all the deaths from this cause, the annual death-rate represented by the 97 deaths in the former being 1·4 per 1,000 of the estimated population of that city, and the rate in Dublin being 1·1 per 1,000. The total number of deaths (313) is 112 in excess of the average for the corresponding quarter of the five years 1892-6, and 135 over the number for the fourth quarter of 1896. There were 114 deaths in Leinster; 31 in Munster; 161 in Ulster; and 7 in Connaught.

Diarrhoea.—Two hundred and fifty-two deaths, or 21 below the average, for the December quarter were returned under this heading during last quarter. In Leinster 70 were registered; in Munster, 55; in Ulster, 110; and in Connaught, 17. In Belfast Union there were 33 deaths from this disease; in Cork, 21; in Dublin, North, 15; and in Dublin, South, 21.

Simple Cholera.—The number of deaths ascribed to this cause is 7, viz.:—6 in Leinster, and 1 in Connaught.

Hydrophobia.—No deaths from this cause were registered.

The Registrars, in their Notes, report the presence of the following diseases:—Measles in 18 districts, German measles in 4, scarlatina in 33, whooping-cough in 68, diphtheria in 11, fever in 37 (typhus 6, simple continued and ill-defined fever 3, and enteric 28), influenza in 16, and mumps in 3.

Inquests.—There were 689 inquests reported to the Registrars during the quarter, this number being equal to 1 in every 27 of the total deaths registered.

In Leinster there was 1 inquest to every 26 deaths registered, in Munster 1 to 26, in Ulster 1 to 25, and in Connaught 1 to 45.

Deaths in Public Institutions.—Of the 18,476 deaths registered 3,054, or 16·5 per cent., occurred in public institutions. In Leinster the percentage was 23·1, in Munster 21·3, in Ulster 10·0, and in Connaught 10·9.

The following table (TABLE IV.) shows the number of deaths from the principal zymotic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1897, and in each of the eight quarters immediately preceding, with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Zymotic Diseases.										Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Simple and Ill-defined Fever.	Enteric Fever.	Diarrhoea.	Simple Cholera.

URBAN SANITARY DISTRICTS.

Separate statistics for the Urban Sanitary Districts are given in Tables V. and VIII.

The death-rate for last quarter in these districts, which contain nearly one-fourth of the total population of the country, was 21·7, and the birth-rate 29·0 per 1,000 of the population, according to the Census of 1891; in the remainder of the country the death-rate was 13·8 and the birth-rate 18·6 per 1,000.

The annual rate represented by the deaths from the Principal Zymotic Diseases† in the Urban Sanitary Districts during the quarter was 2·1 per 1,000 of the population, according to the Census of 1891: in the remainder of the country the rate was 0·8 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FOURTH QUARTER of the year 1897, in the DUBLIN REGISTRATION DISTRICT, and in each of the PROVINCIAL URBAN SANITARY DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—“The Dublin Registration District,” which consists of the City of Dublin and its Suburban Districts, comprises the Urban Sanitary Districts of Dublin, Clontarf, Drumcondra Clonliffe and Glasnevin, Kilmarnham, Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the twenty-two Urban Sanitary Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the thirteen weeks ending Saturday, 1st January, 1898.

‡ The rates for Belfast have been calculated on the population estimated in the middle of the year 1897, the area adopted being that of the city as constituted at the beginning of the year.

VACCINATION.

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1897, there were 22,204 persons successfully vaccinated; in 3,308 cases the operation was postponed, and 56 children were reported as insusceptible of vaccination. The deaths of 1,586 unvaccinated children under 3 months old were registered during the quarter, making a total of 27,154 children with regard to whom particulars as to vaccination were ascertained.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st December last, was 4,586 (1,915 males and 2,671 females), being 51 more than in the corresponding quarter of the year 1896, but 2,191 under the average number for the fourth quarter of the ten years 1887-96.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November, and December, in 1896 and 1897:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Total.

Total, .	1,724	1,915	191	—	2,811	2,671	—	140	4,535	4,586	51	—

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $6\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of 1896 the average price was $5d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 15s. per cwt., being 2s. 4d. over the average for the corresponding quarter of 1896. In the fourth quarter of 1887 the average price was 14s. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3s. 3d. to 4s. 4d. In the fourth quarter of 1896 the average prices were 2s. 1d. to 3s. 1d., and in the corresponding quarter of 1887 they were 2s. 4d. to 2s. 11d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 43s. to 53s. per cwt. In the corresponding quarter of 1896 the average prices were from 43s. to 52s., and in the fourth quarter of 1887 they were from 42s. 6d. to 54s. 6d.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 17s. to 18s. per ton.

The highest price of $2\frac{3}{4}$ per cent. Consols at the Dublin Stock Exchange for the quarter was £113 $\frac{3}{4}$, and the lowest £111 $\frac{1}{4}$. The minimum annual rate of discount charged on Irish bills at the Bank of Ireland which had been raised to $3\frac{1}{2}$ per cent. on 23rd September, was further raised to 4 per cent. on 15th October.

NOTE—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Registrar.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1897 was 43,401, or 675 above the average for the corresponding period in 1896.

The average weekly number of persons receiving out-door relief during the quarter was 52,939, being 432 under the average for the fourth quarter of 1896.

Of the persons receiving in-door relief during the fourth quarter of 1897, an average number of 1,403 in each week were located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1896 the average weekly number was 1,405.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1897, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Rolands, Limited.

(b) Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

(c) Messrs. Manders and Co.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the fourth quarter of the years 1892-97, respectively,

* Latitude 53° 21' 44' 65" north; longitude 6° 21' 6' 35" west. Height above the sea 162·2 feet. The barometrical readings have been corrected for altitude, and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (See Table on page 282):—

The mean height of the barometer during the fourth quarter of 1897 was 30·008 inches, against an average of 29·878 inches for the corresponding quarter of the five years 1892–96; the highest reading (30·675 inches) was on the 21st November, at 9 P.M., air calm, and the lowest (28·846 inches) on the 29th December, at 9 P.M., wind S.S.W.

The mean temperature of the air during the quarter was $47\cdot3^{\circ}$, or $4\cdot0^{\circ}$ over the average for the fourth quarter of the five years 1892–96. The maximum temperature was $64\cdot5^{\circ}$, and the minimum $26\cdot8^{\circ}$. The maximum heat in sun was $114\cdot7^{\circ}$.

Rain or snow fell on 51 days during the quarter. The rain-fall measured 7·765 inches, against an average of 7·499 inches for the fourth quarter of the five years 1892–96. The greatest monthly rainfall was in November, when 3·780 inches were registered.

The wind blew on 21 days from S.W., on 13 days each from S.E. and W., on 10 days from E., on 7 days from S., on 5 days each from N. and N.W., and the air was calm on 18 days at 9 A.M.

October.—The mean height of the barometer during this month was 30·127 inches; the highest reading (30·591 inches) was on the 21st, at 9 A.M., air calm; and the lowest (29·166 inches) on the 15th, at 9 A.M., wind S. The mean temperature of the air was $51\cdot5^{\circ}$, the maximum registered was $64\cdot5^{\circ}$, and the minimum $32\cdot9^{\circ}$. The 20th was the warmest day, and the 12th the coldest night. The mean of the dry bulb was $51\cdot0^{\circ}$, and of the wet bulb $48\cdot9^{\circ}$. The maximum heat in sun was $114\cdot7^{\circ}$. The total amount of sunshine recorded was 126·5 hours, the greatest daily amount being 10·3 hours on the 7th. The maximum ozone was ·9, the minimum ·1, and the mean ·4. Rain or snow fell on 13 days. The rain-fall measured 1·740 inches; the greatest amount in 24 hours was ·560 inch on the 14th.

November.—The mean height of the barometer during this month was 30·137 inches; the highest reading (30·675 inches) was on the 21st, at 9 P.M., air calm; and the lowest (29·367 inches) on the 30th, at 9 P.M., wind W. The mean temperature of the air was $46\cdot7^{\circ}$, the maximum registered was $61\cdot1^{\circ}$, and the minimum $29\cdot8^{\circ}$. The 11th was the warmest day, and the 15th the coldest night. The mean of the dry bulb was $46\cdot5^{\circ}$, and of the wet bulb $45\cdot0^{\circ}$. The maximum heat in sun was $101\cdot7^{\circ}$. The total amount of sunshine recorded was 59·8 hours, the greatest daily amount being 7·5 hours on the 3rd. The maximum ozone was 1·0, the minimum ·0, and the mean ·5. Rain or snow fell on 17 days. The rain-fall measured 3·780 inches; the greatest amount in 24 hours was ·820 inch on the 13th.

December.—The mean height of the barometer during this month was 29·759 inches; the highest reading (30·574 inches) was on the 21st, at 9 P.M., air calm; and the lowest (28·846 inches) on the 29th, at 9 P.M., wind S.S.W. The mean temperature of the air was $43\cdot6^{\circ}$, the maximum registered was $56\cdot7^{\circ}$, and the minimum $26\cdot8^{\circ}$. The 27th and 30th were the warmest days, and the 22nd the coldest night. The mean of the dry bulb was $42\cdot9^{\circ}$, and of the wet bulb $40\cdot9^{\circ}$. The maximum heat in sun was $89\cdot3^{\circ}$. The total amount of sunshine recorded was 79·2 hours, the greatest daily amount being 6·6 hours on the 2nd. The maximum ozone was 1·0, the minimum ·1, and the mean ·6. Rain or snow fell on 21 days. The rain-fall measured 2·245 inches; the greatest amount in 24 hours was ·420 inch on the 28th.

THE YEAR 1897.

The total number of births registered in Ireland during the year 1897 (as returned by the Registrars) was 106,532, or 22·6 per 1,000 of the population estimated in the middle of the year, and the total number of deaths was 83,826, or 17·8 per 1,000. Of the 83,826 deaths, 6,132, equal to 1·3 per 1,000 living, were caused by one or other of the principal zymotic diseases.†

In the Urban Sanitary Districts, which contain nearly one-fourth of the total population, the birth-rate was 31·1 per 1,000 of the population; the death-rate (all causes) 25·0, and the zymotic death-rate 3·2 per 1,000. The corresponding rates for the remainder of the country are—births, 20·0; deaths from all causes, 15·6; and deaths from the principal zymotic diseases, 0·7.

According to the returns of Vaccination furnished by the Registrars there were 89,732 successful primary vaccinations performed during the year; in 3,308 cases, *during the last quarter*, the operation was postponed; 172 children were reported during the year as insusceptible of vaccination; and the deaths of 6,716 unvaccinated children under three months old were registered.

URBAN SANITARY DISTRICTS.

TABLE VIII.—BIRTHS and DEATHS registered during the YEAR 1897, in the DUBLIN REGISTRATION DISTRICT, and in each of the PROVINCIAL URBAN SANITARY DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of Deaths from each of the PRINCIPAL ZYMOTIC DISEASES.†

NOTE.—“The Dublin Registration District,” which consists of the City of Dublin and its Suburban Districts, comprises the Urban Sanitary Districts of Dublin, Clontarf, Drumcondra, Clonliffe and Glasnevin, Kilmainham, Rathmines and Rathgar, Penrroke, Blackrock, and Kingstown, and portions of the rural parts of the Poor Law Unions in which these Districts are situated. The details for it and for each of the fifteen Urban Sanitary Districts marked thus (•) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the fifty-two weeks ending Saturday, 1st January, 1898.

PROVINCES AND URBAN SANITARY DISTRICTS.	CENSUS STATISTICS OF DISTRICTS IN 1891.		BIRTHS.		DEATHS.		Annual Rate per 1,000 persons represented by		BIRTHS		DEATHS.													REGISTRATION, 1897.	
	Popula- tion.	Per- sons to an Acre.	From all Causes.		From Principal Zymotic Diseases.†		Total Number.	Under 1 year of Age.	At 60 years and up-wards.	Caused by Principal Zymotic Diseases :—													Inquest Cases.	Number in Public In-stitutions.	
			BIRTHS.	From all Causes.	From Principal Zymotic Diseases.†	Small-pox.				Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Simple continued and ill-defined Fever.	Enteric Fever.	Diarrhoea.	Cholera.

* At Valencia cloud amount is observed at 10 a.m. and 10 p.m. each day, and rainfall at 10 a.m.

NOTE.—From the beginning of the year 1890 the mean pressures shown in these tables have been given therefore they are not directly comparable with each other. If it be desired for any purpose to reduce temperature) are as follow:—Valencia + .050; Killarney, + .102; Parsonstown, + .191; Dublin

mentioned Seven IRISH STATIONS, in connexion with the METEOROLOGICAL OFFICE, kindly furnished by the METEOROLOGICAL COUNCIL.

At this Station Greenwich mean time is kept, but at the other Stations Local time is observed, corrected for instrumental error, and reduced to 32° Faht. as before, but not reduced to mean sea level, and them to the normal, the approximate corrections for the purpose (varying within slight limits with the pressure and City), +.058; *Markree Castle*, +.141; *Armagh*, +.224; *Londonderry*, +.090.

NOTE.—This table has been constructed for the years 1823 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-97—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81 and 1882-91 to allow for the discrepancy between the number thus arrived at for 1881 and 1891 respectively, and the population as shown by the Census in each of these years.

MARRIAGES Registered during the Quarter ending 30th September, 1897, in the PROVINCES, COUNTIES, and SUPERINTENDENT REGISTRARS' DISTRICTS (or POOR LAW UNIONS) of IRELAND; **BIRTHS AND DEATHS** Registered during the Quarter ending 31st December, 1897; Deaths from SMALL-POX, MEASLES, SCARLET FEVER, TYPHUS, WHOOPING-COUGH, DIPHTHERIA, SIMPLE CONTINUED AND ILL-DEFINED FEVER, ENTERIC FEVER, DIARRHŒA, and CHOLERA; also VIOLENT DEATHS,* INQUEST CASES, and DEATHS in PUBLIC INSTITUTIONS, Registered during the Quarter ending 31st December, 1897, in the PROVINCES, COUNTIES, SUPERINTENDENT REGISTRARS' DISTRICTS, and REGISTRARS' DISTRICTS of IRELAND; with a Return of **VACCINATIONS** for that Quarter.

ABSTRACT I.—PROVINCES AND COUNTIES.

Provinces and Counties.	Area, in Statute Acres.	Population in 1891.	Marriages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include														Deaths from				Deaths in Public Institutions.				Vaccination Return for the Quarter ending 31st Dec., 1897.				Total of the foregoing.																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																																
			Averages in the 10 years, 1887-96.	Registered in the quarter ending 31st Dec., 1897.	Averages in the 10 years, 1887-96.	Registered in the quarter ending 31st Dec., 1897.	Averages in the 10 years, 1887-96.	Registered in the quarter ending 31st Dec., 1897.	Children under 1 year of age.	Persons aged 60 years and upwards.	Small-pox.	Measles.	Scarlatina.	Typhus.	Whooping-cough.	Diphtheria.	Simple continued and ill-defined Fever.	Enteric Fever.	Diarrhoea.	Cholera.	Violence.*	Inquest Cases.	Number of successful primary Vaccinations.	Number of Cases in which Vaccination was postponed.	Number of Persons Inaccessible or of Vac-ination.	Number of Unvaccinated Children under 3 months old, whose deaths were registered during the quarter.

* The Registrars' Districts (801 in number) are Subdivisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names furnished under the Medical Charities Act.

⁴ The details concerning Births and Deaths in the above table for Districts marked thus (+) on pages 297 and 298 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 3rd October, 1897, to 1st January, 1898. With the exception of 70 deaths of persons from localities outside the "Dublin Registration District," the deaths in Public Institutions in these districts have been assigned to the respective districts from which the deceased were admitted.

tions in these districts have been assigned to the respective districts from which the deceased were admitted. The letter *W* denotes that the Registrar's District (or portion of a district) contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Zymotic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District or portion of District in the County.

I. PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly, part of*.—Deaths were registered of persons aged 77, 78, 84, 84, 84, 86, and 97 years.

CARLOW; *Carlow part of, W*.—Scarlatina of a mild type prevailed. A few cases of influenza also came under treatment.

SHILLELAGH; *Coolekenna and Hackets-town, part of*.—Of the 67 deaths registered during the year 24 were over 80 years of age.

Dublin County.

CELBRIDGE; *Lucan, part of*.—Influenza for the past month has been developing rapidly. It has now assumed the form of an epidemic. Notwithstanding the great increase of sickness the death-rate is very low.

DUBLIN SOUTH; *Palmerston*.—One of the cases of enteric fever complicated with diphtheria. In one scarlatina case acute nephritis and dropsy supervened, and in the other abscess of neck. The case of diarrhoea accompanied by teething.

RATHDOWN; *Blackrock and Stillorgan No. 2*.—With the exception of an epidemic of whooping-cough, the district was fairly healthy.

Kildare County.

BALTINGLASS; *Rathvilly, part of*.—See note under head of Carlow County.

CELBRIDGE; *Kilcock*.—Whooping-cough has been prevalent. One death occurred from the disease, a girl aged 10 years.

CELBRIDGE; *Lucan, part of*.—See note under head of Dublin County.

EDENDERRY; *Carbury*.—A large number of cases of influenza occurred, and a great many cases of mumps. One death from scarlatina, not yet registered.

EDENDERRY; *Rathangan, part of*.—Nearly all the deaths were amongst aged persons, the following ages being registered —78, 81, 83, 85, and 87 years. All died without a medical attendant. The informant of death at greatest age is only 7 years younger, signing register without glasses. They all resided in proximity to the Bog of Allen.

NAAS; *Kildare*.—The district is very healthy at present, only two cases of typhoid, fully recovered.

NAAS; *Naas and Carragh, W*.—There has been a slight epidemic of diphtheria occurring only in two houses which have been thoroughly disinfected, and no reappearance of the malady. The sanitary arrangements are not all that could be desired, but a new system is being arranged for with a good water supply.

Kilkenny County.

CALLAN; *Callan, W*.—Two deaths have been registered at the age of 95, and one at 87 years.

CARRICK-ON-SUIR; *Piltown*.—Whooping-cough is prevalent.

KILKENNY; *Tullaroan*.—There has been an epidemic of typhoid fever. Every precaution has been taken by the Medical Officer of Health, also by the sub-Sanitary Officer.

King's County.

EDENDERRY; *Rathangan, part of*.—See note under head of Kildare County.

PARSONSTOWN ; Killyon.—Whooping-cough prevalent throughout the district, but no deaths from that cause have been registered yet.

PARSONSTOWN ; Kinnitty.—Two families have been attacked with scarlatina. Four members of one, and seven of another. In the family first attacked the disease was of a mild type, but in that last affected two members out of the seven succumbed to a severe form of the affection, bronchitis complicating one of the fatal cases. The remaining members are now convalescing favourably. I have taken every precaution to prevent the disease from spreading.

PARSONSTOWN ; Parsonstown, W.—Whooping-cough universally prevalent. Several cases of scarlatina.

TULLAMORE ; Kilbeggan, part of.—Whooping-cough epidemic.

TULLAMORE ; Tullamore, W.—Enteric fever of very asthenic type, and complicated with pneumonia, broke out more actively during quarter, attributed to bad sanitation, overcrowding, unhealthy surroundings, and filth, mostly confined to one quarter of town.

Louth County.

DUNDALK ; Barronstown, part of.—There was one case of typhoid fever in the beginning of the quarter, which I had removed to the Dundalk Union Fever Hospital. I had the house thoroughly disinfected, and there has been no recurrence of the disease. I have recently been called to a case of scarlet fever. I have the patient (a child of 6 years old) isolated as well as is possible in a small thatched cottage, and up to the present no other members of the family have contracted the malady.

DUNDALK ; Louth, part of.—During past quarter two cases of scarlatina came under my notice living in different parts of the district; they were both imported from other districts; they made good recovery, and the fever did not spread. One case of death from typhoid was registered; the infection was brought by a patient from Belfast, suffering from the fever. Several cases of pneumonia and pleurisy came under my notice. Bronchitis very prevalent in old and young. Also three cases of English cholera were attended by me.

DUNDALK ; Ravensdale.—Of the 12 deaths registered 6 were 75 years and upwards, and of these 6, 1 was 80, 2 were 90, and one 91 years.

Meath County.

DROGHEDA ; St Mary's, W.—Scarlatina and pertussis (whooping-cough) prevailed during the quarter, but both have now almost ceased: all vaccination was postponed when they appeared,

DROGHEDA ; Stamullen.—With the exception of five mild cases of scarlatina, and one of typhoid fever, the district has been in a healthy state.

KELLS ; Kilskeer.—German measles was rather prevalent during the quarter.

OLDCASTLE ; Oldcastle, W.—Vaccination is in a rather backward condition owing to the prevalence of scarlatina and whooping-cough during the quarter ended 30th September last.

Queen's County.

ABBEYLEIX ; Ballinakill.—The death of a woman registered aged 98 years.

CARLOW ; Carlow, part of.—See note under head of Carlow County.

Westmeath County.

MULLINGAR ; Ballynacarriggy. Vaccination has been irregular for the past half-year owing to a severe epidemic of whooping-cough, and prevalence of wet weather.

MULLINGAR ; Castletown Geoghegan.—With the exception of whooping-cough the district is free from zymotic disease.

MULLINGAR ; Mullingar, W.—Whooping-cough prevailed during the past quarter, and although generally assuming a mild type, yet it claimed a few victims from amongst children of tender years.

TULLAMORE ; Kilbeggan, part of.—See note under head of King's County.

Wexford County.

ENNISCORTHY ; Enniscorthy No. 1.—No vaccination on account of whooping-cough.

ENNISCORTHY ; Enniscorthy, No. 2, W.—No vaccination, as most of the children were recovering from whooping-cough, and therefore unfit for vaccination.

NEW ROSS ; Fethard, No. 2.—Few vaccinations owing to the severity of past months.

WEXFORD ; Bridgetown.—Whooping-cough is very prevalent.

WEXFORD ; Crossabeg.—Owing to the unfavourable weather the number of vaccinations was very small.

WEXFORD ; Taghmon and Glynn.—There has been a marked increase in the number of children vaccinated. The proportion of births being far in excess of the number of deaths for the past twelve months.

Wicklow County.

RATHDOWN ; Delgany.—Advanced ages in deaths, respectively, 65, 68, 71, 73, 73, 75, 84, 86, 88 years,

RATHDRUM; Newcastle.—Pertussis (whooping-cough) being prevalent in the beginning of quarter, and the subsequent inclemency of the weather accounts for the few vaccinations performed.

SHILLELAGH; Coolkenna and Hacketstown, part of.—See note under head of Carlow County.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; Ballyvaghan, W.—The well authenticated death of a labourer at the advanced age of 103 years is registered.

ENNISTIMON; Ennistimon, W.—I attended a few cases of German measles.

ENNISTIMON; Milltown Malbay—I registered during the quarter the death of a woman 117 years old. I saw her ten days before death, and her sight, hearing, and intellect were wonderfully good. About a month previous to this I met her walking in front of the cottage she lived in.

KILLADYSERT; Ballynacally, W.—Four cases of sore throat, questionably diphtheritic, are registered; and ulcerated sore throats have been very prevalent. Whooping-cough has been almost universal throughout the district. Half of the deaths registered were over 60 years of age.

KILRUSH; Kilrush, W.—Measles of a mild type has appeared during the past quarter; there were no deaths resulting.

SCARRIFF; Annacarraig.—There was an outbreak of typhoid fever, which happily did not continue. Seven persons were attacked, one of whom died on the eleventh day.

SCARRIFF; Feale.—Whooping-cough prevailed extensively through the district, and prevented vaccination being performed.

TULLA; Kilkishen.—Whooping-cough was the only prevalent disease: up to the present no case ended fatally. Some cases of vaccination had to be postponed; in others parents are very slow in having their children done in the cold weather.

Cork County.

BANTRY; Durrus and Kilcrohane.—District very healthy, with the exception of an outbreak of measles in eastern part of district, but of a mild form.

CLONAKILTY; Timoleague.—Vaccination partly postponed in consequence of outbreak of typhoid fever.

CORK; Carrigaline, No. 1.—Vaccination, which was suspended, has been resumed lately.

CORK; Carrigaline, No. 2.—During the early part of the quarter there was an epidemic of diphtheria, but during the past month the disease has disappeared.

CORK; Carrignavar, No. 1.—There was one case of enteric fever sent to hospital.

CORK; Carrignavar, No. 2.—Vaccination deferred owing to the prevalence of lung affections amongst the children.

CORK; Whitechurch.—There have been a good many cases of whooping-cough. A few cases of diphtheria; no deaths from above.

DUNMANWAY; Ballineen.—Did not vaccinate during the quarter.

KILMALLOCK; Charleville, part of.—There have been a good many cases of typhoid fever. The disease is now abating, otherwise there is very little sickness.

KINSALE; Ballyfeard.—Some cases of diphtheria occurred causing some deaths which have not yet been registered.

MALLOW; Ballyclogh.—Bronchitis very prevalent amongst the aged poor. Vaccination a little backward owing to severe weather.

MALLOW; Rahau.—One death each has been registered from membranous croup and diphtheria. There has been no other infectious disease except one case of puerperal fever.

MIDDLETON; Middleton, No. 2.—The whole of the children in one house, numbering, I think, five, were attacked in the month of December with scarlatina. The child first attacked attended the Carrigtwohill National School; no other cases have appeared.

MILLSTREET; Cullen.—Vaccination had to be postponed in a number of cases owing to the prevalence of whooping-cough.

MITCHELSTOWN; Mitchelstown, part of, W.—Vaccination postponed owing to general epidemic of whooping-cough.

SKIBBEREEN; Skibbereen, W.—Scarlatina of a mild type prevailed in the town of Skibbereen during the early part of the quarter.

SKIBBEREEN; Tullagh.—Scarlatina has been prevalent for the quarter.

Kerry County.

CAHERSIVEEN; Emlagh.—An epidemic of measles prevails, and a few cases of ill-defined fever. Vaccinations have been postponed in consequence.

CAHERSIVEEN; Glanbehy.—One died of chronic gastritis, one of phthisis, two of old age, two of cough, one weak from birth.

CAHERSIVEEN; Valencia.—Measles prevailed attended by bronchial affections.

KENMARE; Sneem.—Whooping-cough prevalent.

KILLARNEY; Coom.—Whooping-cough prevalent during the quarter.

KILLARNEY; Killarney, No. 1, W.—Whooping-cough of a mild type prevalent.

KILLARNEY; Killarney, No. 2.—While whooping-cough, measles, and scarlatina existed in the district, I could not vaccinate.

KILLARNEY; Killorglin.—Whooping-cough prevailed in portion of the district.

KILLARNEY; Molahiffe.—Vaccination had to be postponed, owing to the prevalence of whooping-cough. The ages of persons who died during quarter were respectively, two at 87 years of age, and one each at 97, 90, 85, 81, 71, and 62 years respectively.

LISTOWEL; Ballyhorgan.—The death of a woman aged 107 years, well authenticated, was recorded.

LISTOWEL; Ballylongford.—Vaccination has been backward, but it is, in my opinion, owing to bad weather. The children will come in during the current quarter.

TRALEE; Castleisland.—Whooping-cough prevalent during the quarter, from which six deaths of young children have been registered.

TRALEE; Castlemaine.—Scarlatina became epidemic early in November. There were four deaths, three of these occurred in one family, which I attribute to overcrowding. I got the schools of the parish closed immediately, and by the general use of disinfectants and other measures we were able to stamp out the disease in a few weeks. There have been no fresh cases for the last month.

TRALEE; Tralee No. 1, W.—Not many cases of vaccination owing to the prevalence of whooping-cough. There were some cases of scarlatina, but of a mild type.

Limerick County.

KILMALLOCK; Bruff.—Scarlatina prevalent during quarter. Diphtheria and influenza have made their appearance.

KILMALLOCK; Charleville, part of.—See note under head of Cork County.

KILMALLOCK; Kilfinane.—Vaccinations postponed generally on account of some cases of scarlatina and scabies.

KILMALLOCK; Kilmallock, W.—Rubella (German measles) and scarlatina of a mild type were prevalent amongst children in the town during November and December. There were two deaths from scarlatina, one of which occurred in the fever hospital.

MITCHELSTOWN; Mitchelstown, part of.—See note under head of Cork County.

RATKEALE; Shanagolden.—Scarlatina (a few cases of mild form) in district last month. No fresh cases for five weeks.

Tipperary County.

CARRICK-ON-SUIR; Carrick-on-Suir, part of, W.—Whooping-cough epidemic for the past three months. For this reason very few children have been presented for vaccination.

CARRICK-ON-SUIR; Garrangibbon.—The deaths above sixty years of age are at the ages of 72, 80, 85, and 88 years.

CASHEL; Kilpatrick.—Whooping-cough has existed throughout district for the past nine months. It is now in a sporadic form. Three cases of acute croupous pneumonia have occurred in one locality since December 1st; two deaths from same, one in an old man; the other case, that of a labourer, was unfit for removal to hospital when first seen.

CLOGHEEN; Caher.—On account of the prevalence of whooping-cough vaccination had to be postponed.

TIPPERARY; Bansha.—Some cases of scarlatina.

TIPPERARY; Tipperary, W.—The sanitary arrangements in the town have been much improved since the introduction of the excellent water supply. There were a large number of cases of scarlatina during the month of September, but we have not had any fresh cases for past six weeks.

URLINGFORD; Kilcooly.—Typhoid fever was prevalent during quarter, but no deaths from it. I have no vaccinations for quarter, as children were not presented; however there are not many, and I am returning them as defaulters.

Waterford County.

CARRICK-ON-SUIR; Carrick-on-Suir, part of.—See note under head of Tipperary County.

CLONMEL; Ballymacarbry.—Sanitary condition good in all respects, save one sewer, which got choked up, and caused a dangerous nuisance: report made to Board of Guardians.

DUNGARVAN; Dungarvan, W.—The five deaths registered from typhus fever took place in the Union Hospital and were sent there from an adjoining dispensary district.

DUNGARVAN; Whitechurch.—There were several cases of typhus fever.

KILMATHOMAS; Kilmathomas, W.—Vaccination, as usual at this time of the year, somewhat below the average.

WATERFORD; Waterford, No. 1, W.—Vaccination is somewhat backward owing to inclemency of weather.

WATERFORD; Woodstown.—The sanitary condition of Dunmore East has been greatly improved during the past quarter. The supplemental water supply will be completed in February, and it is hoped that the improvement in the sewerage of the village, which the Sanitary Authority has undertaken, will be soon accomplished.

III. PROVINCE OF ULSTER.**Antrim County.**

ANTRIM; *Crumlin*.—Vaccination postponed in several cases in consequence of influenza in the family.

ANTRIM; *Doagh*.—There has been a widespread epidemic of whooping-cough in Ballyclare and neighbourhood during the quarter, which has considerably affected the number of vaccinations. There have also been a considerable number of cases of typhoid fever during the last month.

ANTRIM; *Templepatrick*.—Diseases of the respiratory organs are rather common but no epidemic.

BALLYMENA; *Ballymena, W.*—A good deal of whooping-cough and influenza; also I have under my care three cases of typhoid fever.

BALLYMENA; *Toome*.—Pertussis (whooping-cough) has been prevalent, causing two deaths: now on the decline. Typhoid fever also prevalent causing three deaths, not now spreading. Pulmonary and bronchial diseases very common in the old and very young.

BALLYMONEY; *Dirraw*.—Whooping-cough prevalent.

BELFAST; *Belfast, No. 5*.—Typhoid fever was very prevalent.

BELFAST; *Belfast, No. 9*.—The epidemic of typhoid fever is now almost completely extinct. Only an occasional secondary case occurred during the past month (December). Since 25th November the district has been under the Public Health Department of Belfast.

LARNE; *Carrickfergus*.—Bronchitis and pneumonia prevalent during quarter.

LISBURN; *Glenavy*.—A remarkable feature is the great age at which death took place in so large a proportion of those registered. Of eighteen deaths four were between 60 and 70, four between 70 and 80, four between 80 and 90, and two between 90 and 100 years of age.

LISBURN; *Lisburn, part of, W.*—There have been a number of cases of scarlatina, but only one death so far. There has been a high mortality amongst children, viz.:—nineteen deaths registered under one year of age and four between 1 and 2 years of age.

Armagh County.

ARMAGH; *Blackwatertown*.—The district is free from zymotic disease, whooping-cough having almost disappeared.

ARMAGH; *Loughgall*.—Whooping-cough, measles, and scarlatina, all of a very mild type, were prevalent.

ARMAGH; *Markethill*.—One case of typhoid fever came into the district from Armagh. Whooping-cough has been very prevalent amongst children.

BANERIDGE; *Tanderagee*.—Whooping-cough has been very prevalent, and of a severe type.

DUNDALK; *Barronstown, part of*.—See note under head of Louth County.

Cavan County.

BAILIEBOROUGH; *Kingscourt*.—Since the beginning of December there has been an outbreak of whooping-cough of a mild type.

BAWNBOY; *Newtowngore, part of*.—Vaccination in a backward state, owing to inclemency of the weather.

CAVAN; *Cavan, W.*—There have been some cases of whooping-cough.

CAVAN; *Stradone*.—Vaccinations have been postponed, owing to the prevalence of scarlet fever. The scarlatina epidemic is subsiding, and the district is almost clear of it.

COOTEHILL; *Drum, part of*.—There were two cases of scarlatina, one, occurring in a woman, who had been delivered four days previous to symptoms, proved fatal.

ENNISKILLEN; *Holywell, part of*.—The district is free from epidemic disease at present. I was called the 13th November last to see a man in the village of Blacklion, whom I found to be suffering from typhoid fever. The patient, who was a travelling tea-seller, came from Irvinestown *via* Enniskillen, and was ill when he arrived at Blacklion. I had him removed to hospital immediately. A few weeks ago a family of three children residing at Belcoo were simultaneously attacked with vomiting and diarrhoea after drinking water from the local source. The symptoms lasted three days.

OLDCASTLE; *Ballyjamesduff*.—A mild epidemic of scarlet fever was prevalent until the beginning of this month (December). There was only one death from it.

Donegal County.

BALLYSHANNON; *Ballintra*.—Water supply none at present.

DONEGAL; *Donegal, W.*—Four cases of typhus during the quarter, one death.

DONEGAL; *Dunkineely*.—Several cases of whooping-cough, but no death from it. One death from typhus—no other case of this disease.

DONEGAL; *Pettigoe*.—Epidemic of whooping-cough seems to have passed away, it caused one death.

GLENTIES; *Ardara*.—I have made careful inquiry about a woman returned as a centenarian, and ascertained from all accounts that she was upwards of 102 years of age at her death.

GLENTIES; *Dunglow, No. 1*.—The district is now healthy. There were some

cases of fever since the middle of October, resulting in one death, which is not registered. The sanitary authority acting promptly, removed the several cases as they arose to fever hospital, and the fever appears now to be stamped out.

GLENTIES; Dunglow, No. 2.—District was healthy up till the last three weeks of the quarter, when typhus fever appeared amongst a family of nine persons in the townland of Keadew; the head of the family died, and the others were all removed to hospital. The medical officer has only seen one fresh case since in this district; isolation and every precaution are being carried out strictly.

GLENTIES; Killybegs.—Whooping-cough has been prevalent—one child died probably from that disease—no medical attendant.

STRABANE; Raphoe.—Severe epidemic of measles at present. One death reported from whooping-cough, which also prevails here at present.

Down County.

BELFAST; Castlereagh, No. 1.—Typhoid has decreased in a great measure.

BELFAST; Castlereagh, No. 4.—Typhoid fever has been very prevalent, but the mortality has been very low in proportion to the number of cases affected.

DOWNPATRICK; Ballynahinch.—District free from any epidemic, with the exception of influenza, which is of a very mild type. One case at the age of 93 years, and another 98 years.

DOWNPATRICK; Clough.—Whooping-cough prevalent.

DOWNPATRICK; Downpatrick, W.—Two deaths attributed to influenza.

KILKEEL; Kilkeel, No. 2, W.—Parts of district undrained, and full of cesspools.

KILKEEL; Rosstrevor.—The ages of the persons who died aged 60 and upwards were 68, 76, 85, 89, and 97 years.

LISBURN; Ballylesson.—The condition of labourers' dwellings seems to become gradually worse.

LISBURN; Lisburn, part of.—See note under head of Antrim County.

LISBURN; Saintfield.—A few cases of whooping-cough with one death.

LURGAN; Moira.—The birth rate has been low, as it exactly balances the deaths which have been normal. In both cases the sexes balance each other.

LURGAN; Waringstown.—One death was registered, aged 102 years.

NEWRY; Rathfriland.—No deaths registered from infectious or contagious disease, but had one death from typhoid in a family where five were attacked; three went to hospital on 17th December, and are progressing favourably. I saw diphtheria in

two houses. The last house three cases were in it, and two went to hospital on 10th November, and one died last week, I believe from paralysis. The diphtheria was in a townland four miles from town, and the fever nearly two miles, since that I have not heard of any fresh cases.

NEWTOWNARDS; Comber.—The health of the district is exceptionally good—this is the smallest return of deaths since I came here, 14 years ago, over a third less than I ever registered in one quarter before. Measles is prevalent; and enteric fever in only one house.

NEWTOWNARDS; Greyabbey.—Four deaths over 80 years; the highest, 95 years. Measles epidemic in three divisions. Pertussis (whooping-cough) in one. Pertussis followed after measles in Ballyhalbert division. Several cases of sore throat with croupy signs in the Ballywalter division—of type of diphtheritic croup—one death recorded, and certified as laryngeal diphtheria—no case seen for over a month—cause not known. At present, very prevalent also, a form of influenza cold in several cases accompanied with abdominal symptoms, diarrhoea (easily checked however); aged and young, both suffering from this.

NEWTOWNARDS; Kilmood.—Two cases of scarlatina came under my notice recently. I had the school in which they originated closed, and I have not since heard of any fresh cases. The epidemic of whooping-cough is now almost over, and did not cause any deaths. Only two deaths registered, between the ages of 4 months and 67 years, and both were from consumption.

NEWTOWNARDS; Newtownards, W.—There is no epidemic at present in the district. There are a good number of cases of bronchial catarrh among the old and very young. The epidemic of measles which passed over the district in the autumn and early part of this quarter has abated.

Fermanagh County.

BALLYSHANNON; Belleek.—Some cases of German measles of a mild type,

ENNISKILLEN; Holywell, part of.—See note under head of Cavan County.

IRVINESTOWN; Clonelly.—The epidemic of whooping-cough, which first appeared about beginning of quarter, has passed away.

IRVINESTOWN; Irvinestown, No. 2, part of.—There were two cases of typhoid fever. One died; the other is convalescent. Whooping-cough still prevalent, but no deaths from it. Influenza of a gastro-enteric form, prevailed in the month of November.

LISNASKEA; Derrylin.—Many children have not been vaccinated of late, the late medical officer (now deceased) having post-

poned vaccination presumably on account of the presence of diphtheria. There is no diphtheria now. I have had no cases of infectious disease during my term of office from 16th November last, except two cases of whooping-cough.

LISNASKEA; *Lisnaskea, W.*—Some mild cases of scarlatina, with one death, which is not certified.

Londonderry County.

COLERAINE; *Garvagh.*—One death registered at 106 years of age on fairly good authority. Whooping-cough with complications still in the district.

LIMAVADY; *Feeny.*—Whooping-cough has been very prevalent during the past quarter, but no deaths have been registered as resulting from it.

LONDONDERRY; *Claudy.*—A considerable number of cases of whooping-cough and mumps have come under my notice in the southern part of the district.

LONDONDERRY; *Eglinton.*—Whooping-cough, which was very prevalent all the year, has abated. Several cases of scarlatina of a mild type were attended during the quarter.

MAGHERAFELT; *Bellaghy.*—More than 50 per cent. of the deaths registered are those of aged people 60 to 87 years of age.

MAGHERAFELT; *Maghera.*—Deaths of two centenarians in the quarter.

MAGHERAFELT; *Moneymore.*—There are at present a few isolated cases of influenza of a milder type than last year. About a month ago I discovered a family of several children in an outlying part of the district recovering from scarlatina. They are being kept isolated.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—During the last week of quarter influenza became very prevalent.

CARRICKMACROSS; *Donaghmoyne.*—Typhoid fever appeared in four different localities in the district. All of the four persons first attacked had been living in other districts when they contracted the disease. A mother and brother of one of the patients subsequently contracted the disease. As all necessary precautions were taken, the disease does not seem to have spread further. There were no deaths from it so far.

CARRICKMACROSS; *Raferagh.*—Most of the deaths were of old persons suffering from chronic affections.

CASTLEBLAYNEY; *Castleblayney, W.*—Of the 16 persons, aged 60 years and upwards, whose deaths were registered, one was

said to have been 97 years old, one 95, one 94, two 90, and two 80. There are at present under treatment large numbers suffering from influenza, and its complications.

COOTEHILL; *Drum, part of.*—See note under head of Cavan County.

DUNDALK; *Louth, part of.*—See note under head of Louth County.

MONAGHAN; *Castleshane.*—Some cases of whooping-cough.

MONAGHAN; *Glaslough.*—Whooping-cough, which has been very prevalent for some time, has greatly declined, and vaccination was postponed in many cases, owing to its presence.

MONAGHAN; *Kilmore.*—Early in the quarter there were a few cases of mumps and I have seen a few cases of influenza.

Tyrone County.

CLOGHER; *Fivemiletown.*—Deaths all at the age of 60 years and upwards; one reached the age of 90 years. Our new water works are nearly completed and we hope to have a good supply of water in a few weeks.

COOKSTOWN; *Cookstown, W.*—One case of enteric fever registered, but it did not originate in this district, having been imported from Lurgan.

DUNGANNON; *Clonavaddy.*—Two of the deaths registered were of persons who had reached the great age of 100 years each.

IRVINESTOWN; *Irvinstown No. 2, part of.*—See note under head of Fermanagh County.

OMAGH; *Omagh, No. 2.*—There was a slight epidemic of whooping-cough; district unusually healthy.

STRABANE; *Strabane, W.*—Very few children vaccinated on account of whooping-cough being in district.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Killaan.*—Whooping-cough still in the district and accounted for three deaths, otherwise not much illness.

BALLINASLOE; *Killormer.*—One death from scarlatina has occurred, not yet registered.

BALLINROBE; *Cappaghduff, part of.*—There was an epidemic of measles. It is now on decline, I may say gone.

GALWAY; *Spiddle.*—Vaccination postponed during past quarter, whooping-cough being prevalent in district.

GALWAY; *Turloughmore.*—There are some cases of typhoid fever.

GLENNAMADDY; *Glennamaddy, W.*—Whooping-cough very prevalent, also some cases of diphtheria.

GLENNAMADDY; *Williamstown.*—Whooping-cough and measles have been very prevalent with the result that primary vaccination was interfered with.

LOUGHREA; *Athenry*—The deaths of three persons aged respectively 80, 84, and 86 years have been registered during the quarter.

LOUGHREA; *Bullaun.*—The ages of the persons 60 and upwards whose deaths were registered were 65, 67, 70, 75, 76, 77, and 78 years.

LOUGHREA; *Woodford.*—The attack of typhus fever which was going on at the beginning of this quarter in the mountains, south-west of Woodford, has entirely subsided, but three cases (all now convalescent) have occurred in one house, about 4 miles north.

MOUNTBELLEW; *Clonbrock.*—Epidemic of whooping-cough now prevails.

OUGHTERARD; *Cloonbur, No. 2.*—The health of this district is particularly good notwithstanding the hovels in which the large amount of the population live, viz.: a large family occupying half the house, and cattle stored in the other half. The sanitary authority is unable to cope with this condition of things on account of the extreme poverty of the people being unable to provide out-houses. There were several cases of whooping-cough, one death; and one case of typhoid fever which I removed to hospital.

TUAM; *Headford.*—There has been a great epidemic of diarrhoea due probably to the potatoes. No deaths have occurred from it.

Leitrim County.

BALLYSHANNON; *Kinlough.*—Several cases of typhoid fever from which one death occurred.

BAWNBOY; *Newtowngore, part of.*—See note under head of Cavan County.

MOHILL; *Carrigallen.*—There were a few sporadic cases of scarlatina, no epidemic.

Mayo County.

BALLINA; *Ballina, part of, W.*—Measles has made its appearance in the town.

BALLINROBE; *Cappaghduff, part of.*—See note under head of Galway County.

BALLINROBE; *Cong.*—A mild epidemic of scarlatina in part of the district.

BELMULLET; *Bangor.*—There was an outbreak of measles during the months of October and November, but no deaths from the epidemic occurred.

BELMULLET; *Binghamstown, W.*—Three cases of fever broke out in Ardmore, which I had removed to hospital. The disease did not spread. Whooping-cough prevalent in part of district.

CASTLEBAR; *Balla.*—Influenza of a severe type prevalent throughout the district.

CASTLEBAR; *Castlebar, No. 2.*—There is an epidemic of measles.

CLAREMORRIS; *Ballyhaunis.*—Whooping-cough, which in the early part of the quarter was very prevalent and severe, has almost disappeared.

KILLALA; *Ballycastle.*—There was an epidemic of measles, during the quarter, which prevented parents getting their children vaccinated.

KILLALA; *Killala, W.*—A severe epidemic of measles has occurred and is now generally prevalent.

SWINEFORD; *Kiltamagh.*—Whooping-cough has been very prevalent.

WESTPORT; *Achill.*—Vaccination defective as the parents neglect presenting children.

Roscommon County.

ATHLONE; *Athlone No 2.*—Two of the deaths recorded had reached the ages of 93 and 104 years respectively, the former a female and the latter a male, and both from the rural part of the district.

ATHLONE; *Kiltoom.*—Amongst the deaths registered was that of a man born the year 1801, and who enjoyed good health and the possession of all his faculties almost to the last.

BOYLE; *Boyle, part of, W.*—Whooping-cough has been prevalent.

CASTLEREAGH; *Castleplunket.*—Death of a woman registered whose age was 102 years.

ROSCOMMON; *Roscommon, W.*—Whooping-cough is epidemic.

STROKESTOWN; *Roosky.*—Seven of the deaths registered averaged 78 years and over. Amongst the deaths there is that of a female aged 105 years last birthday. She would be 106 in June next, had she lived so long. Vaccination was remarkably well attended to lately, a lot of defaulters being picked up.

STROKESTOWN; *Strokestown, W.*—Measles and influenza were prevalent.

Sligo County.

BALLINA; *Ballina, part of.*—See note under head of Mayo County.

BOYLE; *Boyle, part of.*—See note under head of Roscommon County.

SLIGO; *Ballymote.*—No infectious diseases only the winter coughs and colds amongst the children and aged.

DUBLIN: Printed for Her Majesty's Stationery Office,
By ALEX. THOM & Co. (Limited), 87, 88, & 89, Abbey-street,
The Queen's Printing Office.

P.483. 12. 97. 1,325.
